Combined Subject Index

Abrasion resistance, Heating effects
Evaluation of halide-activated pack boriding of Inconel 722. 670-675A

Absorption (material), Heating effects
The effect of ion implanting on hydrogen entry into metals. 1535-1540A

Accuracy
Three-dimensional modeling of the flow and the interface surface in a continuous casting mold model. 1095-1105B
Cavitation and failure during hot forging of Ti-6Al-4V. 1411-1424A
Effect of fiber spatial arrangement on the transverse strength of titanium matrix composites. 2513-2522A

Acicular structure
Effect of initial microstructure on plastic flow and dynamic globularization during hot working of Ti-6Al-4V. 3219-3229A

Activated sintering
Nickel monoaluminide coating on ultralow-carbon steel by reactive sintering. 1605-1612A

Activation energy
Studies on the chlorination of zircon. I. Static bed investigations. 205-213B
Kinetics and mechanism of electroless copper deposition at moderate-to-high copper ion and low-to-moderate formaldehyde concentrations. 223-229B
Recrystallization activation energy in mechanically alloyed oxide-dispersion-strengthened metals measured by differential scanning calorimetry. 1885-1887A

Adhesion
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A

Aging (artificial)
Microstructural evolution in a 17-4 PH stainless steel after aging at 400°C. 345-353A
Yield behavior of a mild steel after prestraining and aging under reversed stress. 411-416A
Stabilization and two-way shape memory effect in Cu-Al-Ni *single crystals.* 493-499A
Aging behavior of an Al-Li-Cu-Mg-Zr alloy. 741-749A
Study of precipitation kinetics in a super purity Al-0.8% Mg-*0.9% Si alloy using differential scanning calorimetry.* 879-884A
Phase transformation of Zn-4Al-3Cu alloy during heat treatment. 917-923A
Formation of hcp martensite during the isothermal aging of an fcc Co-27Cr-5Mo-0.05C orthopedic implant alloy. 1177-1184A
Influence of secondary precipitates and crystallographic orientation on the strength of single crystals of a Ni-based superalloy. 1249-1259A
The effects of preaging treatments on aging kinetics and mechanical properties in AA6111 aluminum autobody sheet. 1999-2006A
Development of a heat treatment for a directionally solidified cobalt-base superalloy. 2251-2254A
The microstructural evolution in Ti-Al-Nb O+bcc orthorhombic alloys. I. 2305-2323A
Tensile strength of thermomechanically processed Cu-9Ni-6Sn alloys. 2649-2657A
Mechanism of the formation of lamellar $M_{23}C_6$ at and near twin boundaries in austenitic stainless steels. 2791-2801A
Creep-rupture behavior of forged, thick section 9Cr-1Mo ferritic steel. 2825-2834A

Aging (artificial), Composition effects
Microstructure and mechanical behavior of spray-deposited high-Li Al-Li alloys. 1381-1389A

Aging (artificial), Welding effects
Precipitation sequence in friction stir weld of 6063 aluminum during aging. 3125-3130A

Aging (natural)
A process model for the heat-affected zone microstructure evolution in Al-Zn-Mg weldments. 2667-2677A

Air pollution
Greenhouse gases and the metallurgical process industry. 841-856B

Aircraft components, Coating
Mathematical modeling of a melt pool driven by an electron beam. 515-525B

Allotropic transformation, Heating effects
The microstructural evolution in Ti-Al-Nb O+bcc orthorhombic alloys. I. 2305-2323A
Influence of the Mn content on the kinetics of austempering transformation in compacted graphite cast iron. 2745-2752A

Alloy plating
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A

Alpha iron, Microstructure
Fifty-year study of grain-boundary relaxation. 2267-2295A

Aluminides, Bonding
Wide-gap transient liquid-phase bonding of Ti-48 at.% Al-2 at.% Cr-2 at.% Nb. 2723-2726A
Bulk-alloy microstructural analogues for transient liquid-phase bonds in the NiAl/Cu/Ni system. 3111-3124A

Aluminides, Coatings
Nickel monoaluminide coating on ultralow-carbon steel by reactive sintering. 1605-1612A
Synthesis and cyclic oxidation behavior of a (Ni, Pt)Al coating on a desulfurized Ni-base superalloy. 2679-2687A

Aluminides, Composite materials
Wear behavior of in situ Al-based composites containing TiB_2, Al_2O_3, and Al_3Ti particles. 243-248A
Fatigue-crack propagation behavior of ductile/brittle laminated *composites.* 633-642A
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A
Wear behavior of Al-Al_3Ti composite manufactured by a centrifugal method. 3253-3261A

Aluminides, Directional solidification
Directional solidification and phase equilibria in the Ni-Al system. 3167-3175A

Aluminides, Heat treatment
The nitriding behavior of Ti-Al alloys at 1000°C. 19-29A

Aluminides, Mechanical properties
Cavitation erosion of NiAl. 335-343A
The effect of microstructure on fracture toughness and fatigue *crack growth behavior in γ-titanium aluminide based intermetallics.* 563-577A
High-temperature deformation behavior of NiAl(Ti) solid-solution single crystals. 587-600A
Modeling and measurement of the notched strength of gamma titanium aluminides under monotonic loading. 949-959A
Deformation and fracture behavior of a directionally solidified β/*γ′ Ni-30 at.% Al alloy.* 1003-1015A
Statistical simulation of small fatigue crack nucleation and coalescence in a lamellar TiAl alloy. 1203-1209A
*Interplay between oxidation and wear behavior of the Ti-48Al-*2Cr-2Nb-1B alloy. 2019-2026A
The creep behavior of Ti-Al-Nb O+bcc orthorhombic alloys. II. 2349-2367A
Temperature and composition dependence of the elastic constants of Ni_3Al. 2403-2408A
Influence of the temperature on the plastic deformation in TiAl. 2865-2873A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Aluminides, Melting
Discussion of "Superheating behavior of NiAl". 1675A

Aluminides, Oxidation
Oxidation behavior of niobium aluminide intermetallics protected by aluminide and silicide diffusion coatings. 495-504B

Aluminides, Phase transformations
The microstructural evolution in Ti-Al-Nb O+bcc orthorhombic alloys. I. 2305-2323A
Formation of α phase in the massive and feathery γ-TiAl alloys during aging in the single α field. 2591-2598A
Magnetic transformation of Ni_2AlMn Heusler-type shape memory alloys. 2721-2723A

Aluminides, Powder technology
Micropyretic synthesis studies of Ni-, Al-, Ti-, and Nb-containing alloys. 171-188B
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the α+γ-phase field. 751-761A
Thermal analysis of self-propagating high-temperature reactions in titanium, boron, and aluminum powder compacts. 781-788A
Field-activated combustion synthesis of titanium aluminides. 1101-1108A

Aluminides, Welding
The role of phase transformation in electron-beam welding of TiAl-based alloys. 1717-1726A

Aluminum, Alloying additive
Studies of the morphology of the Al-rich interfacial layer formed during the hot dip galvanizing of steel sheet. 681-695A
The fatigue and fracture resistance of a Nb-Cr-Ti-Al alloy. 2007-2018A

Aluminum, Alloying elements
Characteristics of continuous-galvanizing baths. 144-148B
Liquid-solid partition ratios in nickel-base alloys. 2173-2181A

Aluminum, Binary systems
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A
Cyclic solid-state transformations during ball milling of aluminum zirconium powder and the effect of milling speed. 1877-1880A
The influence of temperature gradients on Ostwald ripening. 2341-2348A
A numerical model of peritectoid transformation. 2563-2573A
Determination of the critical nucleus size of precipitates using the macroscopic composition gradient method. 2783-2789A
Directional solidification and phase equilibria in the Ni-Al system. 3167-3175A

Aluminum, Bonding
The influence of solid-state and liquid-phase bonding on fatigue at Al/Al_2O_3 interfaces. 763-769A

Aluminum, Casting
A mathematical model of the heat and fluid flows in direct-chill casting of aluminum sheet ingots and billets. 119-133B
A mathematical model for surface segregation in aluminum direct chill casting. 135-142B
High-energy x-ray computed tomography of the progression of the solidification front in pure aluminum. 1403-1409A
Study of electromagnetic separation of nonmetallic inclusions from aluminum melt. 2979-2988A

Aluminum, Chemical analysis
Distribution of aluminum in hot-dip galvanized coatings. 3031-3044A

Aluminum, Composite materials
Thermal expansion of morphologically textured short-fiber composites. 203-212A
Settling of multisized clusters of alumina particules in liquid aluminum. 241-247B
Wear behavior of in situ Al-based composites containing TiB_2, Al_2O_3, and Al_3Ti particles. 243-248A
Infiltration of fibrous preforms by a pure metal. V. Influence of preform compressibility. 471-482A
Mechanical behavior of aluminum matrix composite during extrusion in the semisolid state. 1137-1146A
A study on the kinetic process of reaction synthesis of TiC. I. Experimental research and theoretical model. 1147-1151A
A study on the kinetic process of reaction synthesis of TiC. II. Theoretical analyses and numerical calculation. 1153-1157A
Plasticity of continuous fiber-reinforced metals. 1843-1866A
Discussion of "Particle engulfment and pushing by solidying interfaces. II. Microgravity experiments and theoretical analysis" and authors' reply. 1887-1894A
Influence of the localized initial plastic deformation on the effective thermomechanical response of metal-matrix composites. 2875-2884A
Modeling of composite growth in the directed aluminum melt nitridation process. 2951-2958A
Wear behavior of $Al-Al_3Ti$ composite manufactured by a centrifugal method. 3253-3261A

Aluminum, Crystal growth
The Alstruc microstructure solidification model for industrial aluminum alloys. 2135-2146A

Aluminum, Diffusion
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A

Aluminum, Extraction
The influence of the initial shape and position of an anode and the curvature of the aluminum on the current distribution in prebaked aluminum cells. 341-348B

Aluminum, Mechanical properties
Microstructure and mechanisms of cyclic deformation in aluminum single crystals at 77K. II. Edge dislocation dipole heights. 777-779A

Aluminum, Microstructure
Influence of pressing speed on microstructural development in equal-channel angular pressing. 1989-1997A
Fifty-year study of grain-boundary relaxation. 2267-2295A
Deformation bands, the LEDS theory, and their importance in texture development. I. Previous evidence and new observations. 2491-2501A

Aluminum, Physical properties
Damping behavior of foamed aluminum. 771-776A
The surface tension of molten aluminum and Al-Si-Mg alloy under vacuum and hydrogen atmospheres. 1027-1032B

Aluminum, Powder technology
Thermal analysis of self-propagating high-temperature reactions in titanium, boron, and aluminum powder compacts. 781-788A

Aluminum, Reactions (chemical)
Nonisothermal gravimetric investigation on kinetics of reduction of magnesia by aluminum. 1003-1008B

Aluminum, Recovering
Recycling of aluminum matrix composites. 839-844A

Aluminum, Refining
Analyses of the dynamic processes of liquid metal filtration. 891-900B

Aluminum, Ternary systems
Thermodynamic assessment of the Al-Fe-Si system. 1081-1095A
Thermodynamic activities in the alloys of the Ti-Al-Nb system. 1315-1326A
Experimental and thermodynamic investigation of the Ni-Al-Mo system. 1785-1795A

Aluminum base alloys, Casting
Modeling the fluid-flow-induced stress and collapse in a dendritic network. 287-293B
The heat-transfer coefficient during the unidirectional solidification of an Al-Si alloy casting. 473-482B
Casting-chill interface heat transfer during solidification of an aluminum alloy. 773-778B
The effect of Sr and Fe additions on the microstructure and mechanical properties of a direct squeeze cast Al-7Si-0.3Mg alloy. 1341-1356A
A three-dimensional cellular automation-finite element model for the prediction of solidification grain structures. 3153-3165A

Aluminum base alloys, Coating
The effects of preaging treatments on aging kinetics and mechanical properties in AA6111 aluminum autobody sheet. 1999-2006A
Copper coatings for minimization of retention and permeation of implanted tritium in aluminum alloy 6061. 2191-2199A

Aluminum base alloys, Composite materials
The effect of shot particles on the fatigue of Kaowool fiber-reinforced 339 aluminum. 195-201A
Fundamental aspects of creep in metal matrix composites. 315-324A
Synergistic effects of wear and corrosion for Al_2O_3 particulate-reinforced 6061 aluminum matrix composites. 643-651A
Correlation of tensile strength with fracture modes of KAOWOOL- and SAFFIL-reinforced 339 aluminum. 815-824A
Monkman-Grant analysis of creep fracture in dispersion-strengthened and particulate-reinforced aluminum. 829-838A
Recycling of aluminum matrix composites. 839-844A
Mechanical behavior of Al-Li-SiC composites. I. Microstructure and tensile deformation. 845-855A
Mechanical behavior of Al-Li-SiC composites. II. Cyclic deformation. 857-867A
Mechanical behavior of Al-Li/SiC composites. III. Micromechanical modeling. 869-878A
The tensile strength of 339 aluminum reinforced with kaowool fibers: a comparison of T5 and T6 heat treatments. 1835-1841A
Plasticity of continuous fiber-reinforced metals. 1843-1866A
Dry sliding wear behavior of A356-15% SiC_p composites under controlled atmospheric conditions. 2523-2538A
Solutionizing effects on deformation-induced phase transformations in 2014 aluminum composite. 2539-2545A
Wear of Al-based hybrid composites containing BN and SiC particulates. 2551-2555A
Fabrication and characteristics of AA6061/Si_3N_{4p} composite by the pressureless infiltration technique. 2999-3007A
Wear behavior of $Al-Al_3Ti$ composite manufactured by a centrifugal method. 3253-3261A

Aluminum base alloys, Crystal growth
Least-squares adjustment of mathematical model of heat and mass transfer processes during solidification of binary alloys. 505-513B
Measurement of liquid permeability in the mushy zones of aluminum-copper alloys. 745-750B
Experimental determination of mushy zone permeability in aluminum-copper alloys with equiaxed microstructures. 2455-2462A

Aluminum base alloys, Extrusion
Microstructures and tensile properties of an Al-12 wt.% Si alloy produced by reciprocating extrusion. 2503-2512A

Aluminum base alloys, Heat treatment
The nitriding behavior of Ti-Al alloys at 1000°C. 19-29A

Aluminum base alloys, Mechanical properties
Observations of grain-boundary sliding and surface topography in an 8090 Al alloy after uniaxial and biaxial superplastic deformation. 53-64A
Modeling high-temperature stress-strain behavior of cast aluminum alloys. 133-146A
High-temperature deformation behavior of an Al-8.4Fe-3.6Ce dispersion-strengthened material. 371-376A
A new hot-tearing criterion. 449-455A
Low-cycle fatigue crack initiation and break in strain-life curve of Al-Li 8090 alloy. 887-890A
Microalloying of C, Ni, and Ce in an advanced Al-Zn-Mg-Cu alloy. 1017-1024A
Precipitate-induced plastic anisotropy: explicit solutions of the plastic anisotropy due to plate-shaped precipitates. 1283-1288A
Microstructure and mechanical behavior of spray-deposited high-Li Al-Li alloys. 1381-1389A
The effect of grain size and temperature on the superplastic deformation behavior of a 7075 Al alloy. 2037-2047A

Closure-affected fatigue crack propagation behaviors of powder metallurgy-processed Al-Li alloys in various environments. 2097-2102A
Tensile behavior of rapidly solidified Al-Li-Zr and Al-Li-Cu-Mg-Zr alloys at 293 and 77K. 2254-2258A
Influence of calcium addition on the superplastic-like behavior of extruded Al-Al_3Ni eutectic alloy. 2258-2260A
The effect of Mg on the microstructure and mechanical behavior of Al-Si-Mg casting alloys. 2611-2618A
Microstructural effects on high-cycle fatigue-crack initiation in A356.2 casting alloy. 2659-2666A
The effect of solidification rate on the growth of small fatigue cracks in a cast 319-type aluminum alloy. 3055-3068A
The debonding and fracture of Si particles during the fatigue of a cast Al-Si alloy. 3079-3088A
Stress-corrosion cracking susceptibility of the superplastically formed 5083 aluminum alloy in 3.5% NaCl solution. 3191-3199A

Aluminum base alloys, Metal working
Prediction of yield surfaces of textured sheet metals. 377-386A
Computer simulation of annealing and recovery effects on serrated flow in some Al-Mg alloys. 387-397A
Microstructural refinement of an as-cast Al-12.6 wt.% Si alloy by repeated thermomechanical treatment to produce a heavily deformable material. 2221-2228A
An induction heating process with coil design and solutions avoiding coarsening phenomena of Al-6% Si-3% Cu-0.3% Mg alloy for thixoforming. 2967-2977A

Aluminum base alloys, Microstructure
On the origin of the R orientation in the recrystallization textures of aluminum alloys. 1517-1527A
Grain refinement of aluminum alloys. I. The nucleant and solute paradigms—a review of the literature. 1613-1623A
Grain refinement of aluminum alloys. II. Confirmation of, and a mechanism for, the solute paradigm. 1625-1633A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. I. Initial experimental observations. 1643-1650A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. II. A phase-diagram approach. 1651-1655A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. III. A microstructural model. 1657-1662A
Influence of pressing speed on microstructural development in equal-channel angular pressing. 1989-1997A
Application of image processing for simulation of mechanical response of multi-length scale microstructures of engineering alloys. 2369-2381A

Aluminum base alloys, Phase transformations
Study of precipitation kinetics in a super purity Al-0.8% Mg-0.9% Si alloy using differential scanning calorimetry. 879-884A

Aluminum base alloys, Phases (state of matter)
Thermodynamic activities in the alloys of the Ti-Al-Nb system. 1315-1326A
Compositional characterization of Cu-rich phase particles present in as-cast Al-Cu-Mg(-Li) alloys containing Ag. 1693-1704A

Aluminum base alloys, Physical properties
The surface tension of molten aluminum and Al-Si-Mg alloy under vacuum and hydrogen atmospheres. 1027-1032B

Aluminum base alloys, Powder technology
Surface oxide and the role of magnesium during the sintering of aluminum. 457-463A
Anomalous pore morphologies in liquid-phase-sintered Al-Zn alloys. 1682-1685A

Aluminum base alloys, Structural hardening
Aging behavior of an Al-Li-Cu-Mg-Zr alloy. 741-749A

Aluminum base alloys, Welding
Quantitative evaluation of softened regions in weld heat-affected zones of 6061-T6 aluminum alloy—characterizing of the laser beam welding process. 2115-2120A
Microstructural evolution of 6063 aluminum during friction-stir welding. 2429-2437A
A process model for the heat-affected zone microstructure evolution in Al-Zn-Mg weldments. 2667-2677A
Precipitation sequence in friction stir weld of 6063 aluminum during aging. 3125-3130A

Aluminum compounds, Phase transformations
Superheating behavior of NiAl: Authors' reply. 3265A

Aluminum killed steels, Mechanical properties
The effects of grain-refining precipitates on the development of toughness in 4340 steel. 93-114A

Aluminum oxide, Bonding
The influence of solid-state and liquid-phase bonding on fatigue at Al/Al_2O_3 interfaces. 763-769A

Aluminum oxide, Composite materials
The effect of shot particles on the fatigue of Kaowool fiber-reinforced 339 aluminum. 195-201A
Settling of multisized clusters of alumina particules in liquid aluminum. 241-247B
Wear behavior of in situ Al-based composites containing TiB_2, Al_2O_3, and Al_3Ti particles. 243-248A
Infiltration of fibrous preforms by a pure metal. V. Influence of preform compressibility. 471-482A
Synergistic effects of wear and corrosion for Al_2O_3 particulate-reinforced 6061 aluminum matrix composites. 643-651A
Correlation of tensile strength with fracture modes of KAO-WOOL- and SAFFIL-reinforced 339 aluminum. 815-824A
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A
Diffusional reactions during processing of Timetal 21S/Al_2O_3 composites. 1437-1447A
The tensile strength of 339 aluminum reinforced with kaowool fibers: a comparison of T5 and T6 heat treatments. 1835-1841A
Plasticity of continuous fiber-reinforced metals. 1843-1866A
Creep behavior of an AZ91 magnesium alloy reinforced with alumina fibers. 2059-2066A
Solutionizing effects on deformation induced phase transformations in 2014 aluminum composite. 2539-2545A

Aluminum oxide, Crystal growth
Thermodynamics of nucleation and supersaturation for the aluminum-deoxidation reaction in liquid iron. 1065-1074B

Aluminum oxide, Impurities
Modeling of inclusion removal in a tundish. 639-654B

Aluminum oxide, Reactions (chemical)
The effect of Al_2O_3 on liquidus temperatures of fayalite slags. 597-605B
Simulation of primary-slag melting behavior in the cohesive zone of a blast furnace, considering the effect of Al_2O_3, Fe_tO, and basicity in the sinter ore. 671-683B
A study of the sulfide capacities of iron-oxide containing slags. 909-920B
Phase-diagram study for the Al_2O_3-CaF_2-SiO_2 system. 921-925B

Amorphization, Processing effects
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the $\alpha+\gamma$-phase field. 751-761A

Amorphous structure, Processing effects
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the $\alpha+\gamma$-phase field. 751-761A

Annealing
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the $\alpha+\gamma$-phase field. 751-761A
Diffusional reactions during processing of Timetal 21S/Al_2O_3 composites. 1437-1447A
On the origin of the R orientation in the recrystallization textures of aluminum alloys. 1517-1527A

Annealing, Alloying effects
Effect of cold rolling and annealing on the structure of γ'' precipitates in a Ni-18Cr-16Fe-5Nb-3Mo alloy. 1923-1931A

Anode sludge, Reactions (chemical)
Thermodynamics of the miscibility gap in the Ag-Se system. 589-595B

Anodes, Design
The influence of the initial shape and position of an anode and the curvature of the aluminum on the current distribution in prebaked aluminum cells. 341-348B

Anodes, Materials selection
A pilot-scale trial of an improved galvanic deoxidation process for refining molten copper. 307-321B

Anodic dissolution
Electrochemical interfacial phenomena under microgravity. I. Anodic dissolution of copper in drop shaft. 99-105B

Anodic dissolution, Field effects
Electrochemical interfacial phenomena under microgravity. II. Numerical analysis of the rate of ionic mass transfer accompanying anodic copper dissolution. 779-790B

Arc heating
Mechanism of surface modification of the Ti-6Al-4V alloy using a gas tungsten arc heat source. 1597-1603A

Argon, Environment
Dry sliding wear behavior of A356-15% SiC_p composites under controlled atmospheric conditions. 2523-2538A

Argon blowing
Height of the spout of a gas plume discharging from a metal melt. 655-660B

Arsenic, Impurities
Simulation of the removal of arsenic during the roasting of copper concentrate. 393-401B

Arsenic, Trace elements
Creep deformation and fracture of a Cr/Mo/V bolting steel containing selected trace-element additions. 2049-2058A

Ausforming
Deformation of metastable austenite and resulting properties during the ausform-finishing of 1% carburized AISI 9310 steel gears. 183-193A

Austempering
Influence of the Mn content on the kinetics of austempering transformation in compacted graphite cast iron. 2745-2752A

Austenitic stainless steels, Crystal growth
The solidification characteristics of laser surface-remelted Fe-12Cr-nC alloys. 1817-1826A

Austenitic stainless steels, Mechanical properties
Influence of grain size and stacking-fault energy on deformation twinning in fcc metals. 1223-1233A
Improvement of the resistance to stress corrosion cracking in austenitic stainless steels by cyclic prestraining. 1327-1331A
Modeling solid-particle erosion of ductile alloys. 1763-1774A

Austenitic stainless steels, Metal working
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A

Austenitic stainless steels, Oxidation
Simultaneous oxidation and sigma-phase formation in a stainless steel. 355-362A

Austenitic stainless steels, Phase transformations
Mechanism of the formation of lamellar $M_{23}C_6$ at and near twin boundaries in austenitic stainless steels. 2791-2801A

Austenitic stainless steels, Rolling
Composition, microstructure, hardness, and wear properties of high-speed steel rolls. 399-409A

Austenitic stainless steels, Welding
Direction of grain-boundary migration in the weld metal of an austenitic stainless steel. 621-626A

Austenitizing
A method for extracting phase change kinetics from dilation for multistep transformations: austenitization of a low carbon steel. 107-117B
Fatigue and fracture of porous steels and Cu-infiltrated porous steels. 325-334A

Automotive bodies, Coating
The effects of preaging treatments on aging kinetics and mechanical properties in AA6111 aluminum autobody sheet. 1999-2006A

Automotive components, Casting
Relation between cooling rates and microstructures in gravity-die-cast AZ91D disks. 723-729B

Automotive components, Coating
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A

Automotive components, Mechanical properties
Fracture and fatigue behavior of sintered steel at elevated temperatures. I. Fracture toughness. 2885-2893A
Fracture and fatigue behavior of sintered steel at elevated temperatures. II. Fatigue crack propagation. 2895-2904A

Bacterial corrosion, Coating effects
Protection of beryllium metal against microbial influenced corrosion using silane self-assembled monolayers. 2129-2134A

Bainitic transformations
Bainite transformation temperatures in high-silicon steels. 909-916A

Bake hardenable steels, Phase transformations
Aluminum nitride precipitation and texture development in batch-annealed bake-hardening steel. 1663-1673A

Baking
The effects of preaging treatments on aging kinetics and mechanical properties in AA6111 aluminum autobody sheet. 1999-2006A

Ball milling
Cyclic solid-state transformations during ball milling of aluminum zirconium powder and the effect of milling speed. 1877-1880A

Barkhausen effect, Deformation effects
Effect of different stages of tensile deformation on micromagnetic parameters in high-strength, low-alloy steel. 2067-2072A

Batch annealing
Aluminum nitride precipitation and texture development in batch-annealed bake-hardening steel. 1663-1673A

Bauschinger effect
Bauschinger effect and multiaxial yield behavior of stress-reversed mild steel. 3069-3078A

Bauschinger effect, Deformation effects
Yield behavior of a mild steel after prestraining and aging under reversed stress. 411-416A

Bend strength, Processing effects
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A

Beryllium, Corrosion
Protection of beryllium metal against microbial influenced corrosion using silane self-assembled monolayers. 2129-2134A

Beverage cans, Metal working
Computer simulation of annealing and recovery effects on serrated flow in some Al-Mg alloys. 387-397A

Billet casting
Cavity sequences in continuously cast billets. I. Analysis of empirical data. 751-761B
Cavity sequences in continuously cast billets. II. Stochastic models. 763-772B

Billets, Extrusion
Hot working of Ti-6Al-4V via equal channel angular extrusion. 2473-2481A

Billets, Microstructure
Cavity sequences in continuously cast billets. I. Analysis of empirical data. 751-761B
Cavity sequences in continuously cast billets. II. Stochastic models. 763-772B

Binary systems, Phase transformations
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A
Cyclic solid-state transformations during ball milling of aluminum zirconium powder and the effect of milling speed. 1877-1880A
The influence of temperature gradients on Ostwald ripening. 2341-2348A
A numerical model of peritectoid transformation. 2563-2573A
Determination of the critical nucleus size of precipitates using the macroscopic composition gradient method. 2783-2789A

Binary systems, Phases (state of matter)
$\beta \rightarrow \alpha''$ and $\beta \rightarrow \omega$ transformations in Ti-Os alloys. 231-233A
Thermodynamic calculation for alloy systems. 271-277B
Thermodynamics of Ca-Ga alloys. 459-464B
Thermodynamics of the miscibility gap in the Ag-Se system. 589-595B
The neodymium-gold phase diagram. 1169-1176A
Experimental investigations and thermodynamic descriptions of the Ni-Si and C-Ni-Si systems. 2409-2418A
Partial Fe-Ti alloy phase diagrams at high pressure. 3009-3011A
Directional solidification and phase equilibria in the Ni-Al system. 3167-3175A

Bismuth, Alloying elements
Solid solution creep behavior of Sn-xBi alloys. 115-122A
Deformation behavior of dilute SnBi (0.5 to 6 at.%) solid solutions. 123-132A

Bismuth, Dopants
Bismuth embrittlement of [011] twist boundaries in copper bicrystals. 483-485A

Bismuth, Ternary systems
Investigation of the phase equilibria in the Sn-Bi-In alloy system. 1503-1515A

Blast furnace practice
Thermodynamics of TiO_x in blast furnace-type slags. 29-43B
Mathematical modeling of pneumatic char injection in a direct reduction rotary kiln. 969-977B

Blister copper, Extraction
Thermodynamic modeling of lead distribution among matte, slag, and liquid copper. 1033-1044B

Bolts, Mechanical properties
Creep deformation and fracture of a Cr/Mo/V bolting steel containing selected trace-element additions. 2049-2058A

Boriding
Evaluation of halide-activated pack boriding of Inconel 722. 670-675A

Boron, Alloying additive
Influence of carbon content on superplastic behavior in Ti- and B-added Cr-Mo steels. 1185-1191A

Boron nitride, Composite materials
Wear of Al-based hybrid composites containing BN and SiC particulates. 2551-2555A

Bottom blown converters
Model study on mixing and mass transfer in ferroalloy refining processes. 231-239B
Effects of surface flow control on fluid flow phenomena and mixing time in a bottom blown bath. 631-637B

Brasses, Casting
Mathematical modeling of copper and brass upcasting. 75-98B

Brasses, Mechanical properties
Influence of grain size and stacking-fault energy on deformation twinning in fcc metals. 1223-1233A

Brasses, Microstructure
Fifty-year study of grain-boundary relaxation. 2267-2295A

Brinell hardness, Processing effects
A study on laser sintering of Fe-Cu powder compacts. 2229-2235A

Brittle fracture
Eutectic cell wall morphology and tensile embrittlement in ferritic spheroidal graphite cast iron. 1775-1784A

Brittle fracture, Alloying effects
Bismuth embrittlement of [011] twist boundaries in copper bicrystals. 483-485A

Bronzes, Mechanical properties
Tensile strength of thermomechanically processed Cu-9Ni-6Sn alloys. 2649-2657A

Bronzes, Powder technology
Combined effects of time and temperature on strength evolution using integral work-of-sintering concepts. 465-470A

Bubbles
Turbulence structure of bottom-blowing bubbling jet in a molten Wood's metal bath. 61-66B
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. I. Theoretical analysis. 361-367B
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. II. Experiments. 369-373B

Bubbling
Spout eyes formed by an emerging gas plume at the surface of a slag-covered metal melt. 411-418B

Bulk modulus, Temperature effects
Temperature and composition dependence of the elastic constants of Ni_3Al. 2403-2408A

Cadmium, Binary systems
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A

Calcium, Alloying additive
Influence of calcium addition on the superplastic-like behavior of extruded Al-Al_3Ni eutectic alloy. 2258-2260A

Calcium, Binary systems
Thermodynamics of Ca-Ga alloys. 459-464B

Calcium fluoride, Reactions (chemical)
Phase-diagram study for the Al_2O_3-CaF_2-SiO_2 system. 921-925B

Carbides, Coatings
Synthesis and characterizatiion of Ti-Si-C-N films. 2439-2447A

Carbides, Crystal growth
Precipitation of an intermetallic phase with Pt_2Mo-type structure in alloy 625. 41-52A
Secondary carbide precipitation in a directionally solidified cobalt-base superalloy. 513-520A
Characterization of the W_2C phase formed during the high velocity oxygen fuel spraying of a WC+12% Co powder. 1913-1921A
Mechanism of the formation of lamellar $M_{23}C_6$ at and near twin boundaries in austenitic stainless steels. 2791-2801A

Carbides, Mechanical properties
Dislocations, kink bands, and room-temperature plasticity of Ti_3SiC_2. 1727-1738A

Carbon, Composite materials
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A

Carbon, Diffusion
Role of back-diffusion studied by computer simulation. 1635-1641A
Influence of annealing on depth distributions and microstructure of ion-implanted Ti6Al4V. 2121-2127A
Multicomponent diffusion simulation based on finite elements. 2575-2582A

Carbon, Reactions (chemical)
Reactive infiltration of silicon melt through microporous amorphous carbon preforms. 933-944B

Carbon, Solubility
Solubility of carbon in CaO-B_2O_3 and BaO-B_2O_3 slags. 1045-1052B

Carbon, Ternary systems
Experimental investigations and thermodynamic descriptions of the Ni-Si and C-Ni-Si systems. 2409-2418A
Evaluation of interaction parameters in metallic solutions by the isoactivity method. 3103-3110A

Carbon steels, Coating
Effect of flux addition on the microstructure and hardness of TiC-reinforced ferrous surface composite layers fabricated by high-energy electron beam irradiation. 3131-3141A

Carbon steels, Heat treatment
Microstructure of TiB_2/carbon steel surface-alloyed materials fabricated by high-energy electron beam irradiation. 3143-3151A

Carbon steels, Mechanical properties
Fatigue and fracture of porous steels and Cu-infiltrated porous steels. 325-334A
Yield behavior of a mild steel after prestraining and aging under reversed stress. 411-416A
Bauschinger effect and multiaxial yield behavior of stress-reversed mild steel. 3069-3078A

Carbon steels, Melting
Droplet formation, detachment, and impingement on the molten pool in gas metal arc welding. 791-801B

Carbonates, Reduction (chemical)
Effect of heat and mass transfer on the thermal decomposition of $SrCO_3$ compacts. 901-908B

Carbonitrides, Coatings
Synthesis and characterizatiion of Ti-Si-C-N films. 2439-2447A

Carbothermic reactions
Influence of pellet composition and structure on carbothermic reduction of silica. 295-306B
Kinetics of chlorination of zirconia in mixture with petroleum coke by chlorine gas. 375-381B
High-temperature phase relations and thermodynamics in the iron-titanium-oxygen system. 695-705B
Carbothermic reduction of ilmenite ($FeTiO_3$) and rutile (TiO_2). 1075-1081B

Carburizing
Effect of surface carburization on dynamic deformation and fracture of tungsten heavy alloys. 2027-2035A
Multicomponent diffusion simulation based on finite elements. 2575-2582A

Case depth
Mechanism of surface modification of the Ti-6Al-4V alloy using a gas tungsten arc heat source. 1597-1603A
Influence of annealing on depth distributions and microstructure of ion-implanted Ti6Al4V. 2121-2127A

Cast iron, Casting
A thermally coupled flow formulation with microstructural evolution for hypoeutectic cast-iron solidification. 731-744B

Casting alloys, Mechanical properties
Modeling high-temperature stress-strain behavior of cast aluminum alloys. 133-146A
Effect of alloy preheating on the mechanical properties of as-cast Co-Cr-Mo-C alloys. 611-620A
The effect of Mg on the microstructure and mechanical behavior of Al-Si-Mg casting alloys. 2611-2618A
Microstructural effects on high-cycle fatigue-crack initiation in A356.2 casting alloy. 2659-2666A
The effect of solidification rate on the growth of small fatigue cracks in a cast 319-type aluminum alloy. 3055-3068A
The debonding and fracture of Si particles during the fatigue of a cast Al-Si alloy. 3079-3088A

Casting alloys, Microstructure
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. I. Initial experimental observations. 1643-1650A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. II. A phase-diagram approach. 1651-1655A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. III. A microstructural model. 1657-1662A

Casting alloys, Phases (state of matter)
Compositional characterization of Cu-rich phase particles present in as-cast Al-Cu-Mg(-Li) alloys containing Ag. 1693-1704A

Casting defects, Alloying effects
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. I. Initial experimental observations. 1643-1650A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. II. A phase-diagram approach. 1651-1655A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. III. A microstructural model. 1657-1662A

Cavitation
Cavity sequences in continuously cast billets. I. Analysis of empirical data. 751-761B
Cavity sequences in continuously cast billets. II. Stochastic models. 763-772B

Cavitation, Deformation effects
Observations of grain-boundary sliding and surface topography in an 8090 Al alloy after uniaxial and biaxial superplastic deformation. 53-64A
Cavitation and failure during hot forging of Ti-6Al-4V. 1411-1424A
Stress-corrosion cracking susceptibility of the superplastically formed 5083 aluminum alloy in 3.5% NaCl solution. 3191-3199A

Cavitation erosion, Vibration effects
Cavitation erosion of NiAl. 335-343A

Cellular structure
A fine $\gamma'+\alpha$ cellular structure in Fe-37.3 wt.% Ni-3.6 wt.% Al-3.3 wt.% Ti-0.2 wt.% C and its influence on high-temperature tensile properties. 1495-1501A
Eutectic cell wall morphology and tensile embrittlement in ferritic spheroidal graphite cast iron. 1775-1784A
Cell/dendrite distribution in directionally solidified hypoeutectic Pb-Sb alloys. 2159-2165A
Macrosegregation caused by thermosolutal convection during directional soldification of Pb-Sb alloys. 2167-2171A
Cellular/dendritic array tip morphology during directional solidification of Pb-5.8 wt.% Sb alloy. 2463-2472A

Cementation
Selective removal of iron contaminations from zinc-chloride melts by cementation with zinc. 607-611B

Cemented carbides, Coating
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Cemented carbides, Coatings
Characterization of the W_2C phase formed during the high velocity oxygen fuel spraying of a WC+12% Co powder. 1913-1921A

Cemented carbides, Mechanical properties
A dual composite of WC-Co. 3231-3238A

Cementite, Crystal growth
An analytical electron microscopy study of paraequilibrium cementite precipitation in ultra-high-strength steel. 501-512A

Centrifugal casting
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. I. Theoretical analysis. 361-367B
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. II. Experiments. 369-373B
Composition, microstructure, hardness, and wear properties of high-speed steel rolls. 399-409A

Centrifugal castings, Microstructure
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. I. Theoretical analysis. 361-367B
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. II. Experiments. 369-373B

Ceramic fibers, Coating
Tensile properties of duplex metal-coated SiC fiber and titanium alloy matrix composites. 3019-3024A

Cerium, Alloying additive
Microalloying of C, Ni, and Ce in an advanced Al-Zn-Mg-Cu alloy. 1017-1024A
Improvement of shape memory effect in Fe-Mn-Si-Cr-Ni alloys. 2599-2604A

Cermets, End uses
A pilot-scale trial of an improved galvanic deoxidation process for refining molten copper. 307-321B

Chalcopyrite, Beneficiation
Chlorination of chalcopyrite concentrates. 567-576B

Chemical composition
Compositional characterization of Cu-rich phase particles present in as-cast Al-Cu-Mg(-Li) alloys containing Ag. 1693-1704A

Chemical composition, Processing effects
Mathematical model for nitrogen control in oxygen steelmaking. 945-956B

Chemical etching
Electrochemical interfacial phenomena under microgravity. I. Anodic dissolution of copper in drop shaft. 99-105B

Chemical vapor deposition
Influence of cold rolling and strain rate on plastic response of powder metallurgy and chemical vapor deposition rhenium. 2641-2648A
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Chill casting
Casting-chill interface heat transfer during solidification of an aluminum alloy. 773-778B

Chill castings, Crystal growth
Casting-chill interface heat transfer during solidification of an aluminum alloy. 773-778B

Chlorides, Reactions (chemical)
Selective removal of iron contaminations from zinc-chloride melts by cementation with zinc. 607-611B

Chlorination
Kinetics of chlorination of zirconia in mixture with petroleum coke by chlorine gas. 375-381B
Chlorination and carbochlorination of magnesium oxide. 383-391B
Chlorination of chalcopyrite concentrates. 567-576B
A study of chromite carbochlorination kinetics. 577-587B

Chromite, Beneficiation
A study of chromite carbochlorination kinetics. 577-587B

Chromium, Alloying elements
Liquid-solid partition ratios in nickel-base alloys. 2173-2181A

Chromium, Diffusion
Role of back-diffusion studied by computer simulation. 1635-1641A

Chromium base alloys, Composite materials
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Chromium compounds, Composite materials
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Chromium iron, Mechanical properties
Correlation of microstructure and microfracture mechanism of five work rolls. 234-243A

Chromium molybdenum steels, Casting
Cavity sequences in continuously cast billets. I. Analysis of empirical data. 751-761B
Cavity sequences in continuously cast billets. II. Stochastic models. 763-772B
Simulation of convection and macrosegregation in a large steel ingot. 1357-1366A

Chromium molybdenum steels, Mechanical properties
Influence of carbon content on superplastic behavior in Ti- and B-added Cr-Mo steels. 1185-1191A
Creep-rupture behavior of forged, thick section 9Cr-1Mo ferritic steel. 2825-2834A

Chromium molybdenum steels, Welding
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A
Role of gaseous environment and secondary precipitation in microstructural degradation of Cr-Mo steel weldments at high temperatures. 2103-2113A

Chromium molybdenum vanadium steels, Mechanical properties
Creep deformation and fracture of a Cr/Mo/V bolting steel containing selected trace-element additions. 2049-2058A

Chromium steels, Mechanical properties
Liquid impact erosion mechanism and theoretical impact stress analysis in TiN-coated steam turbine blade materials. 961-968A

Cleavage
The effects of pre-dissolved hydrogen on cleavage and grain boundary fracture initiation in metastable beta Ti-3Al-8V-6Cr-4Mo-4Zr. I. 65-79A

Cleavage, Alloying effects
The fatigue and fracture resistance of a Nb-Cr-Ti-Al alloy. 2007-2018A

Cleavage, Composition effects
Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys. 925-939A
High-temperature mechanical behavior of Ti-6Al-4V alloy and TiC_p/Ti-6Al-4V composite. 1569-1578A
Erratum: "Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys". 1686A
Correction to erratum: Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid solution alloys. 3025A

Cleavage, Deformation effects
The influence of rolling practice on notch toughness and texture development in high-strength linepipe. 3045-3054A

Clustering, Processing effects
Settling of multisized clusters of alumina particules in liquid aluminum. 241-247B

Cobalt, Composite materials
A dual composite of WC-Co. 3231-3238A

Cobalt, Reactions (chemical)
Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes. 443-450B
Erratum:"Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes". 831B

Cobalt base alloys, Heat treatment
Development of a heat treatment for a directionally solidified cobalt-base superalloy. 2251-2254A

Cobalt base alloys, Mechanical properties
Effect of alloy preheating on the mechanical properties of as-cast Co-Cr-Mo-C alloys. 611-620A
Liquid impact erosion mechanism and theoretical impact stress analysis in TiN-coated steam turbine blade materials. 961-968A
Modeling solid-particle erosion of ductile alloys. 1763-1774A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Cobalt base alloys, Microstructure
Effect of the primary phase on grain coarsening in undercooled Fe-Co alloys. 2941-2949A

Cobalt base alloys, Phase transformations
Secondary carbide precipitation in a directionally solidified cobalt-base superalloy. 513-520A
Formation of hcp martensite during the isothermal aging of an fcc Co-27Cr-5Mo-0.05C orthopedic implant alloy. 1177-1184A

Cobalt compounds, Mechanical properties
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Cold forging
Analysis and prevention of cracking phenomenon occurring during cold forging of two AISI 1010 steel pulleys. 81-92A

Cold rolling
Effect of cold rolling on the precipitation behavior of δ phase in Inconel 718. 31-40A

Cold rolling, Alloying effects
Effect of cold rolling and annealing on the structure of γ" precipitates in a Ni-18Cr-16Fe-5Nb-3Mo alloy. 1923-1931A

Cold rolling, Processing effects
Influence of cold rolling and strain rate on plastic response of powder metallurgy and chemical vapor deposition rhenium. 2641-2648A

Columnar structure, Diffusion effects
Growth of silicides and interdiffusion in the Mo-Si system. 545-550A

Combustion
Field-activated combustion synthesis of titanium aluminides. 1101-1108A

Compacted graphite iron, Phase transformations
Influence of the Mn content on the kinetics of austempering transformation in compacted graphite cast iron. 2745-2752A

Compacting
Considering particle morphology in a constitutive model for metal powders compaction. 1159-1162A

Compressing, Temperature effects
Influence of the temperature on the plastic deformation in TiAl. 2865-2873A

Computer programs
Characteristics of continuous-galvanizing baths. 144-148B

Computer simulation
Evaluation of the MMCLIFE 3.0 code in predicting crack growth in titanium aluminide composites. 287-299A
Computer simulation of annealing and recovery effects on serrated flow in some Al-Mg alloys. 387-397A
LDV measurements and computation of a turbulent circular jet placed non-concentrically in a confining pipe. 957-967B
Thermodynamics of nucleation and supersaturation for the aluminum-deoxidation reaction in liquid iron. 1065-1074B
Statistical simulation of small fatigue crack nucleation and coalescence in a lamellar TiAl alloy. 1203-1209A
Simulation of convection and macrosegregation in a large steel ingot. 1357-1366A
Role of back-diffusion studied by computer simulation. 1635-1641A
Effect of fiber spatial arrangement on the transverse strength of titanium matrix composites. 2513-2522A
Multicomponent diffusion simulation based on finite elements. 2575-2582A
A three-dimensional cellular automation-finite element model for the prediction of solidification grain structures. 3153-3165A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Contact angle
Theoretical calculation of nucleation temperature and the undercooling behaviors of Fe-Cr alloys studied with the electromagnetic levitation method. 1827-1833A

Continuous cast shapes, Microstructure
Cavity sequences in continuously cast billets. I. Analysis of empirical data. 751-761B
Cavity sequences in continuously cast billets. II. Stochastic models. 763-772B

Continuous casting
Development and calibration of a Karman vortex probe for measurement of molten-steel velocities. 53-59B
Mathematical modeling of copper and brass upcasting. 75-98B
Cavity sequences in continuously cast billets. I. Analysis of empirical data. 751-761B
Cavity sequences in continuously cast billets. II. Stochastic models. 763-772B
Investigation of transient fluid flow and heat transfer in a continuous casting tundish by numerical analysis verified with nonisothermal water model experiments. 979-985B
Three-dimensional modeling of the flow and the interface surface in a continuous casting mold model. 1095-1105B
A three-dimensional cellular automation-finite element model for the prediction of solidification grain structures. 3153-3165A

Continuous casting, Quality control
Erratum: Investigation of inclusion re-entrainment from the steel-slag interface. 149B
The challenge of quality in continuous casting processes. 553-566B
Modeling of inclusion removal in a tundish. 639-654B

Controlled atmospheres
Dry sliding wear behavior of A356-15% SiC_p composites under controlled atmospheric conditions. 2523-2538A

Convection
A thermally coupled flow formulation with microstructural evolution for hypoeutectic cast-iron solidification. 731-744B
Simulation of convection and macrosegregation in a large steel ingot. 1357-1366A

Convection, Field effects
Suppression of channel convection in solidifying Pb-Sn alloys via an applied magnetic field. 1809-1815A

Cooling rate
Relation between cooling rates and microstructures in gravity-die-cast AZ91D disks. 723-729B
Theoretical calculation of nucleation temperature and the undercooling behaviors of Fe-Cr alloys studied with the electromagnetic levitation method. 1827-1833A

Copper, Alloying additive
Fatigue and fracture of porous steels and Cu-infiltrated porous steels. 325-334A

Copper, Alloying elements
Microstructure and mechanical behavior of spray-deposited high-Li Al-Li alloys. 1381-1389A
Experimental determination of mushy zone permeability in aluminum-copper alloys with equiaxed microstructures. 2455-2462A

Copper, Binary systems
The neodymium-gold phase diagram. 1169-1176A
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A
Determination of the critical nucleus size of precipitates using the macroscopic composition gradient method. 2783-2789A

Copper, Casting
Mathematical modeling of copper and brass upcasting. 75-98B

Copper, Coating
Kinetics and mechanism of electroless copper deposition at moderate-to-high copper ion and low-to-moderate formaldehyde concentrations. 223-229B

Copper, Coatings
Copper coatings for minimization of retention and permeation of implanted tritium in aluminum alloy 6061. 2191-2199A

Copper, Composite materials
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A
Plasticity of continuous fiber-reinforced metals. 1843-1866A
Elastic phase-strain distribution in a particulate-reinforced metal-matrix composite deforming by slip or creep. 2989-2997A

Copper, Corrosion
Electrochemical interfacial phenomena under microgravity. II. Numerical analysis of the rate of ionic mass transfer accompanying anodic copper dissolution. 779-790B

Copper, Diffusion
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A
Evaluation of the methods for calculating the concentration-dependent diffusivity in binary systems. 2605-2610A

Copper, Directional solidification
Pore nucleation in solidifying high-purity copper. 2449-2453A

Copper, Extraction
Simulation of the removal of arsenic during the roasting of copper concentrate. 393-401B
Thermodynamics of the miscibility gap in the Ag-Se system. 589-595B
The effect of Al_2O_3 on liquidus temperatures of fayalite slags. 597-605B
A thermodynamic database for copper smelting and converting. 661-669B
The effect of MgO on liquidus temperatures of fayalite slags. 1017-1026B

Copper, Mechanical properties
Bismuth embrittlement of [011] twist boundaries in copper bicrystals. 483-485A
Influence of grain size and stacking-fault energy on deformation twinning in fcc metals. 1223-1233A

Copper, Microstructure
Use of microstructural statistics in predicting polycrystalline material properties. 969-979A

Copper, Powder technology
Shock-induced reaction synthesis of isomorphous (Cu-Ni) and immiscible (Cu-Nb) compounds. 1367-1379A
A study on laser sintering of Fe-Cu powder compacts. 2229-2235A

Copper, Refining
A pilot-scale trial of an improved galvanic deoxidation process for refining molten copper. 307-321B

Copper, Solubility
Electrochemical interfacial phenomena under microgravity. I. Anodic dissolution of copper in drop shaft. 99-105B

Copper base alloys, Composite materials
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. I. Theoretical analysis. 361-367B
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. II. Experiments. 369-373B
Plasticity of continuous fiber-reinforced metals. 1843-1866A

Copper base alloys, Diffusion
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A

Copper base alloys, Mechanical properties
Pseudoelastic behavior of a CuAlNi single crystal under uniaxial loading. 1933-1943A

Copper base alloys, Phase transformations
Stabilization and two-way shape memory effect in Cu-Al-Ni single crystals. 493-499A
Microstructure and martensitic transformations in a dual-phase α/β Cu-Zn alloy. 729-739A

Copper base alloys, Phases (state of matter)
Orientation relationship between β-Mn and $L2_1$ matrix in a Cu_2MnAl alloy. 1705-1716A

Copper base alloys, Powder technology
Shock-induced reaction synthesis of isomorphous (Cu-Ni) and immiscible (Cu-Nb) compounds. 1367-1379A

Copper mattes, Reactions (chemical)
A thermodynamic database for copper smelting and converting. 661-669B
Thermodynamic modeling of lead distribution among matte, slag, and liquid copper. 1033-1044B

Corrosion environments
The role of heat treating on the sour gas resistance of an X-80 steel for oil and gas transport. 2419-2428A

Corrosion resistance, Coating effects
Protection of beryllium metal against microbial influenced corrosion using silane self-assembled monolayers. 2129-2134A

Corrosion resistance, Deformation effects
Improvement of the resistance to stress corrosion cracking in austenitic stainless steels by cyclic prestraining. 1327-1331A

Corrosive wear, Composition effects
Synergistic effects of wear and corrosion for Al_2O_3 particulate-reinforced 6061 aluminum matrix composites. 643-651A

Crack closure
Discussion of "Reconsideration of error in the analysis of the wake dislocation problem" and authors' response. 1452-1459A

Crack initiation
The effects of pre-dissolved hydrogen on cleavage and grain boundary fracture initiation in metastable beta Ti-3Al-8V-6Cr-4Mo-4Zr. I. 65-79A
Effect of in situ material properties on fatigue damage modes in titanium matrix composites. 255-266A
A new hot-tearing criterion. 449-455A
Low-cycle fatigue crack initiation and break in strain-life curve of Al-Li 8090 alloy. 887-890A
An investigation of the fatigue and fracture behavior of a Nb-12Al-44Ti-1.5Mo intermetallic alloy. 1025-1038A
Statistical simulation of small fatigue crack nucleation and coalescence in a lamellar TiAl alloy. 1203-1209A
Hydrogen embrittlement, grain boundary segregation, and stress corrosion cracking of alloy X-750 in low- and high-temperature water. 1579-1596A
Mechanisms for fracture and fatigue-crack propagation in a bulk metallic glass. 1739-1753A
Eutectic cell wall morphology and tensile embrittlement in ferritic spheroidal graphite cast iron. 1775-1784A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Crack initiation, Alloying effects
The effects of Mg microadditon on the mechanical behavior and fracture mechanism of MAR-M247 superalloy at elevated temperatures. 551-561A

Crack initiation, Coating effects
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A

Crack initiation, Composition effects
Effect of residual magnesium content on thermal fatigue cracking behavior of high-silicon spheroidal graphite cast iron. 1549-1558A

Crack initiation, Deformation effects
Analysis and prevention of cracking phenomenon occurring during cold forging of two AISI 1010 steel pulleys. 81-92A

Crack initiation, Microstructural effects
Microstructural effects on high-cycle fatigue-crack initiation in A356.2 casting alloy. 2659-2666A

Crack initiation, Processing effects
The effect of shot particles on the fatigue of Kaowool fiber-reinforced 339 aluminum. 195-201A

Crack initiation, Welding effects
The thermal fatigue behavior of the combustor alloys IN 617 and Haynes 230 before and after welding. 981-989A

Crack propagation
The equilibrium concentration of hydrogen atoms ahead of a mixed mode I-mode III crack tip in single crystal iron. 155-159A
Effect of in situ material properties on fatigue damage modes in titanium matrix composites. 255-266A
Fatigue crack growth in Ti-matrix composites with spatially varied interfaces. 267-275A
Elastic shielding during fatigue-crack growth of titanium matrix composites. 277-286A
Evaluation of the MMCLIFE 3.0 code in predicting crack growth in titanium aluminide composites. 287-299A
The influence of solid-state and liquid-phase bonding on fatigue at Al/Al_2O_3 interfaces. 763-769A
An investigation of the fatigue and fracture behavior of a Nb-12Al-44Ti-1.5Mo intermetallic alloy. 1025-1038A
An intergranular creep crack growth model based on grain boundary sliding. 1039-1045A
Growth of small fatigue cracks in PH 13-8 Mo stainless steel. 1289-1300A
Discussion of "Reconsideration of error in the analysis of the wake dislocation problem" and authors' response. 1452-1459A
Hydrogen embrittlement, grain boundary segregation, and stress corrosion cracking of alloy X-750 in low- and high-temperature water. 1579-1596A
Mechanisms for fracture and fatigue-crack propagation in a bulk metallic glass. 1739-1753A
The debonding and fracture of Si particles during the fatigue of a cast Al-Si alloy. 3079-3088A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Crack propagation, Alloying effects
The effects of Mg microadditon on the mechanical behavior and fracture mechanism of MAR-M247 superalloy at elevated temperatures. 551-561A
Microalloying of C, Ni, and Ce in an advanced Al-Zn-Mg-Cu alloy. 1017-1024A
The fatigue and fracture resistance of a Nb-Cr-Ti-Al alloy. 2007-2018A
Creep deformation and fracture of a Cr/Mo/V bolting steel containing selected trace-element additions. 2049-2058A
Properties of the $Ir_{85}Nb_{15}$ two-phase refractory superalloys with nickel additions. 2629-2639A

Crack propagation, Composite materials
Effect of residual magnesium content on thermal fatigue cracking behavior of high-silicon spheroidal graphite cast iron. 1549-1558A

Crack propagation, Composition effects
Fatigue-crack propagation behavior of ductile/brittle laminated composites. 633-642A
Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys. 925-939A
Erratum: "Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys". 1686A
Correction to erratum: Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid solution alloys. 3025A

Crack propagation, Deformation effects
Analysis and prevention of cracking phenomenon occurring during cold forging of two AISI 1010 steel pulleys. 81-92A

Crack propagation, Heating effects
Fatigue and fracture of porous steels and Cu-infiltrated porous steels. 325-334A
The role of heat treating on the sour gas resistance of an X-80 steel for oil and gas transport. 2419-2428A

Crack propagation, High temperature effects
Observation of fatigue damage process in SiC fiber-reinforced Ti-15-3 composite at high temperature. 221-229A
Fracture and fatigue behavior of sintered steel at elevated temperatures. II. Fatigue crack propagation. 2895-2904A

Crack propagation, Microstructural effects
The effect of microstructure on fracture toughness and fatigue crack growth behavior in γ-titanium aluminide based intermetallics. 563-577A

Crack propagation, Processing effects
Closure-affected fatigue crack propagation behaviors of powder metallurgy-processed Al-Li alloys in various environments. 2097-2102A
The effect of solidification rate on the growth of small fatigue cracks in a cast 319-type aluminum alloy. 3055-3068A

Crack propagation, Welding effects
The thermal fatigue behavior of the combustor alloys IN 617 and Haynes 230 before and after welding. 981-989A

Cracking (fracturing), Welding effects
Hot cracking susceptibility of fillers 52 and 82 in alloy 690 welding. 417-426A

Creep (materials)
An intergranular creep crack growth model based on grain boundary sliding. 1039-1045A
Deformed microstructure of the single-crystal superalloy NASAIR 100 at 1050°C. 2843-2852A

Creep (materials), High temperature effects
High-temperature deformation behavior of an Al-8.4Fe-3.6Ce dispersion-strengthened material. 371-376A

Creep (materials), Microstructural effects
Time-dependent twinning during ambient temperature compression creep of alpha Ti-0.4Mn alloy. 1675-1679A

Creep (materials), Temperature effects
Indentation power-law creep of high-purity indium. 601-610A
Elastic phase-strain distribution in a particulate-reinforced metal-matrix composite deforming by slip or creep. 2989-2997A

Creep rate
Transverse creep of SiC/Ti-6Al-4V fiber-reinforced metal matrix composites. 301-306A
Fundamental aspects of creep in metal matrix composites. 315-324A
Time-dependent deformation behavior of near-eutectic 60Sn-40Pb solder. 1301-1313A
Effect of matrix hardness on the creep properties of a 12CrMoVNb steel. 2331-2339A

Creep rate, Composition effects
Solid solution creep behavior of Sn-xBi alloys. 115-122A
Monkman-Grant analysis of creep fracture in dispersion-strengthened and particulate-reinforced aluminum. 829-838A

Creep rate, Microstructural effects
The creep behavior of Ti-Al-Nb O+bcc orthorhombic alloys. II. 2349-2367A

Creep rupture strength
Effect of matrix hardness on the creep properties of a 12CrMoVNb steel. 2331-2339A

Creep rupture strength, Alloying effects
Effect of small amounts of nitrogen on properties of a Ni-based superalloy. 1755-1761A

Creep rupture strength, Heating effects
Influence of secondary precipitates and crystallographic orientation on the strength of single crystals of a Ni-based superalloy. 1249-1259A
Creep-rupture behavior of forged, thick section 9Cr-1Mo ferritic steel. 2825-2834A

Creep strength
Transverse creep of SiC/Ti-6Al-4V fiber-reinforced metal matrix composites. 301-306A
Time-dependent deformation behavior of near-eutectic 60Sn-40Pb solder. 1301-1313A

Creep strength, Alloying effects
Creep deformation and fracture of a Cr/Mo/V bolting steel containing selected trace-element additions. 2049-2058A

Creep strength, Composition effects
High-temperature mechanical behavior of Ti-6Al-4V alloy and TiC_p/Ti-6Al-4V composite. 1569-1578A

Creep strength, High temperature effects
Creep behavior of an AZ91 magnesium alloy reinforced with alumina fibers. 2059-2066A

Criteria
A new hot-tearing criterion. 449-455A

Critical temperature
Bainite transformation temperatures in high-silicon steels. 909-916A
Discussion of "Superheating behavior of NiAl". 1675A
Superheating behavior of NiAl: Authors' reply. 3265A

Critical temperature, Heating effects
Stabilization and two-way shape memory effect in Cu-Al-Ni single crystals. 493-499A

Crystal structure
Microstructure and martensitic transformations in a dual-phase α/β Cu-Zn alloy. 729-739A

Crystallization, Processing effects
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the $\alpha+\gamma$-phase field. 751-761A

Curie temperature
Toward a probe for velocity measurement in molten metals at high temperatures. 623-630B

Current density
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A

Current density, Shape effects
The influence of the initial shape and position of an anode and the curvature of the aluminum on the current distribution in prebaked aluminum cells. 341-348B

Cutting tools, Coating
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Cyclic loads
Microstructure and mechanisms of cyclic deformation in aluminum single crystals at 77K. II. Edge dislocation dipole heights. 777-779A
Mixed-mode hydrogen-assisted cracking of high-strength steel: the role of cyclic load history. 1882-1885A

Cyclic loads, Composition effects
Mechanical behavior of Al-Li-SiC composites. II. Cyclic deformation. 857-867A

Cylinder heads, Mechanical properties
Modeling high-temperature stress-strain behavior of cast aluminum alloys. 133-146A

Cylinders, Heat treatment
Analysis of temperature and microstructure in the quenching of steel cylinders. 815-822B

Damage
Application of image processing for simulation of mechanical response of multi-length scale microstructures of engineering alloys. 2369-2381A

Damage, Composition effects
Mechanical behavior of Al-Li/SiC composites. III. Micromechanical modeling. 869-878A

Damage, High temperature effects
Observation of fatigue damage process in SiC fiber-reinforced Ti-15-3 composite at high temperature. 221-229A

Damage tolerance, Heating effects
Creep-rupture behavior of forged, thick section 9Cr-1Mo ferritic steel. 2825-2834A

Damping capacity
Damping behavior of foamed aluminum. 771-776A

Damping capacity, Microstructural effects
Effect of deformation on the damping capacity in an Fe-23% Mn alloy. 667-670A

Debonding
The debonding and fracture of Si particles during the fatigue of a cast Al-Si alloy. 3079-3088A

Decarburizing, Quality control
Mathematical model for nitrogen control in oxygen steelmaking. 945-956B

Decontamination
Selective removal of iron contaminations from zinc-chloride melts by cementation with zinc. 607-611B

Deep drawing
Atom probe and transmission electron microscopy investigations of heavily drawn pearlitic steel wire. 717-727A

Deep drawing, Heating effects
Aluminum nitride precipitation and texture development in batch-annealed bake-hardening steel. 1663-1673A

Defects
The effect of shot particles on the fatigue of Kaowool fiber-reinforced 339 aluminum. 195-201A

Deformation
Mathematical modeling of the hot-deformation behavior of superalloy IN718. 2701-2712A

Deformation, Alloying effects
Creep deformation and fracture of a Cr/Mo/V bolting steel containing selected trace-element additions. 2049-2058A

Deformation, Heating effects
Effect of surface carburization on dynamic deformation and fracture of tungsten heavy alloys. 2027-2035A

Deformation mechanisms
Fundamental aspects of creep in metal matrix composites. 315-324A
High-temperature deformation behavior of an Al-8.4Fe-3.6Ce dispersion-strengthened material. 371-376A
Microstructure and mechanisms of cyclic deformation in aluminum single crystals at 77K. II. Edge dislocation dipole heights. 777-779A
Low-cycle fatigue crack initiation and break in strain-life curve of Al-Li 8090 alloy. 887-890A

Slip transfer and dislocation nucleation processes in multiphase ordered Ni-Fe-Al alloys. 991-1001A
An investigation of the fatigue and fracture behavior of a Nb-12Al-44Ti-1.5Mo intermetallic alloy. 1025-1038A
Influence of grain size and stacking-fault energy on deformation twinning in fcc metals. 1223-1233A
Deformation behavior of silicon. 1465-1479A
Time-dependent twinning during ambient temperature compression creep of alpha Ti-0.4Mn alloy. 1675-1679A
The creep behavior of Ti-Al-Nb O+bcc orthorhombic alloys. II. 2349-2367A
Deformed microstructure of the single-crystal superalloy NASAIR 100 at 1050°C. 2843-2852A

Deformation mechanisms, Composition effects
Solid solution creep behavior of Sn-xBi alloys. 115-122A
Deformation behavior of dilute SnBi (0.5 to 6 at.%) solid solutions. 123-132A

Deformation mechanisms, Temperature effects
Influence of the temperature on the plastic deformation in TiAl. 2865-2873A
Elastic phase-strain distribution in a particulate-reinforced metal-matrix composite deforming by slip or creep. 2989-2997A

Degradation
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A

Degradation, Composition effects
Degradation of residual strength in SCS-6/Ti-15-3 due to fully reversed fatigue. 307-313A

Dendritic structure
Modeling the fluid-flow-induced stress and collapse in a dendritic network. 287-293B
Numerical calculation of the permeability in a dendritic mushy zone. 613-622B
Erratum to "Numerical calculation of the permeability in a dendritic mushy zone". 1107B
Dendrite growth processes of silicon and germanium from highly undercooled melts. 1333-1339A
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A
Cell/dendrite distribution in directionally solidified hypoeutectic Pb-Sb alloys. 2159-2165A
Macrosegregation caused by thermosolutal convection during directional soldification of Pb-Sb alloys. 2167-2171A
Experimental determination of mushy zone permeability in aluminum-copper alloys with equiaxed microstructures. 2455-2462A
Cellular/dendritic array tip morphology during directional solidification of Pb-5.8 wt.% Sb alloy. 2463-2472A
Microstructural effects on high-cycle fatigue-crack initiation in A356.2 casting alloy. 2659-2666A

Dendritic structure, Cooling effects
Discussion of "Dendrite growth processes of silicon and germanium from highly undercooled melts" and authors' reply. 3011-3016A

Dendritic structure, Deformation effects
Deformed microstructure of the single-crystal superalloy NASAIR 100 at 1050°C. 2843-2852A

Dendritic structure, Field effects
Suppression of channel convection in solidifying Pb-Sn alloys via an applied magnetic field. 1809-1815A
Dendritic growth tip velocities and radii of curvature in microgravity. 3177-3190A

Dendritic structure, Processing effects
Shock-induced reaction synthesis of isomorphous (Cu-Ni) and immiscible (Cu-Nb) compounds. 1367-1379A

Densification
Densification during the supersolidus liquid-phase sintering of nickel-based prealloyed powder mixtures. 2201-2208A
A study on laser sintering of Fe-Cu powder compacts. 2229-2235A
Densification and shape distortion in liquid-phase sintering. 3211-3217A

Density, Processing effects
High-energy x-ray computed tomography of the progression of the solidification front in pure aluminum. 1403-1409A

Deoxidizing
Quantitative evaluation of inclusion in deoxidation of Fe-10 mass% Ni alloy with Si, T, Al, Zr, and Ce. 249-257B
Analysis of size distributions of primary oxide inclusions in Fe-10 mass% Ni-M (M=Si, Ti, Al, Zr, and Ce) alloy. 259-270B
A pilot-scale trial of an improved galvanic deoxidation process for refining molten copper. 307-321B
Thermodynamics of yttrium and oxygen in molten zirconium. 352-354B
Thermodynamics of nucleation and supersaturation for the aluminum-deoxidation reaction in liquid iron. 1065-1074B

Dephosphorizing
Activity coefficient of nickel oxide in BaO-based slags. 143-144B

Desulfurizing
Activity coefficient of nickel oxide in BaO-based slags. 143-144B

Diamond pyramid hardness, Coating effects
Nickel monoaluminide coating on ultralow-carbon steel by reactive sintering. 1605-1612A

Diamond pyramid hardness, Heating effects
Evaluation of halide-activated pack boriding of Inconel 722. 670-675A

Diamond pyramid hardness, Microstructural effects
$\beta \rightarrow \alpha''$ and $\beta \rightarrow \omega$ transformations in Ti-Os alloys. 231-233A

Diffractography
Transmission x-ray diffraction of single-crystal nickel-base superalloys. 1880-1882A
Prediction and characterization of variant electron diffraction patterns for γ' and δ precipitates in an Inconel 718 alloy. 2297-2303A

Diffusion ccatings, Oxidation
Oxidation behavior of niobium aluminide intermetallics protected by aluminide and silicide diffusion coatings. 495-504B

Diffusivity
Multicomponent diffusion simulation based on finite elements. 2575-2582A
Evaluation of the methods for calculating the concentration-dependent diffusivity in binary systems. 2605-2610A

Diffusivity, Heating effects
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A
Diffusional reactions during processing of Timetal 21S/Al_2O_3 composites. 1437-1447A

Direct chill casting
A mathematical model of the heat and fluid flows in direct-chill casting of aluminum sheet ingots and billets. 119-133B
A mathematical model for surface segregation in aluminum direct chill casting. 135-142B

Direct reduced iron, Reactions (chemical)
Mathematical modeling of pneumatic char injection in a direct reduction rotary kiln. 969-977B

Directionally solidified eutectics, Casting
The heat-transfer coefficient during the unidirectional solidification of an Al-Si alloy casting. 473-482B

Directionally solidified eutectics, Heat treatment
Development of a heat treatment for a directionally solidified cobalt-base superalloy. 2251-2254A

Directionally solidified eutectics, Mechanical properties
Slip transfer and dislocation nucleation processes in multiphase ordered Ni-Fe-Al alloys. 991-1001A
Deformation and fracture behavior of a directionally solidified β/γ' Ni-30 at.% Al alloy. 1003-1015A
Effect of small amounts of nitrogen on properties of a Ni-based superalloy. 1755-1761A
Influence of calcium addition on the superplastic-like behavior of extruded Al-Al_3Ni eutectic alloy. 2258-2260A
Microstructural effects on high-cycle fatigue-crack initiation in A356.2 casting alloy. 2659-2666A

Directionally solidified eutectics, Microstructure
Cell/dendrite distribution in directionally solidified hypoeutectic Pb-Sb alloys. 2159-2165A
Macrosegregation caused by thermosolutal convection during directional soldification of Pb-Sb alloys. 2167-2171A

Directionally solidified eutectics, Phase transformations
Secondary carbide precipitation in a directionally solidified cobalt-base superalloy. 513-520A

Disks, Casting
Relation between cooling rates and microstructures in gravity-die-cast AZ91D disks. 723-729B

Dislocation density
Deformation behavior of silicon. 1465-1479A

Dislocation loops
A general numerical method to solve for dislocation configurations. 2073-2087A

Dislocation mobility
Deformation behavior of silicon. 1465-1479A

Dislocation mobility, Composition effects
Solid solution creep behavior of Sn-xBi alloys. 115-122A
Deformation behavior of dilute SnBi (0.5 to 6 at.%) solid solutions. 123-132A

Dislocation mobility, Temperature effects
Influence of the temperature on the plastic deformation in TiAl. 2865-2873A

Dislocations
Slip transfer and dislocation nucleation processes in multiphase ordered Ni-Fe-Al alloys. 991-1001A

Dislocations, Deformation effects
Microstructure and mechanisms of cyclic deformation in aluminum single crystals at 77K. II. Edge dislocation dipole heights. 777-779A

Dislocations, kink bands, and room-temperature plasticity of Ti_3SiC_2. 1727-1738A

Dispersion hardening alloys, Crystal growth
Recrystallization activation energy in mechanically alloyed oxide-dispersion-strengthened metals measured by differential scanning calorimetry. 1885-1887A

Dispersion hardening alloys, Mechanical properties
High-temperature deformation behavior of an Al-8.4Fe-3.6Ce dispersion-strengthened material. 371-376A
Monkman-Grant analysis of creep fracture in dispersion-strengthened and particulate-reinforced aluminum. 829-838A

Dispersions
Dispersion of fine primary inclusions of MgO and ZrO_2 in Fe-10 mass% Ni alloy and the solidification structure. 1053-1063B

Dissimilar materials, Bonding
The influence of solid-state and liquid-phase bonding on fatigue at Al/Al_2O_3 interfaces. 763-769A

Dissimilar metals, Bonding
Bulk-alloy microstructural analogues for transient liquid-phase bonds in the NiAl/Cu/Ni system. 3111-3124A

Distortion, Processing effects
Application of percolation theory in predicting shape distortion during liquid-phase sintering. 2209-2220A
Densification and shape distortion in liquid-phase sintering. 3211-3217A

Drawability
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A

Drawability, Heating effects
Aluminum nitride precipitation and texture development in batch-annealed bake-hardening steel. 1663-1673A

Drawing
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A

Dual phase steels, Metal working
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A

Ductile brittle transition
Deformation and fracture behavior of a directionally solidified β/γ' Ni-30 at.% Al alloy. 1003-1015A

Ductile fracture
The influence of tensile stress states on the failure of HY-100 steel. 2835-2842A

Ductile fracture, Composition effects
High-temperature mechanical behavior of Ti-6Al-4V alloy and TiC_p/Ti-6Al-4V composite. 1569-1578A

Ductility
Deformation and fracture behavior of a directionally solidified β/γ' Ni-30 at.% Al alloy. 1003-1015A
An investigation of the fatigue and fracture behavior of a Nb-12Al-44Ti-1.5Mo intermetallic alloy. 1025-1038A
On the occurrence of dynamic strain aging in near-alpha alloy Ti-5.8Al-4Sn-3.5Zr-0.7Nb-0.5Mo-0.35Si. 2547-2549A
The influence of tensile stress states on the failure of HY-100 steel. 2835-2842A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Ductility, Alloying effects
The effects of Mg microadditon on the mechanical behavior and fracture mechanism of MAR-M247 superalloy at elevated temperatures. 551-561A
The effect of Sr and Fe additions on the microstructure and mechanical properties of a direct squeeze cast Al-7Si-0.3Mg alloy. 1341-1356A
Properties of the $Ir_{85}Nb_{15}$ two-phase refractory superalloys with nickel additions. 2629-2639A

Ductility, Composition effects
Microstructure and mechanical behavior of spray-deposited high-Li Al-Li alloys. 1381-1389A
The effect of Mg on the microstructure and mechanical behavior of Al-Si-Mg casting alloys. 2611-2618A

Ductility, Cryogenic effects
Tensile behavior of rapidly solidified Al-Li-Zr and Al-Li-Cu-Mg-Zr alloys at 293 and 77K. 2254-2258A

Ductility, Deformation effects
Microstructures and tensile properties of an Al-12 wt.% Si alloy produced by reciprocating extrusion. 2503-2512A

Ductility, Heating effects
Effect of alloy preheating on the mechanical properties of as-cast Co-Cr-Mo-C alloys. 611-620A

Ductility, Microstructural effects
Slip transfer and dislocation nucleation processes in multiphase ordered Ni-Fe-Al alloys. 991-1001A

Ductility, Stress effects
Modeling and measurement of the notched strength of gamma titanium aluminides under monotonic loading. 949-959A

Duplex stainless steels, Welding
A process model for the heat-affected zone microstructure evolution in duplex stainless steel weldments. I. The model. 2915-2929A

Dynamic mechanical properties, Microstructural effects
Effect of size and shape of tungsten particles on dynamic torsional properties in tungsten heavy alloys. 1261-1273A

Economics
Sustainability: The materials role. 895-908A

Edge dislocations
A general numerical method to solve for dislocation configurations. 2073-2087A

Elastic anisotropy
Prediction of yield surfaces of textured sheet metals. 377-386A
Bauschinger effect and multiaxial yield behavior of stress-reversed mild steel. 3069-3078A

Elastic anisotropy, Deformation effects
The influence of rolling practice on notch toughness and texture development in high-strength linepipe. 3045-3054A

Elastic anisotropy, Microstructural effects
Precipitate-induced plastic anisotropy: explicit solutions of the plastic anisotropy due to plate-shaped precipitates. 1283-1288A

Elastic constants, Microstructural effects
Use of microstructural statistics in predicting polycrystalline material properties. 969-979A

Electric arcs
Improvement of hardness and resistance of oxidation by electric arc alloying on ferritic steels. 3263-3265A

Electric circuits, Reactions (chemical)
Thermodynamic modeling of the palladium-lead-tin system. 5-18A

Electric connectors, Soldering
Time-dependent deformation behavior of near-eutectic 60Sn-40Pb solder. 1301-1313A

Electric contacts, Fabrication
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A

Electroless copper plating
Kinetics and mechanism of electroless copper deposition at moderate-to-high copper ion and low-to-moderate formaldehyde concentrations. 223-229B

Electroless plating
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A

Electrolytic cells, Design
A pilot-scale trial of an improved galvanic deoxidation process for refining molten copper. 307-321B
The influence of the initial shape and position of an anode and the curvature of the aluminum on the current distribution in prebaked aluminum cells. 341-348B

Electromagnetic fields
A mathematical model for the dynamic behavior of melts subjected to electromagnetic forces. II. Measurement of surface waves and comparison with predictions of the mathematical model. 331-339B

Electromagnetic induction
A mathematical model for the dynamic behavior of melts subjected to electromagnetic forces. II. Measurement of surface waves and comparison with predictions of the mathematical model. 331-339B

Electromagnetic stirring
A mathematical model for the dynamic behavior of melts subjected to electromagnetic forces. II. Measurement of surface waves and comparison with predictions of the mathematical model. 331-339B

Electrometallurgy
Kinetics and mechanism of electroless copper deposition at moderate-to-high copper ion and low-to-moderate formaldehyde concentrations. 223-229B
Selective removal of iron contaminations from zinc-chloride melts by cementation with zinc. 607-611B

Electron beam hardening
Surface hardening of a gray cast iron used for a diesel engine cylinder block using high-energy electron beam irradiation. 1211-1221A

Electron beam heating
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Electron beam processing
Mechanism of spallation in platinum aluminide/electron beam physical vapor-deposited thermal barrier coatings. 427-435A
Mathematical modeling of a melt pool driven by an electron beam. 515-525B
Effect of flux addition on the microstructure and hardness of TiC-reinforced ferrous surface composite layers fabricated by high-energy electron beam irradiation. 3131-3141A

Electron beam welding
Fusion zone microstructure and porosity in electron beam welds of an α+β titanium alloy. 789-798A
The role of phase transformation in electron-beam welding of TiAl-based alloys. 1717-1726A
Comparison of three different techniques for measuring the residual stresses in an electron beam-welded plate of Waspaloy. 1797-1808A

Electron beams
Microstructure of TiB_2/carbon steel surface-alloyed materials fabricated by high-energy electron beam irradiation. 3143-3151A

Electron diffraction
Prediction and characterization of variant electron diffraction patterns for γ" and δ precipitates in an Inconel 718 alloy. 2297-2303A

Electronic devices, Soldering
Investigation of the phase equilibria in the Sn-Bi-In alloy system. 1503-1515A

Electroplates, Mechanical properties
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A

Electroplates, Microstructure
Studies of the morphology of the Al-rich interfacial layer formed during the hot dip galvanizing of steel sheet. 681-695A

Electroplating
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A

Electrowinning
Strategies for optimal operation of the tellurium electrowinning process. 5-13B

Elongated structure, Heating effects
The microstructural evolution in Ti-Al-Nb O+bcc orthorhombic alloys. I. 2305-2323A

Elongation
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Elongation, Alloying effects
Influence of carbon content on superplastic behavior in Ti- and B-added Cr-Mo steels. 1185-1191A

Elongation, Composition effects
High-temperature mechanical behavior of Ti-6Al-4V alloy and TiC_p/Ti-6Al-4V composite. 1569-1578A

Elongation, Deformation effects
Microstructures and tensile properties of an Al-12 wt.% Si alloy produced by reciprocating extrusion. 2503-2512A

Elongation, Microstructural effects
A fine γ'+α cellular structure in Fe-37.3 wt.% Ni-3.6 wt.% Al-3.3 wt.% Ti-0.2 wt.% C and its influence on high-temperature tensile properties. 1495-1501A
Microstructure-property relations in as-extruded ultrahigh-carbon steels. 1559-1568A

Embrittlement
Eutectic cell wall morphology and tensile embrittlement in ferritic spheroidal graphite cast iron. 1775-1784A

Embrittlement, Alloying effects
Bismuth embrittlement of [011] twist boundaries in copper bicrystals. 483-485A

Embrittlement, Microstructural effects
A fine γ'+α cellular structure in Fe-37.3 wt.% Ni-3.6 wt.% Al-3.3 wt.% Ti-0.2 wt.% C and its influence on high-temperature tensile properties. 1495-1501A

Energy conservation
Sustainability: The materials role. 895-908A

Engine blocks, Heat treatment
Surface hardening of a gray cast iron used for a diesel engine cylinder block using high-energy electron beam irradiation. 1211-1221A

Enthalpy
A thermodynamic interpretation of the size-ratio limits for Laves phase formation. 1449-1452A
A self-consistent model for predicting interaction parameters in multicomponent alloys. 3099-3102A

Epitaxial growth
Rapid epitaxial growth of conducting and insulating III-V compounds on (001), (110), (111)A, and (311)B surfaces by hydride vapour phase epitaxy. 1047-1051A

Epitaxy
Rapid epitaxial growth of conducting and insulating III-V compounds on (001), (110), (111)A, and (311)B surfaces by hydride vapour phase epitaxy. 1047-1051A

Equal channel angular extrusion
Finite-element modeling of nonisothermal equal-channel angular extrusion. 1391-1402A
Workability of commercial-purity titanium and 4340 steel during equal channel angular extrusion at cold-working temperatures. 1425-1435A

Equal channel angular extrusion, Microstructural effects
Hot working of Ti-6Al-4V via equal channel angular extrusion. 2473-2481A

Equal channel angular pressing
Influence of pressing speed on microstructural development in equal-channel angular pressing. 1989-1997A

Equiaxed structure
Experimental determination of mushy zone permeability in aluminum-copper alloys with equiaxed microstructures. 2455-2462A
Hot working of Ti-6Al-4V via equal channel angular extrusion. 2473-2481A

Erosion
Erosion of SS41 steel by sand blasting. 941-948A
Modeling solid-particle erosion of ductile alloys. 1763-1774A

Erosion resistance, Coating effects
Liquid impact erosion mechanism and theoretical impact stress analysis in TiN-coated steam turbine blade materials. 961-968A

Eutectoid reactions
Thermodynamic prediction of the eutectoid transformation temperatures of low-alloy steels. 2325-2330A

Explosions
Triggering steam explosions of single drops of a molten ferrosilicon alloy with a simple encapsulated mechanical impactor. 1083-1088B

Explosive compacting
Hot explosive compaction of Mo-Ti alloys. 2483-2489A

Extrusions, Mechanical properties
Microstructure-property relations in as-extruded ultrahigh-carbon steels. 1559-1568A
Microstructures and tensile properties of an Al-12 wt.% Si alloy produced by reciprocating extrusion. 2503-2512A

Extrusions, Welding
A process model for the heat-affected zone microstructure evolution in Al-Zn-Mg weldments. 2667-2677A

Failure analysis
The influence of tensile stress states on the failure of HY-100 steel. 2835-2842A

Fatigue failure
Effect of in situ material properties on fatigue damage modes in titanium matrix composites. 255-266A
Fatigue crack growth in Ti-matrix composites with spatially varied interfaces. 267-275A
Elastic shielding during fatigue-crack growth of titanium matrix composites. 277-286A
Evaluation of the MMCLIFE 3.0 code in predicting crack growth in titanium aluminide composites. 287-299A
The influence of solid-state and liquid-phase bonding on fatigue at Al/Al_2O_3 interfaces. 763-769A
Low-cycle fatigue crack initiation and break in strain-life curve of Al-Li 8090 alloy. 887-890A
An investigation of the fatigue and fracture behavior of a Nb-12Al-44Ti-1.5Mo intermetallic alloy. 1025-1038A
Statistical simulation of small fatigue crack nucleation and coalescence in a lamellar TiAl alloy. 1203-1209A
Growth of small fatigue cracks in PH 13-8 Mo stainless steel. 1289-1300A
Discussion of "Reconsideration of error in the analysis of the wake dislocation problem" and authors' response. 1452-1459A
Mechanisms for fracture and fatigue-crack propagation in a bulk metallic glass. 1739-1753A
Mixed-mode hydrogen-assisted cracking of high-strength steel: the role of cyclic load history. 1882-1885A
The debonding and fracture of Si particles during the fatigue of a cast Al-Si alloy. 3079-3088A

Fatigue failure, Composite materials
Effect of residual magnesium content on thermal fatigue cracking behavior of high-silicon spheroidal graphite cast iron. 1549-1558A

Fatigue failure, Composition effects
Fatigue-crack propagation behavior of ductile/brittle laminated composites. 633-642A
Mechanical behavior of Al-Li-SiC composites. II. Cyclic deformation. 857-867A
Fatigue in selectively fiber-reinforced titanium matrix composites. 2237-2248A

Fatigue failure, High temperature effects
Observation of fatigue damage process in SiC fiber-reinforced Ti-15-3 composite at high temperature. 221-229A
Fracture and fatigue behavior of sintered steel at elevated temperatures. I. Fracture toughness. 2885-2893A
Fracture and fatigue behavior of sintered steel at elevated temperatures. II. Fatigue crack propagation. 2895-2904A

Fatigue failure, Microstructural effects
The effect of microstructure on fracture toughness and fatigue crack growth behavior in γ-titanium aluminide based intermetallics. 563-577A
Microstructural effects on high-cycle fatigue-crack initiation in A356.2 casting alloy. 2659-2666A

Fatigue failure, Processing effects
The effect of shot particles on the fatigue of Kaowool fiber-reinforced 339 aluminum. 195-201A
Closure-affected fatigue crack propagation behaviors of powder metallurgy-processed Al-Li alloys in various environments. 2097-2102A
The effect of solidification rate on the growth of small fatigue cracks in a cast 319-type aluminum alloy. 3055-3068A

Fatigue life
Elastic shielding during fatigue-crack growth of titanium matrix composites. 277-286A
Evaluation of the MMCLIFE 3.0 code in predicting crack growth in titanium aluminide composites. 287-299A
Statistical simulation of small fatigue crack nucleation and coalescence in a lamellar TiAl alloy. 1203-1209A
Growth of small fatigue cracks in PH 13-8 Mo stainless steel. 1289-1300A
Mechanisms for fracture and fatigue-crack propagation in a bulk metallic glass. 1739-1753A

Fatigue life, Coating effects
Tensile properties of duplex metal-coated SiC fiber and titanium alloy matrix composites. 3019-3024A

Fatigue life, Composition effects
Degradation of residual strength in SCS-6/Ti-15-3 due to fully reversed fatigue. 307-313A
Fatigue in selectively fiber-reinforced titanium matrix composites. 2237-2248A

Fatigue life, High temperature effects
Modeling high-temperature stress-strain behavior of cast aluminum alloys. 133-146A

Fatigue life, Welding effects
The thermal fatigue behavior of the combustor alloys IN 617 and Haynes 230 before and after welding. 981-989A

Fatigue limit
Growth of small fatigue cracks in PH 13-8 Mo stainless steel. 1289-1300A

Fatigue strength
An investigation of the fatigue and fracture behavior of a Nb-12Al-44Ti-1.5Mo intermetallic alloy. 1025-1038A

Fatigue strength, Alloying effects
The fatigue and fracture resistance of a Nb-Cr-Ti-Al alloy. 2007-2018A

Fatigue strength, Processing effects
The effect of shot particles on the fatigue of Kaowool fiber-reinforced 339 aluminum. 195-201A

FCC metals, Mechanical properties
Influence of grain size and stacking-fault energy on deformation twinning in fcc metals. 1223-1233A

Ferritic stainless steels, Crystal growth
The solidification characteristics of laser surface-remelted Fe-12Cr-nC alloys. 1817-1826A

Ferritic stainless steels, Mechanical properties
Effect of matrix hardness on the creep properties of a 12CrMoVNb steel. 2331-2339A

Ferritic stainless steels, Oxidation
Improvement of hardness and resistance of oxidation by electric arc alloying on ferritic steels. 3263-3265A

Ferritic stainless steels, Welding
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A

Ferromagnetism
Magnetic transformation of Ni_2AlMn Heusler-type shape memory alloys. 2721-2723A

Ferronickel, Crystal growth
Investigation of the surface of the liquidus of the Fe-Ni-S system at X_S<0.51. 715-722B

Ferrosilicon, Melting
Influence of pellet composition and structure on carbothermic reduction of silica. 295-306B

Ferrosilicon, Reactions (chemical)
Triggering steam explosions of single drops of a molten ferrosilicon alloy with a simple encapsulated mechanical impactor. 1083-1088B

Ferrous alloys, Coatings
Effect of flux addition on the microstructure and hardness of TiC-reinforced ferrous surface composite layers fabricated by high-energy electron beam irradiation. 3131-3141A

Ferrous alloys, Composite materials
Interaction between nonstoichiometric titanium carbide and Fe-C alloys. 857-863B

Ferrous alloys, Crystal growth
Dispersion of fine primary inclusions of MgO and ZrO_2 in Fe-10 mass% Ni alloy and the solidification structure. 1053-1063B
Role of back-diffusion studied by computer simulation. 1635-1641A
Theoretical calculation of nucleation temperature and the undercooling behaviors of Fe-Cr alloys studied with the electromagnetic levitation method. 1827-1833A
Recrystallization activation energy in mechanically alloyed oxide-dispersion-strengthened metals measured by differential scanning calorimetry. 1885-1887A

Ferrous alloys, Diffusion
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A

Ferrous alloys, Mechanical properties
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Ferrous alloys, Microstructure
A fine γ'+α cellular structure in Fe-37.3 wt.% Ni-3.6 wt.% Al-3.3 wt.% Ti-0.2 wt.% C and its influence on high-temperature tensile properties. 1495-1501A
Effect of the primary phase on grain coarsening in undercooled Fe-Co alloys. 2941-2949A

Ferrous alloys, Phase transformations
Kinetics of homogeneous martensitic nucleation in iron-based alloys. 884-887A
Improvement of shape memory effect in Fe-Mn-Si-Cr-Ni alloys. 2599-2604A
The Pitsch-Petch orientation relationship in ferrous pearlite at small undercooling. 2767-2781A

Ferrous alloys, Physical properties
Effect of deformation on the damping capacity in an Fe-23% Mn alloy. 667-670A

Ferrous alloys, Powder technology
A study on laser sintering of Fe-Cu powder compacts. 2229-2235A

Ferrous alloys, Reactions (chemical)
A self-consistent model for predicting interaction parameters in multicomponent alloys. 3099-3102A

Ferrous alloys, Reduction (chemical)
Quantitative evaluation of inclusion in deoxidation of Fe-10 mass% Ni alloy with Si, T, Al, Zr, and Ce. 249-257B
Analysis of size distributions of primary oxide inclusions in Fe-10 mass% Ni-M (M=Si, Ti, Al, Zr, and Ce) alloy. 259-270B

Ferrous alloys, Refining
Model study on mixing and mass transfer in ferroalloy refining processes. 231-239B

Fiber composites, Casting
Infiltration of fibrous preforms by a pure metal. V. Influence of preform compressibility. 471-482A
Reactive infiltration of silicon melt through microporous amorphous carbon preforms. 933-944B
Modeling of composite growth in the directed aluminum melt nitridation process. 2951-2958A

Fiber composites, Diffusion
Diffusional reactions during processing of Timetal 21S/Al_2O_3 composites. 1437-1447A

Fiber composites, Mechanical properties
The effect of shot particles on the fatigue of Kaowool fiber-reinforced 339 aluminum. 195-201A
Observation of fatigue damage process in SiC fiber-reinforced Ti-15-3 composite at high temperature. 221-229A
Effect of in situ material properties on fatigue damage modes in titanium matrix composites. 255-266A
Fatigue crack growth in Ti-matrix composites with spatially varied interfaces. 267-275A
Elastic shielding during fatigue-crack growth of titanium matrix composites. 277-286A
Evaluation of the MMCLIFE 3.0 code in predicting crack growth in titanium aluminide composites. 287-299A
Transverse creep of SiC/Ti-6Al-4V fiber-reinforced metal matrix composites. 301-306A
Correlation of tensile strength with fracture modes of KAOWOOL- and SAFFIL-reinforced 339 aluminum. 815-824A
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A
The tensile strength of 339 aluminum reinforced with kaowool fibers: a comparison of T5 and T6 heat treatments. 1835-1841A
Plasticity of continuous fiber-reinforced metals. 1843-1866A
Creep behavior of an AZ91 magnesium alloy reinforced with alumina fibers. 2059-2066A

Fatigue in selectively fiber-reinforced titanium matrix composites. 2237-2248A
Effect of fiber spatial arrangement on the transverse strength of titanium matrix composites. 2513-2522A
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A
Tensile properties of duplex metal-coated SiC fiber and titanium alloy matrix composites. 3019-3024A

Fiber composites, Reactions (chemical)
Interface characterization of duplex metal-coated SiC fiber-reinforced Ti-15-3 matrix composites. 653-666A

Fiber composites, Thermal properties
Thermal expansion of morphologically textured short-fiber composites. 203-212A
Influence of the localized initial plastic deformation on the effective thermomechanical response of metal-matrix composites. 2875-2884A

Fiber orientation
Thermal expansion of morphologically textured short-fiber composites. 203-212A

Filler metal, Mechanical properties
Hot cracking susceptibility of fillers 52 and 82 in alloy 690 welding. 417-426A

Filtration
Analyses of the dynamic processes of liquid metal filtration. 891-900B

Finite element method
Analysis of temperature and microstructure in the quenching of steel cylinders. 815-822B
Modeling and measurement of the notched strength of gamma titanium aluminides under monotonic loading. 949-959A
LDV measurements and computation of a turbulent circular jet placed non-concentrically in a confining pipe. 957-967B
Finite-element modeling of nonisothermal equal-channel angular extrusion. 1391-1402A
A general numerical method to solve for dislocation configurations. 2073-2087A
Application of image processing for simulation of mechanical response of multi-length scale microstructures of engineering alloys. 2369-2381A
Effect of fiber spatial arrangement on the transverse strength of titanium matrix composites. 2513-2522A
Multicomponent diffusion simulation based on finite elements. 2575-2582A
Interaction energy between martensitic variants. 2583-2590A
Elastic phase-strain distribution in a particulate-reinforced metal-matrix composite deforming by slip or creep. 2989-2997A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Fluid flow
A mathematical model of the heat and fluid flows in direct-chill casting of aluminum sheet ingots and billets. 119-133B
Modeling macro- and microstructures of gas-metal-arc welded HSLA-100 steel. 483-493B
Discussion of "Decay of fluid motion in a filling ladle after tapping" and author's reply. 541-543B
Investigation of transient fluid flow and heat transfer in a continuous casting tundish by numerical analysis verified with nonisothermal water model experiments. 979-985B

Fluxes, Materials selection
Effect of flux addition on the microstructure and hardness of TiC-reinforced ferrous surface composite layers fabricated by high-energy electron beam irradiation. 3131-3141A
Microstructure of TiB_2/carbon steel surface-alloyed materials fabricated by high-energy electron beam irradiation. 3143-3151A

Fluxes, Reactions (chemical)
A thermodynamic study of BaO-BaF_2-Cr_2O_3 system fluxes used for dephosphorization of chromium-containing iron melts. 451-457B

Foamed metals, Physical properties
Damping behavior of foamed aluminum. 771-776A

Formability
Computer simulation of annealing and recovery effects on serrated flow in some Al-Mg alloys. 387-397A

Forming
Prediction of yield surfaces of textured sheet metals. 377-386A
Computer simulation of annealing and recovery effects on serrated flow in some Al-Mg alloys. 387-397A

Foundry practice
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. I. Initial experimental observations. 1643-1650A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. II. A phase-diagram approach. 1651-1655A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. III. A microstructural model. 1657-1662A
The effect of solidification rate on the growth of small fatigue cracks in a cast 319-type aluminum alloy. 3055-3068A

Fracture mechanics
An intergranular creep crack growth model based on grain boundary sliding. 1039-1045A
Mechanisms for fracture and fatigue-crack propagation in a bulk metallic glass. 1739-1753A
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A
Fracture and fatigue behavior of sintered steel at elevated temperatures. II. Fatigue crack propagation. 2895-2904A

Fracture strength
Hydrogen embrittlement, grain boundary segregation, and stress corrosion cracking of alloy X-750 in low- and high-temperature water. 1579-1596A
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A
Bulk-alloy microstructural analogues for transient liquid-phase bonds in the NiAl/Cu/Ni system. 3111-3124A

Fracture strength, Deformation effects
Microstructures and tensile properties of an Al-12 wt.% Si alloy produced by reciprocating extrusion. 2503-2512A

Fracture toughness
Correlation of microstructure and microfracture mechanism of five work rolls. 234-243A

Fracture toughness, Alloying effects
The fatigue and fracture resistance of a Nb-Cr-Ti-Al alloy. 2007-2018A

Fracture toughness, Composition effects
Fatigue-crack propagation behavior of ductile/brittle laminated composites. 633-642A
Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys. 925-939A
Erratum: "Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys". 1686A
Correction to erratum: Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid solution alloys. 3025A
A dual composite of WC-Co. 3231-3238A

Fracture toughness, Corrosion effects
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A

Fracture toughness, Heating effects
Fatigue and fracture of porous steels and Cu-infiltrated porous steels. 325-334A

Fracture toughness, High temperature effects
Fracture and fatigue behavior of sintered steel at elevated temperatures. I. Fracture toughness. 2885-2893A
Fracture and fatigue behavior of sintered steel at elevated temperatures. II. Fatigue crack propagation. 2895-2904A

Fracture toughness, Impurity effects
Effect of TiN particles and microstructure on fracture toughness in simulated heat-affected zones of a structural steel. 2089-2096A

Fracture toughness, Microstructural effects
The effects of grain-refining precipitates on the development of toughness in 4340 steel. 93-114A
The effect of microstructure on fracture toughness and fatigue crack growth behavior in γ-titanium aluminide based intermetallics. 563-577A

Fracture toughness, Processing effects
Micropyretic synthesis studies of Ni-, Al-, Ti-, and Nb-containing alloys. 171-188B

Fracture toughness, Stress effects
The influence of internal stresses on the fracture toughness of α/β titanium alloys. 2853-2863A

Fracturing
Evidence of void nucleation and growth on planar slip bands in a Nb-Cr-Ti alloy. 579-585A

Fracturing, Composition effects
Correlation of tensile strength with fracture modes of KAO-WOOL- and SAFFIL-reinforced 339 aluminum. 815-824A
Monkman-Grant analysis of creep fracture in dispersion-strengthened and particulate-reinforced aluminum. 829-838A
Mechanical behavior of Al-Li-SiC composites. I. Microstructure and tensile deformation. 845-855A

Fracturing, Deformation effects
Finite-element modeling of nonisothermal equal-channel angular extrusion. 1391-1402A
Cavitation and failure during hot forging of Ti-6Al-4V. 1411-1424A
Workability of commercial-purity titanium and 4340 steel during equal channel angular extrusion at cold-working temperatures. 1425-1435A

Fracturing, Heating effects
Effect of surface carburization on dynamic deformation and fracture of tungsten heavy alloys. 2027-2035A

Fracturing, Microstructural effects
Hot working of Ti-6Al-4V via equal channel angular extrusion. 2473-2481A

Free energy
A self-consistent model for predicting interaction parameters in multicomponent alloys. 3099-3102A

Friction
Finite-element modeling of nonisothermal equal-channel angular extrusion. 1391-1402A

Friction welding
Microstructural evolution of 6063 aluminum during friction-stir welding. 2429-2437A
Precipitation sequence in friction stir weld of 6063 aluminum during aging. 3125-3130A

Frictional wear
Interplay between oxidation and wear behavior of the Ti-48Al-2Cr-2Nb-1B alloy. 2019-2026A

Frictional wear, Environmental effects
Dry sliding wear behavior of A356-15% SiC_p composites under controlled atmospheric conditions. 2523-2538A

Fused salts
Preparation and physical characteristics of a lithium-beryllium-substituted fluorapatite. 147-153A

Gallium, Binary systems
Thermodynamics of Ca-Ga alloys. 459-464B

Gallium base alloys
Lattice correspondence and fivefold twins of the orthorhombic (2/1, 1/1) and (1/0, 2/1) approximants in a Ga-Fe-Cu-Si alloy. 697-705A

Gallium base alloys, Crystal lattices
Lattice correspondence and fivefold twins of the orthorhombic (2/1, 1/1) and (1/0, 2/1) approximants in a Ga-Fe-Cu-Si alloy. 697-705A

Gallium base alloys, Phases (state of matter)
Thermodynamics of Ca-Ga alloys. 459-464B

Galvanized steels, Coating
Characteristics of continuous-galvanizing baths. 144-148B

Gas evolution
Reduction of iron-silicon-oxysulfide by CO gas injection. 873-875B

Gas metal arc welding
Modeling macro- and microstructures of gas-metal-arc welded HSLA-100 steel. 483-493B
Droplet formation, detachment, and impingement on the molten pool in gas metal arc welding. 791-801B

Gas turbine engines, Materials selection
Thermodynamic activities in the alloys of the Ti-Al-Nb system. 1315-1326A

Gears, Metal working
Deformation of metastable austenite and resulting properties during the ausform-finishing of 1% carburized AISI 9310 steel gears. 183-193A

Germanium, Crystal growth
Dendrite growth processes of silicon and germanium from highly undercooled melts. 1333-1339A
Discussion of "Dendrite growth processes of silicon and germanium from highly undercooled melts" and authors' reply. 3011-3016A

Glissile dislocations, Composition effects
Deformation behavior of dilute SnBi (0.5 to 6 at.%) solid solutions. 123-132A

Gold, Binary systems
The neodymium-gold phase diagram. 1169-1176A

Gold, Diffusion
Influence of annealing on depth distributions and microstructure of ion-implanted Ti6Al4V. 2121-2127A

Gold base alloys, Phase transformations
Ordering transformation and spinodal decomposition in Au-Ni alloys. 707-716A

Grain boundaries
Texture evolution and the role of grain boundaries in skeletal formation during coarsening in solid-liquid mixtures. 1955-1969A
Fifty-year study of grain-boundary relaxation. 2267-2295A

Grain boundary migration, Impurity effects
Effect of TiN particles and microstructure on fracture toughness in simulated heat-affected zones of a structural steel. 2089-2096A

Grain boundary migration, Welding effects
Direction of grain-boundary migration in the weld metal of an austenitic stainless steel. 621-626A

Grain boundary sliding
Observations of grain-boundary sliding and surface topography in an 8090 Al alloy after uniaxial and biaxial superplastic deformation. 53-64A
An intergranular creep crack growth model based on grain boundary sliding. 1039-1045A
Fifty-year study of grain-boundary relaxation. 2267-2295A

Grain growth
An analytical model for nodular eutectic grain predictions during solidification. 927-932B
Dispersion of fine primary inclusions of MgO and ZrO_2 in Fe-10 mass% Ni alloy and the solidification structure. 1053-1063B
Investigation of microstructural coarsening in Sn-Pb alloys. 1541-1547A

Grain growth, Alloying effects
The effect of manganese addition on the microstructure of W-Ni-Fe heavy alloy. 627-632A

Grain growth, Cooling effects
Discussion of "Dendrite growth processes of silicon and germanium from highly undercooled melts" and authors' reply. 3011-3016A

Grain growth, Diffusion effects
Growth of silicides and interdiffusion in the Mo-Si system. 545-550A

Grain refinement
The effects of grain-refining precipitates on the development of toughness in 4340 steel. 93-114A
Grain refinement of aluminum alloys. I. The nucleant and solute paradigms—a review of the literature. 1613-1623A
Grain refinement of aluminum alloys. II. Confirmation of, and a mechanism for, the solute paradigm. 1625-1633A

Grain size
The effects of grain-refining precipitates on the development of toughness in 4340 steel. 93-114A
Influence of grain size on the constitutive response and substructure evolution of Monel 400. 1235-1247A
Investigation of microstructural coarsening in Sn-Pb alloys. 1541-1547A
The effect of grain size and temperature on the superplastic deformation behavior of a 7075 Al alloy. 2037-2047A
The creep behavior of Ti-Al-Nb O+bcc orthorhombic alloys. II. 2349-2367A

Grain size, Alloying effects
Influence of carbon content on superplastic behavior in Ti- and B-added Cr-Mo steels. 1185-1191A

Grain size, Cooling effects
Effect of the primary phase on grain coarsening in undercooled Fe-Co alloys. 2941-2949A

Grain size, Deformation effects
Microstructural refinement of an as-cast Al-12.6 wt.% Si alloy by repeated thermomechanical treatment to produce a heavily deformable material. 2221-2228A
Mathematical modeling of the hot-deformation behavior of superalloy IN718. 2701-2712A

Grain size, Welding effects
Fusion zone microstructure and porosity in electron beam welds of an $\alpha+\beta$ titanium alloy. 789-798A
Microstructural evolution of 6063 aluminum during friction-stir welding. 2429-2437A

Grain structure, Processing effects
A three-dimensional cellular automation-finite element model for the prediction of solidification grain structures. 3153-3165A

Graphite, Composite materials
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. I. Theoretical analysis. 361-367B
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. II. Experiments. 369-373B

Gray iron, Crystal growth
Mathematical modeling of microstructural development in hypoeutectic cast iron. 2147-2158A

Gray iron, Heat treatment
Surface hardening of a gray cast iron used for a diesel engine cylinder block using high-energy electron beam irradiation. 1211-1221A

Hall Heroult process
The influence of the initial shape and position of an anode and the curvature of the aluminum on the current distribution in prebaked aluminum cells. 341-348B

Hardness
Correlation of microstructure and microfracture mechanism of five work rolls. 234-243A
Effect of matrix hardness on the creep properties of a 12CrMoVNb steel. 2331-2339A

Hardness, Composition effects
A dual composite of WC-Co. 3231-3238A

Hardness, Heating effects
Surface hardening of a gray cast iron used for a diesel engine cylinder block using high-energy electron beam irradiation. 1211-1221A
Effect of surface carburization on dynamic deformation and fracture of tungsten heavy alloys. 2027-2035A

Hardness, Microstructural effects
Deformation of metastable austenite and resulting properties during the ausform-finishing of 1% carburized AISI 9310 steel gears. 183-193A

Hardness, Processing effects
Composition, microstructure, hardness, and wear properties of high-speed steel rolls. 399-409A
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A
Hot explosive compaction of Mo-Ti alloys. 2483-2489A
Influence of cold rolling and strain rate on plastic response of powder metallurgy and chemical vapor deposition rhenium. 2641-2648A
Improvement of hardness and resistance of oxidation by electric arc alloying on ferritic steels. 3263-3265A

Hardness, Radiation effects
Effect of flux addition on the microstructure and hardness of TiC-reinforced ferrous surface composite layers fabricated by high-energy electron beam irradiation. 3131-3141A

Hardness, Welding effects
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A
Microstructural evolution of 6063 aluminum during friction-stir welding. 2429-2437A

Heat affected zone, Mechanical properties
Effect of TiN particles and microstructure on fracture toughness in simulated heat-affected zones of a structural steel. 2089-2096A
Quantitative evaluation of softened regions in weld heat-affected zones of 6061-T6 aluminum alloy—characterizing of the laser beam welding process. 2115-2120A

Heat affected zone, Microstructure
Modeling macro- and microstructures of gas-metal-arc welded HSLA-100 steel. 483-493B
Direction of grain-boundary migration in the weld metal of an austenitic stainless steel. 621-626A
Fusion zone microstructure and porosity in electron beam welds of an $\alpha+\beta$ titanium alloy. 789-798A
A process model for the heat-affected zone microstructure evolution in Al-Zn-Mg weldments. 2667-2677A
A process model for the heat-affected zone microstructure evolution in duplex stainless steel weldments. I. The model. 2915-2929A

Heat affected zone, Phase transformations
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A

Heat of formation
A thermodynamic interpretation of the size-ratio limits for Laves phase formation. 1449-1452A

Heat of mixing
A self-consistent model for predicting interaction parameters in multicomponent alloys. 3099-3102A

Heat of transformation, Processing effects
Transformation behavior of sintered porous NiTi alloys. 2753-2756A

Heat transfer
Mathematical modeling of copper and brass upcasting. 75-98B
A mathematical model of the heat and fluid flows in direct-chill casting of aluminum sheet ingots and billets. 119-133B
Two-dimensional dynamic simulation of the thermal state of ladles. 323-330B
The heat-transfer coefficient during the unidirectional solidification of an Al-Si alloy casting. 473-482B
Modeling macro- and microstructures of gas-metal-arc welded HSLA-100 steel. 483-493B
Least-squares adjustment of mathematical model of heat and mass transfer processes during solidification of binary alloys. 505-513B
On the mechanism of mushy layer formation during droplet-based processing. 527-539B
Casting-chill interface heat transfer during solidification of an aluminum alloy. 773-778B
Effect of heat and mass transfer on the thermal decomposition of $SrCO_3$ compacts. 901-908B
Investigation of transient fluid flow and heat transfer in a continuous casting tundish by numerical analysis verified with nonisothermal water model experiments. 979-985B
Finite-element modeling of nonisothermal equal-channel angular extrusion. 1391-1402A

Hematite, Reactions (chemical)
The precipitation of hematite from ferric chloride media at atmospheric pressure. 993-1001B

High carbon steels, Mechanical properties
Microstructure-property relations in as-extruded ultrahigh-carbon steels. 1559-1568A
Fracture and fatigue behavior of sintered steel at elevated temperatures. I. Fracture toughness. 2885-2893A
Fracture and fatigue behavior of sintered steel at elevated temperatures. II. Fatigue crack propagation. 2895-2904A

High cycle fatigue, Microstructural effects
Microstructural effects on high-cycle fatigue-crack initiation in A356.2 casting alloy. 2659-2666A

High pressure
Partial Fe-Ti alloy phase diagrams at high pressure. 3009-3011A

High speed tool steels, Mechanical properties
Correlation of microstructure and microfracture mechanism of five work rolls. 234-243A
Composition, microstructure, hardness, and wear properties of high-speed steel rolls. 399-409A

High strength low alloy steels, Mechanical properties
The role of heat treating on the sour gas resistance of an X-80 steel for oil and gas transport. 2419-2428A
The influence of tensile stress states on the failure of HY-100 steel. 2835-2842A
The influence of rolling practice on notch toughness and texture development in high-strength linepipe. 3045-3054A

High strength low alloy steels, Powder technology
The mechanism of porous column formation during spray forming. 1679-1682A

High strength low alloy steels, Welding
Modeling macro- and microstructures of gas-metal-arc welded HSLA-100 steel. 483-493B
Effect of different stages of tensile deformation on micromagnetic parameters in high-strength, low-alloy steel. 2067-2072A

High strength steels, Extrusion
Workability of commercial-purity titanium and 4340 steel during equal channel angular extrusion at cold-working temperatures. 1425-1435A

High strength steels, Heat treatment
The effect of ion implanting on hydrogen entry into metals. 1535-1540A

High strength steels, Mechanical properties
The effects of grain-refining precipitates on the development of toughness in 4340 steel. 93-114A
Mixed-mode hydrogen-assisted cracking of high-strength steel: the role of cyclic load history. 1882-1885A

High strength steels, Metal working
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A

High strength steels, Phase transformations
An analytical electron microscopy study of paraequilibrium cementite precipitation in ultra-high-strength steel. 501-512A

High temperature
Indentation power-law creep of high-purity indium. 601-610A
A fine $\gamma'+\alpha$ cellular structure in Fe-37.3 wt.% Ni-3.6 wt.% Al-3.3 wt.% Ti-0.2 wt.% C and its influence on high-temperature tensile properties. 1495-1501A

Hot dip galvanizing
Studies of the morphology of the Al-rich interfacial layer formed during the hot dip galvanizing of steel sheet. 681-695A
Distribution of aluminum in hot-dip galvanized coatings. 3031-3044A

Hot extrusion, Microstructural effects
Hot working of Ti-6Al-4V via equal channel angular extrusion. 2473-2481A

Hot forging
Cavitation and failure during hot forging of Ti-6Al-4V. 1411-1424A

Hot isostatic pressing
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the $\alpha+\gamma$-phase field. 751-761A

Hot pressing
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A

Hot spraying
On the mechanism of mushy layer formation during droplet-based processing. 527-539B
Characterization of the W_2C phase formed during the high velocity oxygen fuel spraying of a WC+12% Co powder. 1913-1921A

Hot working
Mathematical modeling of the hot-deformation behavior of superalloy IN718. 2701-2712A

Hot working, Microstructural effects
Effect of initial microstructure on plastic flow and dynamic globularization during hot working of Ti-6Al-4V. 3219-3229A

Hydrogen, Sorption
The effect of ion implanting on hydrogen entry into metals. 1535-1540A

Hydrogen embrittlement
The effects of pre-dissolved hydrogen on cleavage and grain boundary fracture initiation in metastable beta Ti-3Al-8V-6Cr-4Mo-4Zr. I. 65-79A
The equilibrium concentration of hydrogen atoms ahead of a mixed mode I-mode III crack tip in single crystal iron. 155-159A
Hydrogen embrittlement, grain boundary segregation, and stress corrosion cracking of alloy X-750 in low- and high-temperature water. 1579-1596A
Mixed-mode hydrogen-assisted cracking of high-strength steel: the role of cyclic load history. 1882-1885A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Hydrogen embrittlement, Deformation effects
Improvement of the resistance to stress corrosion cracking in austenitic stainless steels by cyclic prestraining. 1327-1331A

Hydrogen embrittlement, Heating effects
The role of heat treating on the sour gas resistance of an X-80 steel for oil and gas transport. 2419-2428A

Hydrometallurgy
Strategies for optimal operation of the tellurium electrowinning process. 5-13B
Photocatalytic reduction of selenate and selenite solutions using TiO_2 powders. 15-20B
A solution chemistry approach to the study of rare earth element precipitation by oxalic acid. 189-195B
Preparation of ammonium chloroplatinate by a precipitation stripping of Pt(IV)-loaded Alamine 336 or TBP. 197-203B
The precipitation of hematite from ferric chloride media at atmospheric pressure. 993-1001B

Hysteresis
Strain dependence of pseudoelastic hysteresis of NiTi. 1275-1282A

Ilmenite, Beneficiation
High-temperature phase relations and thermodynamics in the iron-titanium-oxygen system. 695-705B
Evaluation of a process that uses phosphate additions to upgrade titania slag. 823-826B

Ilmenite, Reduction (chemical)
Carbothermic reduction of ilmenite ($FeTiO_3$) and rutile (TiO_2). 1075-1081B

Image analysis
Application of image processing for simulation of mechanical response of multi-length scale microstructures of engineering alloys. 2369-2381A

Impact, Coating effects
Liquid impact erosion mechanism and theoretical impact stress analysis in TiN-coated steam turbine blade materials. 961-968A

Impact strength, Deformation effects
The influence of rolling practice on notch toughness and texture development in high-strength linepipe. 3045-3054A

Impact strength, Microstructural effects
Infuence of martensite content and morphology on tensile and impact properties of high-martensite dual-phase steels. 1193-1202A

Inclusions
Erratum: Investigation of inclusion re-entrainment from the steel-slag interface. 149B

Inclusions, Processing effects
Analysis of size distributions of primary oxide inclusions in Fe-10 mass% Ni-M (M=Si, Ti, Al, Zr, and Ce) alloy. 259-270B

Indentation, Temperature effects
Indentation power-law creep of high-purity indium. 601-610A

Indium, Mechanical properties
Indentation power-law creep of high-purity indium. 601-610A

Indium, Ternary systems
Investigation of the phase equilibria in the Sn-Bi-In alloy system. 1503-1515A

Induction coils, Design
An induction heating process with coil design and solutions avoiding coarsening phenomena of Al-6% Si-3% Cu-0.3% Mg alloy for thixoforming. 2967-2977A

Induction heating
An induction heating process with coil design and solutions avoiding coarsening phenomena of Al-6% Si-3% Cu-0.3% Mg alloy for thixoforming. 2967-2977A

Infiltration
Fatigue and fracture of porous steels and Cu-infiltrated porous steels. 325-334A
Infiltration of fibrous preforms by a pure metal. V. Influence of preform compressibility. 471-482A
Reactive infiltration of silicon melt through microporous amorphous carbon preforms. 933-944B
Modeling of composite growth in the directed aluminum melt nitridation process. 2951-2958A
Fabrication and characteristics of AA6061/Si_3N_{4p} composite by the pressureless infiltration technique. 2999-3007A

Ingot casting
Simulation of convection and macrosegregation in a large steel ingot. 1357-1366A

Ingots, Crystal growth
Simulation of convection and macrosegregation in a large steel ingot. 1357-1366A

Injection
Discussion of "Mixing time and fluid flow phenomena in liquids of varying kinematic viscosities agitated by bottom gas injection" and authors' reply. 349-352B
Reduction of iron-silicon-oxysulfide by CO gas injection. 873-875B
Mathematical modeling of pneumatic char injection in a direct reduction rotary kiln. 969-977B

Inserts, Coating
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Interface reactions
Thermodynamic modeling of the palladium-lead-tin system. 5-18A
Erratum: Investigation of inclusion re-entrainment from the steel-slag interface. 149B
Interface characterization of duplex metal-coated SiC fiber-reinforced Ti-15-3 matrix composites. 653-666A
Interaction between nonstoichiometric titanium carbide and Fe-C alloys. 857-863B
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A

Interface reactions, Field effects
Electrochemical interfacial phenomena under microgravity. II. Numerical analysis of the rate of ionic mass transfer accompanying anodic copper dissolution. 779-790B

Interface reactions, Heating effects
Diffusional reactions during processing of Timetal 21S/Al_2O_3 composites. 1437-1447A

Intergranular fracture
The effects of pre-dissolved hydrogen on cleavage and grain boundary fracture initiation in metastable beta Ti-3Al-8V-6Cr-4Mo-4Zr. I. 65-79A
An intergranular creep crack growth model based on grain boundary sliding. 1039-1045A

Intergranular fracture, Alloying effects
Properties of the $Ir_{85}Nb_{15}$ two-phase refractory superalloys with nickel additions. 2629-2639A

Intergranular fracture, Deformation effects
Stress-corrosion cracking susceptibility of the superplastically formed 5083 aluminum alloy in 3.5% NaCl solution. 3191-3199A

Intergranular fracture, Welding effects
Hot cracking susceptibility of fillers 52 and 82 in alloy 690 welding. 417-426A

Interlayers, Materials selection
Development of a diffusion barrier layer for silicon and carbon in molybdenum—a physical vapor deposition approach. 799-806A

Intermetallic phases
$\beta \rightarrow \alpha''$ and $\beta \rightarrow \omega$ transformations in Ti-Os alloys. 231-233A
Thermodynamics of Ca-Ga alloys. 459-464B
The neodymium-gold phase diagram. 1169-1176A
Thermodynamic activities in the alloys of the Ti-Al-Nb system. 1315-1326A
Compositional characterization of Cu-rich phase particles present in as-cast Al-Cu-Mg(-Li) alloys containing Ag. 1693-1704A
Orientation relationship between β-Mn and $L2_1$ matrix in a Cu_2MnAl alloy. 1705-1716A

Intermetallic phases, Composition effects
The effect of Mg on the microstructure and mechanical behavior of Al-Si-Mg casting alloys. 2611-2618A

Intermetallic phases, Crystal growth
Precipitation of an intermetallic phase with Pt_2Mo-type structure in alloy 625. 41-52A
Determination of the critical nucleus size of precipitates using the macroscopic composition gradient method. 2783-2789A

Intermetallic phases, Diffusion effects
Diffusional reactions during processing of Timetal 21S/Al_2O_3 composites. 1437-1447A

Intermetallic phases, Heating effects
The nitriding behavior of Ti-Al alloys at 1000°C. 19-29A

Intermetallic phases, Synthesis
Shock-induced reaction synthesis of isomorphous (Cu-Ni) and immiscible (Cu-Nb) compounds. 1367-1379A

Intermetallics, Composite materials
Wear behavior of in situ Al-based composites containing TiB_2, Al_2O_3, and Al_3Ti particles. 243-248A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Intermetallics, Mechanical properties
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Intermetallics, Phase transformations
Strain dependence of pseudoelastic hysteresis of NiTi. 1275-1282A
Transformation behavior of sintered porous NiTi alloys. 2753-2756A
Superheating behavior of NiAl: Authors' reply. 3265A

Internal oxidation, Environmental effects
Role of gaseous environment and secondary precipitation in microstructural degradation of Cr-Mo steel weldments at high temperatures. 2103-2113A

Interstitial free steels, Coating
Distribution of aluminum in hot-dip galvanized coatings. 3031-3044A

Interstitial free steels, Metal working
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A

Interstitial solutions, Heating effects
Application of the cluster variation method to ordering in an interstitial solid soution: the γ-Fe[N]/γ-Fe_4N_{1-x} equilibrium. 1945-1953A

Investment casting
A three-dimensional cellular automation-finite element model for the prediction of solidification grain structures. 3153-3165A

Ion implantation
The effect of ion implanting on hydrogen entry into metals. 1535-1540A
Influence of annealing on depth distributions and microstructure of ion-implanted Ti6Al4V. 2121-2127A

Iridium base alloys, Mechanical properties
Properties of the $Ir_{85}Nb_{15}$ two-phase refractory superalloys with nickel additions. 2629-2639A

Iron, Alloying additive
The effect of Sr and Fe additions on the microstructure and mechanical properties of a direct squeeze cast Al-7Si-0.3Mg alloy. 1341-1356A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. I. Initial experimental observations. 1643-1650A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. II. A phase-diagram approach. 1651-1655A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. III. A microstructural model. 1657-1662A

Iron, Binary systems
Partial Fe-Ti alloy phase diagrams at high pressure. 3009-3011A

Iron, Coating
Synthesis and characterizatiion of Ti-Si-C-N films. 2439-2447A

Iron, Diffusion
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A
Multicomponent diffusion simulation based on finite elements. 2575-2582A

Iron, Extraction
A study of the reduction rate of FeO in slag by solid carbon. 215-221B
Selective removal of iron contaminations from zinc-chloride melts by cementation with zinc. 607-611B
Rate of reduction of Fe_tO-SiO_2-TiO_2 melts with CO gas. 827-829B
Thermodynamics and phase equilibria involving the spinel solid solution $Fe_xMg_{1-x}Cr_2O_4$. 865-871B
Reduction of iron-silicon-oxysulfide by CO gas injection. 873-875B
Experimental evidence for electrochemical nature of the reaction between iron oxide in calcia-silica-alumina slag and carbon in liquid iron. 877-889B

Iron, Mechanical properties
The equilibrium concentration of hydrogen atoms ahead of a mixed mode I-mode III crack tip in single crystal iron. 155-159A

Iron, Powder technology
Application of percolation theory in predicting shape distortion during liquid-phase sintering. 2209-2220A

Iron, Reactions (chemical)
Thermodynamics of TiO_x in blast furnace-type slags. 29-43B
Thermodynamics of iron oxide in Fe_xO-dilute $CaO+Al_2O_3+MgO+Fe_xO$ slags at 1873K. 419-427B
Thermodynamics of surfaces and adsorption in the Fe-S, Fe-N, and Fe-S-N systems at 1823K. 429-433B
Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes. 443-450B
The rate of reaction of solid iron with oxidized "FeO"-CaO-SiO_2-Al_2O_3 slags at 1360°C—the chemical diffusivity of iron oxide. 465-472B
Erratum:"Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes". 831B

Iron, Recovering
The precipitation of hematite from ferric chloride media at atmospheric pressure. 993-1001B

Iron, Ternary systems
Investigation of the surface of the liquidus of the Fe-Ni-S system at X_s<0.51. 715-722B
Thermodynamic assessment of the Al-Fe-Si system. 1081-1095A
The influence of temperature gradients on Ostwald ripening. 2341-2348A
Evaluation of interaction parameters in metallic solutions by the isoactivity method. 3103-3110A

Iron and steel making
Activity coefficient of nickel oxide in BaO-based slags. 143-144B
Kinetics of simultaneous reactions between liquid iron-carbon alloys and slags containing MnO. 279-286B
Two-dimensional dynamic simulation of the thermal state of ladles. 323-330B
Discussion of "Mixing time and fluid flow phenomena in liquids of varying kinematic viscosities agitated by bottom gas injection" and authors' reply. 349-352B
Spout eyes formed by an emerging gas plume at the surface of a slag-covered metal melt. 411-418B
Thermodynamics of iron oxide in Fe_xO-dilute $CaO+Al_2O_3+MgO+Fe_xO$ slags at 1873K. 419-427B
Thermodynamics of surfaces and adsorption in the Fe-S, Fe-N, and Fe-S-N systems at 1823K. 429-433B
Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes. 443-450B
The rate of reaction of solid iron with oxidized "FeO"-CaO-SiO_2-Al_2O_3 slags at 1360°C—the chemical diffusivity of iron oxide. 465-472B
Discussion of "Decay of fluid motion in a filling ladle after tapping" and author's reply. 541-543B
Height of the spout of a gas plume discharging from a metal melt. 655-660B
Erratum:"Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes". 831B
A study of the sulfide capacities of iron-oxide containing slags. 909-920B
Phase-diagram study for the Al_2O_3-CaF_2-SiO_2 system. 921-925B
Solubility of carbon in CaO-B_2O_3 and BaO-B_2O_3 slags. 1045-1052B

Iron compounds, Mechanical properties
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Iron ores, Beneficiation
Simulation of primary-slag melting behavior in the cohesive zone of a blast furnace, considering the effect of Al_2O_3, Fe_tO, and basicity in the sinter ore. 671-683B
Optimizing the operation of straight-grate iron-ore pellet induration systems using process models. 803-813B

Iron ores, Reactions (chemical)
Rate of reduction of Fe_tO-SiO_2-TiO_2 melts with CO gas. 827-829B

Iron oxides, Reactions (chemical)
Rate of reduction of Fe_tO-SiO_2-TiO_2 melts with CO gas. 827-829B
A study of the sulfide capacities of iron-oxide containing slags. 909-920B

Iron oxides, Reduction (chemical)
A study of the reduction rate of FeO in slag by solid carbon. 215-221B
Reduction of iron-silicon-oxysulfide by CO gas injection. 873-875B
Experimental evidence for electrochemical nature of the reaction between iron oxide in calcia-silica-alumina slag and carbon in liquid iron. 877-889B

Ironmaking
Mathematical modeling of pneumatic char injection in a direct reduction rotary kiln. 969-977B
Thermodynamics of nucleation and supersaturation for the aluminum-deoxidation reaction in liquid iron. 1065-1074B

Isothermal annealing
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A

Isothermal treatment
Formation of hcp martensite during the isothermal aging of an fcc Co-27Cr-5Mo-0.05C orthopedic implant alloy. 1177-1184A

Joints, Mechanical properties
Wide-gap transient liquid-phase bonding of Ti-48 at.% Al-2 at.% Cr-2 at.% Nb. 2723-2726A

Ladle metallurgy
Spout eyes formed by an emerging gas plume at the surface of a slag-covered metal melt. 411-418B
Height of the spout of a gas plume discharging from a metal melt. 655-660B

Ladles, Thermal properties
Two-dimensional dynamic simulation of the thermal state of ladles. 323-330B

Lamellar structure
Hot working of Ti-6Al-4V via equal channel angular extrusion. 2473-2481A
Effect of initial microstructure on plastic flow and dynamic globularization during hot working of Ti-6Al-4V. 3219-3229A

Lamellar structure, Deformation effects
Atom probe and transmission electron microscopy investigations of heavily drawn pearlitic steel wire. 717-727A

Laminates, Mechanical properties
Effect of in situ material properties on fatigue damage modes in titanium matrix composites. 255-266A
Fatigue crack growth in Ti-matrix composites with spatially varied interfaces. 267-275A
Evaluation of the MMCLIFE 3.0 code in predicting crack growth in titanium aluminide composites. 287-299A
Fatigue-crack propagation behavior of ductile/brittle laminated composites. 633-642A

Fabrication and evaluation of Nb/Nb_5Si_3 microlaminate foils. 2959-2965A

Laser beam melting
The solidification characteristics of laser surface-remelted Fe-12Cr-nC alloys. 1817-1826A

Laser beam welding
Quantitative evaluation of softened regions in weld heat-affected zones of 6061-T6 aluminum alloy—characterizing of the laser beam welding process. 2115-2120A

Laser processing
A study on laser sintering of Fe-Cu powder compacts. 2229-2235A

Lattice parameters
Lattice correspondence and fivefold twins of the orthorhombic (2/1, 1/1) and (1/0, 2/1) approximants in a Ga-Fe-Cu-Si alloy. 697-705A

Lattice parameters, Heating effects
Application of the cluster variation method to ordering in an interstitial solid soution: the γ-Fe[N]/γ-Fe_4N_{1-x} equilibrium. 1945-1953A

Laves phase
A thermodynamic interpretation of the size-ratio limits for Laves phase formation. 1449-1452A

Lead (metal), Binary systems
The influence of temperature gradients on Ostwald ripening. 2341-2348A

Lead (metal), Reactions (chemical)
Thermodynamic modeling of lead distribution among matte, slag, and liquid copper. 1033-1044B

Lead (metal), Ternary systems
Thermodynamic modeling of the palladium-lead-tin system. 5-18A
Thermodynamic modeling of the nickel-lead-tin system. 1481-1494A

Lead (metal), Thermal properties
Nonstationary hot wire method with silica-coated probe for measuring thermal conductivities of molten metals. 1971-1979A

Lead base alloys, Crystal growth
Suppression of channel convection in solidifying Pb-Sn alloys via an applied magnetic field. 1809-1815A

Lead base alloys, Directional solidification
Cell/dendrite distribution in directionally solidified hypoeutectic Pb-Sb alloys. 2159-2165A
Macrosegregation caused by thermosolutal convection during directional soldification of Pb-Sb alloys. 2167-2171A
Cellular/dendritic array tip morphology during directional solidification of Pb-5.8 wt.% Sb alloy. 2463-2472A

Lead base alloys, Microstructure
Texture evolution and the role of grain boundaries in skeletal formation during coarsening in solid-liquid mixtures. 1955-1969A

Lead compounds, Ternary systems
Experimental study of phase equilibria in the system PbO-ZnO-SiO_2. 21-27B

Levitation casting
A mathematical model for the dynamic behavior of melts subjected to electromagnetic forces. II. Measurement of surface waves and comparison with predictions of the mathematical model. 331-339B

Levitation melting
Superheating behavior of NiAl: Authors' reply. 3265A

Life cycle assessment
Sustainability: the materials role. 157-170B

Lime, Reactions (chemical)
A study of the sulfide capacities of iron-oxide containing slags. 909-920B

Liquid flow
Discussion of "Mixing time and fluid flow phenomena in liquids of varying kinematic viscosities agitated by bottom gas injection" and authors' reply. 349-352B
Toward a probe for velocity measurement in molten metals at high temperatures. 623-630B
Effects of surface flow control on fluid flow phenomena and mixing time in a bottom blown bath. 631-637B
Three-dimensional modeling of the flow and the interface surface in a continuous casting mold model. 1095-1105B

Liquid flow, Field effects
A mathematical model for the dynamic behavior of melts subjected to electromagnetic forces. II. Measurement of surface waves and comparison with predictions of the mathematical model. 331-339B

Liquid metals, Physical properties
Turbulence structure of bottom-blowing bubbling jet in a molten Wood's metal bath. 61-66B
A mathematical model for the dynamic behavior of melts subjected to electromagnetic forces. II. Measurement of surface waves and comparison with predictions of the mathematical model. 331-339B
Discussion of "Mixing time and fluid flow phenomena in liquids of varying kinematic viscosities agitated by bottom gas injection" and authors' reply. 349-352B
Discussion of "Decay of fluid motion in a filling ladle after tapping" and author's reply. 541-543B
Toward a probe for velocity measurement in molten metals at high temperatures. 623-630B
Effects of surface flow control on fluid flow phenomena and mixing time in a bottom blown bath. 631-637B
Analyses of the dynamic processes of liquid metal filtration. 891-900B
The surface tension of molten aluminum and Al-Si-Mg alloy under vacuum and hydrogen atmospheres. 1027-1032B

Liquid metals, Quality control
Study of electromagnetic separation of nonmetallic inclusions from aluminum melt. 2979-2988A

Liquid metals, Reactions (chemical)
Thermodynamics of TiO_x in blast furnace-type slags. 29-43B
Kinetics of simultaneous reactions between liquid iron-carbon alloys and slags containing MnO. 279-286B
Thermodynamics of iron oxide in Fe_xO-dilute $CaO+Al_2O_3+MgO+Fe_xO$ slags at 1873K. 419-427B
Thermodynamics of surfaces and adsorption in the Fe-S, Fe-N, and Fe-S-N systems at 1823K. 429-433B
A thermodynamic database for copper smelting and converting. 661-669B
Experimental evidence for electrochemical nature of the reaction between iron oxide in calcia-silica-alumina slag and carbon in liquid iron. 877-889B
Thermodynamic modeling of lead distribution among matte, slag, and liquid copper. 1033-1044B
Triggering steam explosions of single drops of a molten ferro-silicon alloy with a simple encapsulated mechanical impactor. 1083-1088B

Liquid metals, Thermal properties
Nonstationary hot wire method with silica-coated probe for measuring thermal conductivities of molten metals. 1971-1979A

Liquid phase sintering
Anomalous pore morphologies in liquid-phase-sintered Al-Zn alloys. 1682-1685A
Densification during the supersolidus liquid-phase sintering of nickel-based prealloyed powder mixtures. 2201-2208A
Application of percolation theory in predicting shape distortion during liquid-phase sintering. 2209-2220A
Densification and shape distortion in liquid-phase sintering. 3211-3217A

Liquidus
The effect of MgO on liquidus temperatures of fayalite slags. 1017-1026B

Long range order, Heating effects
Stabilization and two-way shape memory effect in Cu-Al-Ni single crystals. 493-499A

Low alloy steels, Mechanical properties
Correlation of microstructure and microfracture mechanism of five work rolls. 234-243A
Infuence of martensite content and morphology on tensile and impact properties of high-martensite dual-phase steels. 1193-1202A

Low alloy steels, Phase transformations
Thermodynamic prediction of the eutectoid transformation temperatures of low-alloy steels. 2325-2330A

Low carbon steels, Coating
Nickel monoaluminide coating on ultralow-carbon steel by reactive sintering. 1605-1612A
Distribution of aluminum in hot-dip galvanized coatings. 3031-3044A

Low carbon steels, Mechanical properties
Analysis and prevention of cracking phenomenon occurring during cold forging of two AISI 1010 steel pulleys. 81-92A
Erosion of SS41 steel by sand blasting. 941-948A

Low carbon steels, Metal working
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A

Low carbon steels, Phase transformations
A method for extracting phase change kinetics from dilation for multistep transformations: austenitization of a low carbon steel. 107-117B

Low carbon steels, Steel making
Thermodynamic aspects of steel reoxidation behavior by the ladle slag system of $CaO-MgO-SiO_2-Al_2O_3-Fe_tO-MnO-P_2O_5$. 435-442B

Low cycle fatigue
Low-cycle fatigue crack initiation and break in strain-life curve of Al-Li 8090 alloy. 887-890A

Low cycle fatigue, Processing effects
Low-cycle dwell-time fatigue in Ti-6242. 2383-2389A

Luders lines, Deformation effects
Deformation bands, the LEDS theory, and their importance in texture development. II. Theoretical conclusions. 2391-2401A

Magnesium, Alloying additive
Surface oxide and the role of magnesium during the sintering of aluminum. 457-463A
The effects of Mg microadditon on the mechanical behavior and fracture mechanism of MAR-M247 superalloy at elevated temperatures. 551-561A

Magnesium, Alloying elements
Effect of residual magnesium content on thermal fatigue cracking behavior of high-silicon spheroidal graphite cast iron. 1549-1558A
The effect of Mg on the microstructure and mechanical behavior of Al-Si-Mg casting alloys. 2611-2618A

Magnesium, Extraction
Chlorination and carbochlorination of magnesium oxide. 383-391B
Nonisothermal gravimetric investigation on kinetics of reduction of magnesia by aluminum. 1003-1008B
Kinetics of oxychlorination of magnesium oxide. 1009-1015B

Magnesium base alloys, Casting
Relation between cooling rates and microstructures in gravity-die-cast AZ91D disks. 723-729B

Magnesium base alloys, Composite materials
Creep behavior of an AZ91 magnesium alloy reinforced with alumina fibers. 2059-2066A

Magnesium oxide, Impurities
Dispersion of fine primary inclusions of MgO and ZrO_2 in Fe-10 mass% Ni alloy and the solidification structure. 1053-1063B

Magnesium oxide, Reactions (chemical)
A study of the sulfide capacities of iron-oxide containing slags. 909-920B
Kinetics of oxychlorination of magnesium oxide. 1009-1015B
The effect of MgO on liquidus temperatures of fayalite slags. 1017-1026B

Magnesium oxide, Reduction (chemical)
Chlorination and carbochlorination of magnesium oxide. 383-391B
Nonisothermal gravimetric investigation on kinetics of reduction of magnesia by aluminum. 1003-1008B

Magnetic domains
Magnetic transformation of Ni_2AlMn Heusler-type shape memory alloys. 2721-2723A

Magnetic fields
Suppression of channel convection in solidifying Pb-Sn alloys via an applied magnetic field. 1809-1815A

Manganese, Diffusion
Multicomponent diffusion simulation based on finite elements. 2575-2582A

Manganese compounds, Phase transformations
Magnetic transformation of Ni_2AlMn Heusler-type shape memory alloys. 2721-2723A

Manganese compounds, Reactions (chemical)
Kinetics of simultaneous reactions between liquid iron-carbon alloys and slags containing MnO. 279-286B

Martensite
Effect of deformation on the damping capacity in an Fe-23% Mn alloy. 667-670A
Infuence of martensite content and morphology on tensile and impact properties of high-martensite dual-phase steels. 1193-1202A

Martensitic stainless steels, Mechanical properties
Growth of small fatigue cracks in PH 13-8 Mo stainless steel. 1289-1300A

Martensitic transformations
Stabilization and two-way shape memory effect in Cu-Al-Ni single crystals. 493-499A
Microstructure and martensitic transformations in a dual-phase α/β Cu-Zn alloy. 729-739A
Kinetics of homogeneous martensitic nucleation in iron-based alloys. 884-887A
Pseudoelastic behavior of a CuAlNi single crystal under uniaxial loading. 1933-1943A
Magnetic transformation of Ni_2AlMn Heusler-type shape memory alloys. 2721-2723A

Martensitic transformations, Alloying effects
Improvement of shape memory effect in Fe-Mn-Si-Cr-Ni alloys. 2599-2604A

Martensitic transformations, Deformation effects
Strain dependence of pseudoelastic hysteresis of NiTi. 1275-1282A

Martensitic transformations, Heating effects
Formation of hcp martensite during the isothermal aging of an fcc Co-27Cr-5Mo-0.05C orthopedic implant alloy. 1177-1184A

Martensitic transformations, Processing effects
Transformation behavior of sintered porous NiTi alloys. 2753-2756A

Martensitic transformations, Stress effects
Stress-induced products in a Ti-14.8V alloy deformed in tension. 2249-2251A
Interaction energy between martensitic variants. 2583-2590A

Martensitic transformations, Welding effects
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A
The role of phase transformation in electron-beam welding of TiAl-based alloys. 1717-1726A

Mass transfer
Model study on mixing and mass transfer in ferroalloy refining processes. 231-239B
Least-squares adjustment of mathematical model of heat and mass transfer processes during solidification of binary alloys. 505-513B
Effect of heat and mass transfer on the thermal decomposition of $SrCO_3$ compacts. 901-908B

Materials conservation
Sustainability: The materials role. 895-908A

Mathematical analysis
Turbulence structure of bottom-blowing bubbling jet in a molten Wood's metal bath. 61-66B
High-temperature deformation behavior of an Al-8.4Fe-3.6Ce dispersion-strengthened material. 371-376A
A thermally coupled flow formulation with microstructural evolution for hypoeutectic cast-iron solidification. 731-744B
Measurement of liquid permeability in the mushy zones of aluminum-copper alloys. 745-750B
Discussion of "Reconsideration of error in the analysis of the wake dislocation problem" and authors' response. 1452-1459A
Mechanism of surface modification of the Ti-6Al-4V alloy using a gas tungsten arc heat source. 1597-1603A
Theoretical calculation of nucleation temperature and the undercooling behaviors of Fe-Cr alloys studied with the electromagnetic levitation method. 1827-1833A
Interaction energy between martensitic variants. 2583-2590A
Evaluation of the methods for calculating the concentration-dependent diffusivity in binary systems. 2605-2610A
Open-die forging of structurally porous sandwich panels. 2689-2699A
Influence of the localized initial plastic deformation on the effective thermomechanical response of metal-matrix composites. 2875-2884A
Approximate models of microsegregation with coarsening. 3016-3019A
Evaluation of interaction parameters in metallic solutions by the isoactivity method. 3103-3110A

Mathematical models
Thermodynamic modeling of the palladium-lead-tin system. 5-18A
The effects of pre-dissolved hydrogen on cleavage and grain boundary fracture initiation in metastable beta Ti-3Al-8V-6Cr-4Mo-4Zr. I. 65-79A
An interacting pair model for alkaline binary and ternary liquid silicates: application to the systems Na_2O-K_2O-SiO_2. 67-74B
Mathematical modeling of copper and brass upcasting. 75-98B
A method for extracting phase change kinetics from dilation for multistep transformations: austenitization of a low carbon steel. 107-117B
A mathematical model of the heat and fluid flows in direct-chill casting of aluminum sheet ingots and billets. 119-133B
A mathematical model for surface segregation in aluminum direct chill casting. 135-142B
Settling of multisized clusters of alumina particules in liquid aluminum. 241-247B
Thermodynamic calculation for alloy systems. 271-277B
Kinetics of simultaneous reactions between liquid iron-carbon alloys and slags containing MnO. 279-286B
Two-dimensional dynamic simulation of the thermal state of ladles. 323-330B
A mathematical model for the dynamic behavior of melts subjected to electromagnetic forces. II. Measurement of surface waves and comparison with predictions of the mathematical model. 331-339B
Discussion of "Mixing time and fluid flow phenomena in liquids of varying kinematic viscosities agitated by bottom gas injection" and authors' reply. 349-352B
Combined effects of time and temperature on strength evolution using integral work-of-sintering concepts. 465-470A
Modeling macro- and microstructures of gas-metal-arc welded HSLA-100 steel. 483-493B
Least-squares adjustment of mathematical model of heat and mass transfer processes during solidification of binary alloys. 505-513B
Mathematical modeling of a melt pool driven by an electron beam. 515-525B
On the mechanism of mushy layer formation during droplet-based processing. 527-539B
Discussion of "Decay of fluid motion in a filling ladle after tapping" and author's reply. 541-543B
Numerical calculation of the permeability in a dendritic mushy zone. 613-622B
Direction of grain-boundary migration in the weld metal of an austenitic stainless steel. 621-626A
Modeling of inclusion removal in a tundish. 639-654B
Cavity sequences in continuously cast billets. II. Stochastic models. 763-772B
Droplet formation, detachment, and impingement on the molten pool in gas metal arc welding. 791-801B
Optimizing the operation of straight-grate iron-ore pellet induration systems using process models. 803-813B

Analysis of temperature and microstructure in the quenching of steel cylinders. 815-822B
Mechanical behavior of Al-Li/SiC composites. III. Micromechanical modeling. 869-878A
A study of the sulfide capacities of iron-oxide containing slags. 909-920B
An analytical model for nodular eutectic grain predictions during solidification. 927-932B
Mathematical model for nitrogen control in oxygen steelmaking. 945-956B
Modeling and measurement of the notched strength of gamma titanium aluminides under monotonic loading. 949-959A
LDV measurements and computation of a turbulent circular jet placed non-concentrically in a confining pipe. 957-967B
Mathematical modeling of pneumatic char injection in a direct reduction rotary kiln. 969-977B
Use of microstructural statistics in predicting polycrystalline material properties. 969-979A
An intergranular creep crack growth model based on grain boundary sliding. 1039-1045A
A process model for the microstructure evolution in ductile cast iron. I. The model. 1053-1068A
A process model for the microstructure evolution in ductile cast iron. II. Applications of the model. 1069-1079A
Three-dimensional modeling of the flow and the interface surface in a continuous casting mold model. 1095-1105B
Erratum to "Numerical calculation of the permeability in a dendritic mushy zone". 1107B
A study on the kinetic process of reaction synthesis of TiC. I. Experimental research and theoretical model. 1147-1151A
A study on the kinetic process of reaction synthesis of TiC. II. Theoretical analyses and numerical calculation. 1153-1157A
Considering particle morphology in a constitutive model for metal powders compaction. 1159-1162A
Statistical simulation of small fatigue crack nucleation and coalescence in a lamellar TiAl alloy. 1203-1209A
Influence of grain size on the constitutive response and substructure evolution of Monel 400. 1235-1247A
Precipitate-induced plastic anisotropy: explicit solutions of the plastic anisotropy due to plate-shaped precipitates. 1283-1288A
Time-dependent deformation behavior of near-eutectic 60Sn-40Pb solder. 1301-1313A
Finite-element modeling of nonisothermal equal-channel angular extrusion. 1391-1402A
Cavitation and failure during hot forging of Ti-6Al-4V. 1411-1424A
Thermodynamic modeling of the nickel-lead-tin system. 1481-1494A
Aluminum nitride precipitation and texture development in batch-annealed bake-hardening steel. 1663-1673A
Modeling solid-particle erosion of ductile alloys. 1763-1774A
A general numerical method to solve for dislocation configurations. 2073-2087A
Mathematical modeling of microstructural development in hypoeutectic cast iron. 2147-2158A
A unified model of microsegregation and coarsening. 2183-2189A
Application of percolation theory in predicting shape distortion during liquid-phase sintering. 2209-2220A
Fifty-year study of grain-boundary relaxation. 2267-2295A
Application of image processing for simulation of mechanical response of multi-length scale microstructures of engineering alloys. 2369-2381A
Deformation bands, the LEDS theory, and their importance in texture development. II. Theoretical conclusions. 2391-2401A
Deformation bands, the LEDS theory, and their importance in texture development. I. Previous evidence and new observations. 2491-2501A
Effect of fiber spatial arrangement on the transverse strength of titanium matrix composites. 2513-2522A
A numerical model of peritectoid transformation. 2563-2573A
Multicomponent diffusion simulation based on finite elements. 2575-2582A
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A
Mathematical modeling of the hot-deformation behavior of superalloy IN718. 2701-2712A
The influence of internal stresses on the fracture toughness of α/β titanium alloys. 2853-2863A
A process model for the heat-affected zone microstructure evolution in duplex stainless steel weldments. I. The model. 2915-2929A
Modeling of composite growth in the directed aluminum melt nitridation process. 2951-2958A
A self-consistent model for predicting interaction parameters in multicomponent alloys. 3099-3102A

Mattes, Reactions (chemical)
Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes. 443-450B
Erratum:"Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes". 831B

Mechanical alloying
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the $\alpha+\gamma$-phase field. 751-761A
Closure-affected fatigue crack propagation behaviors of powder metallurgy-processed Al-Li alloys in various environments. 2097-2102A

Medium carbon steels, Casting
Cavity sequences in continuously cast billets. I. Analysis of empirical data. 751-761B
Cavity sequences in continuously cast billets. II. Stochastic models. 763-772B

Melting
Superheating behavior of NiAl: Authors' reply. 3265A

Mercury, Melting
Spout eyes formed by an emerging gas plume at the surface of a slag-covered metal melt. 411-418B

Mercury, Physical properties
A mathematical model for the dynamic behavior of melts subjected to electromagnetic forces. II. Measurement of surface waves and comparison with predictions of the mathematical model. 331-339B

Mercury, Thermal properties
Nonstationary hot wire method with silica-coated probe for measuring thermal conductivities of molten metals. 1971-1979A

Metallic glasses, Mechanical properties
Mechanisms for fracture and fatigue-crack propagation in a bulk metallic glass. 1739-1753A

Metallurgy
Greenhouse gases and the metallurgical process industry. 841-856B

Metastable phases
Deformation of metastable austenite and resulting properties during the ausform-finishing of 1% carburized AISI 9310 steel gears. 183-193A
$\beta\rightarrow\alpha''$ and $\beta\rightarrow\omega$ transformations in Ti-Os alloys. 231-233A

Metastable phases, Cooling effects
Effect of the primary phase on grain coarsening in undercooled Fe-Co alloys. 2941-2949A

Microcracks
Application of image processing for simulation of mechanical response of multi-length scale microstructures of engineering alloys. 2369-2381A

Microgravity
Electrochemical interfacial phenomena under microgravity. II. Numerical analysis of the rate of ionic mass transfer accompanying anodic copper dissolution. 779-790B
Anomalous pore morphologies in liquid-phase-sintered Al-Zn alloys. 1682-1685A
Discussion of "Particle engulfment and pushing by solidying interfaces. II. Microgravity experiments and theoretical analysis" and authors' reply. 1887-1894A
Dendritic growth tip velocities and radii of curvature in microgravity. 3177-3190A

Microhardness
Wide-gap transient liquid-phase bonding of Ti-48 at.% Al-2 at.% Cr-2 at.% Nb. 2723-2726A

Microhardness, Heating effects
Phase transformation of Zn-4Al-3Cu alloy during heat treatment. 917-923A

Microstructure, Processing effects
The solidification characteristics of laser surface-remelted Fe-12Cr-nC alloys. 1817-1826A

Miscibility
Thermodynamics of the miscibility gap in the Ag-Se system. 589-595B

Modulus of elasticity, Temperature effects
Temperature and composition dependence of the elastic constants of Ni_3Al. 2403-2408A

Molybdenum, Binary systems
A numerical model of peritectoid transformation. 2563-2573A

Molybdenum, Coating
Development of a diffusion barrier layer for silicon and carbon in molybdenum—a physical vapor deposition approach. 799-806A

Molybdenum, Composite materials
Elastic phase-strain distribution in a particulate-reinforced metal-matrix composite deforming by slip or creep. 2989-2997A

Molybdenum, Diffusion
Growth of silicides and interdiffusion in the Mo-Si system. 545-550A

Molybdenum, Ternary systems
Experimental and thermodynamic investigation of the Ni-Al-Mo system. 1785-1795A
Experimental study and thermodynamic assessment of the Ni-Mo-Ta ternary system. 2735-2744A

Molybdenum base alloys, Powder technology
Hot explosive compaction of Mo-Ti alloys. 2483-2489A

Molybdenum compounds, Crystal growth
Growth of silicides and interdiffusion in the Mo-Si system. 545-550A

Molybdenum compounds, Thin films
Development of a diffusion barrier layer for silicon and carbon in molybdenum—a physical vapor deposition approach. 799-806A

Morphology
Precipitation of an intermetallic phase with Pt_2Mo-type structure in alloy 625. 41-52A
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A
Eutectic cell wall morphology and tensile embrittlement in ferritic spheroidal graphite cast iron. 1775-1784A
The Alstruc microstructure solidification model for industrial aluminum alloys. 2135-2146A
Mathematical modeling of microstructural development in hypoeutectic cast iron. 2147-2158A
Cellular/dendritic array tip morphology during directional solidification of Pb-5.8 wt.% Sb alloy. 2463-2472A

Morphology, Alloying effects
The effect of manganese addition on the microstructure of W-Ni-Fe heavy alloy. 627-632A
Studies of the morphology of the Al-rich interfacial layer formed during the hot dip galvanizing of steel sheet. 681-695A
Effect of cold rolling and annealing on the structure of γ" precipitates in a Ni-18Cr-16Fe-5Nb-3Mo alloy. 1923-1931A

Morphology, Coating effects
Characterization of the W_2C phase formed during the high velocity oxygen fuel spraying of a WC+12% Co powder. 1913-1921A

Morphology, Cooling effects
Relation between cooling rates and microstructures in gravity-die-cast AZ91D disks. 723-729B

Morphology, Deformation effects
Influence of pressing speed on microstructural development in equal-channel angular pressing. 1989-1997A
Microstructures and tensile properties of an Al-12 wt.% Si alloy produced by reciprocating extrusion. 2503-2512A
Deformed microstructure of the single-crystal superalloy NASAIR 100 at 1050°C. 2843-2852A

Morphology, Heating effects
Influence of the Mn content on the kinetics of austempering transformation in compacted graphite cast iron. 2745-2752A

Morphology, Welding effects
Modeling macro- and microstructures of gas-metal-arc welded HSLA-100 steel. 483-493B
Microstructural evolution of 6063 aluminum during friction-stir welding. 2429-2437A
A process model for the heat-affected zone microstructure evolution in Al-Zn-Mg weldments. 2667-2677A
A process model for the heat-affected zone microstructure evolution in duplex stainless steel weldments. I. The model. 2915-2929A

Necking
Deformed microstructure of the single-crystal superalloy NASAIR 100 at 1050°C. 2843-2852A

Neodymium, Binary systems
The neodymium-gold phase diagram. 1169-1176A

Nickel, Alloying additive
Microalloying of C, Ni, and Ce in an advanced Al-Zn-Mg-Cu alloy. 1017-1024A
Properties of the $Ir_{85}Nb_{15}$ two-phase refractory superalloys with nickel additions. 2629-2639A

Nickel, Binary systems
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A
The influence of temperature gradients on Ostwald ripening. 2341-2348A
A numerical model of peritectoid transformation. 2563-2573A
Determination of the critical nucleus size of precipitates using the macroscopic composition gradient method. 2783-2789A
Directional solidification and phase equilibria in the Ni-Al system. 3167-3175A

Nickel, Bonding
Bulk-alloy microstructural analogues for transient liquid-phase bonds in the NiAl/Cu/Ni system. 3111-3124A

Nickel, Diffusion
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A
Evaluation of the methods for calculating the concentration-dependent diffusivity in binary systems. 2605-2610A

Nickel, Powder technology
Shock-induced reaction synthesis of isomorphous (Cu-Ni) and immiscible (Cu-Nb) compounds. 1367-1379A
Application of percolation theory in predicting shape distortion during liquid-phase sintering. 2209-2220A

Nickel, Reactions (chemical)
Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes. 443-450B
Erratum:"Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes". 831B

Nickel, Ternary systems
Investigation of the surface of the liquidus of the Fe-Ni-S system at X_s<0.51. 715-722B
Thermodynamic modeling of the nickel-lead-tin system. 1481-1494A
Experimental and thermodynamic investigation of the Ni-Al-Mo system. 1785-1795A
Experimental investigations and thermodynamic descriptions of the Ni-Si and C-Ni-Si systems. 2409-2418A
Experimental study and thermodynamic assessment of the Ni-Mo-Ta ternary system. 2735-2744A

Nickel base alloys, Bonding
Bulk-alloy microstructural analogues for transient liquid-phase bonds in the NiAl/Cu/Ni system. 3111-3124A

Nickel base alloys, Coating
Mechanism of spallation in platinum aluminide/electron beam physical vapor-deposited thermal barrier coatings. 427-435A
Synthesis and cyclic oxidation behavior of a (Ni, Pt)Al coating on a desulfurized Ni-base superalloy. 2679-2687A

Nickel base alloys, Coatings
Synthesis and cyclic oxidation behavior of a (Ni, Pt)Al coating on a desulfurized Ni-base superalloy. 2679-2687A

Nickel base alloys, Crystal growth
Recrystallization activation energy in mechanically alloyed oxide-dispersion-strengthened metals measured by differential scanning calorimetry. 1885-1887A
Liquid-solid partition ratios in nickel-base alloys. 2173-2181A

Nickel base alloys, Diffusion
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A

Nickel base alloys, Directional solidification
Directional solidification and phase equilibria in the Ni-Al system. 3167-3175A

Nickel base alloys, Heat treatment
Evaluation of halide-activated pack boriding of Inconel 722. 670-675A

Nickel base alloys, Mechanical properties
Cavitation erosion of NiAl. 335-343A
The effects of Mg microadditon on the mechanical behavior and fracture mechanism of MAR-M247 superalloy at elevated temperatures. 551-561A
High-temperature deformation behavior of NiAl(Ti) solid-solution single crystals. 587-600A
Slip transfer and dislocation nucleation processes in multiphase ordered Ni-Fe-Al alloys. 991-1001A
Deformation and fracture behavior of a directionally solidified β/γ' Ni-30 at.% Al alloy. 1003-1015A
An intergranular creep crack growth model based on grain boundary sliding. 1039-1045A
Influence of grain size and stacking-fault energy on deformation twinning in fcc metals. 1223-1233A
Influence of grain size on the constitutive response and substructure evolution of Monel 400. 1235-1247A
Influence of secondary precipitates and crystallographic orientation on the strength of single crystals of a Ni-based superalloy. 1249-1259A
Hydrogen embrittlement, grain boundary segregation, and stress corrosion cracking of alloy X-750 in low- and high-temperature water. 1579-1596A
Effect of small amounts of nitrogen on properties of a Ni-based superalloy. 1755-1761A
Modeling solid-particle erosion of ductile alloys. 1763-1774A
Temperature and composition dependence of the elastic constants of Ni_3Al. 2403-2408A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Nickel base alloys, Melting
Discussion of "Superheating behavior of NiAl". 1675A

Nickel base alloys, Metal working
Mathematical modeling of the hot-deformation behavior of superalloy IN718. 2701-2712A

Nickel base alloys, Metallography
Transmission x-ray diffraction of single-crystal nickel-base superalloys. 1880-1882A

Nickel base alloys, Microstructure
Deformed microstructure of the single-crystal superalloy NASAIR 100 at 1050°C. 2843-2852A

Nickel base alloys, Oxidation
The effect of water vapor on the oxidation of alloys that develop alumina scales for protection. 2905-2913A

Nickel base alloys, Phase transformations
Effect of cold rolling on the precipitation behavior of δ phase in Inconel 718. 31-40A

Precipitation of an intermetallic phase with Pt_2Mo-type structure in alloy 625. 41-52A
Characterization and modeling of the precipitation of the sigma phase in Udimet 720 and Udimet 720LI. 521-533A
Strain dependence of pseudoelastic hysteresis of NiTi. 1275-1282A
Magnetic transformation of Ni_2AlMn Heusler-type shape memory alloys. 2721-2723A
Transformation behavior of sintered porous NiTi alloys. 2753-2756A
Superheating behavior of NiAl: Authors' reply. 3265A

Nickel base alloys, Phases (state of matter)
Prediction and characterization of variant electron diffraction patterns for γ' and δ precipitates in an Inconel 718 alloy. 2297-2303A

Nickel base alloys, Powder technology
Micropyretic synthesis studies of Ni-, Al-, Ti-, and Nb-containing alloys. 171-188B
Densification during the supersolidus liquid-phase sintering of nickel-based prealloyed powder mixtures. 2201-2208A

Nickel base alloys, Structural hardening
Effect of cold rolling and annealing on the structure of γ" precipitates in a Ni-18Cr-16Fe-5Nb-3Mo alloy. 1923-1931A

Nickel base alloys, Thermal properties
Microstructure and texture effect on the thermal expansion of a variously aged polycrystalline superalloy IN738LC. 2803-2808A

Nickel base alloys, Welding
Hot cracking susceptibility of fillers 52 and 82 in alloy 690 welding. 417-426A
The thermal fatigue behavior of the combustor alloys IN 617 and Haynes 230 before and after welding. 981-989A
Comparison of three different techniques for measuring the residual stresses in an electron beam-welded plate of Waspaloy. 1797-1808A

Nickel chromium molybdenum steels, Extrusion
Workability of commercial-purity titanium and 4340 steel during equal channel angular extrusion at cold-working temperatures. 1425-1435A

Nickel chromium molybdenum steels, Heat treatment
The effect of ion implanting on hydrogen entry into metals. 1535-1540A

Nickel chromium molybdenum steels, Mechanical properties
The effects of grain-refining precipitates on the development of toughness in 4340 steel. 93-114A
The influence of tensile stress states on the failure of HY-100 steel. 2835-2842A

Nickel chromium molybdenum steels, Metal working
Deformation of metastable austenite and resulting properties during the ausform-finishing of 1% carburized AISI 9310 steel gears. 183-193A

Nickel compounds, Bonding
Bulk-alloy microstructural analogues for transient liquid-phase bonds in the NiAl/Cu/Ni system. 3111-3124A

Nickel compounds, Coatings
Nickel monoaluminide coating on ultralow-carbon steel by reactive sintering. 1605-1612A
Synthesis and cyclic oxidation behavior of a (Ni, Pt)Al coating on a desulfurized Ni-base superalloy. 2679-2687A

Nickel compounds, Directional solidification
Directional solidification and phase equilibria in the Ni-Al system. 3167-3175A

Nickel compounds, Mechanical properties
Cavitation erosion of NiAl. 335-343A
High-temperature deformation behavior of NiAl(Ti) solid-solution single crystals. 587-600A
Deformation and fracture behavior of a directionally solidified β/γ' Ni-30 at.% Al alloy. 1003-1015A
Temperature and composition dependence of the elastic constants of Ni_3Al. 2403-2408A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Nickel compounds, Melting
Discussion of "Superheating behavior of NiAl". 1675A

Nickel compounds, Phase transformations
Strain dependence of pseudoelastic hysteresis of NiTi. 1275-1282A
Magnetic transformation of Ni_2AlMn Heusler-type shape memory alloys. 2721-2723A
Transformation behavior of sintered porous NiTi alloys. 2753-2756A
Superheating behavior of NiAl: Authors' reply. 3265A

Nickel compounds, Powder technology
Micropyretic synthesis studies of Ni-, Al-, Ti-, and Nb-containing alloys. 171-188B

Nickel iron, Mechanical properties
Correlation of microstructure and microfracture mechanism of five work rolls. 234-243A

Niobium, Alloying additive
Effect of cold rolling and annealing on the structure of γ" precipitates in a Ni-18Cr-16Fe-5Nb-3Mo alloy. 1923-1931A

Niobium, Composite materials
Fatigue-crack propagation behavior of ductile/brittle laminated composites. 633-642A
Fabrication and evaluation of Nb/Nb_5Si_3 microlaminate foils. 2959-2965A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Niobium, Powder technology
Shock-induced reaction synthesis of isomorphous (Cu-Ni) and immiscible (Cu-Nb) compounds. 1367-1379A

Niobium, Ternary systems
Thermodynamic activities in the alloys of the Ti-Al-Nb system. 1315-1326A

Niobium base alloys, Composite materials
Fatigue-crack propagation behavior of ductile/brittle laminated composites. 633-642A
Fabrication and evaluation of Nb/Nb_5Si_3 microlaminate foils. 2959-2965A

Niobium base alloys, Mechanical properties
Evidence of void nucleation and growth on planar slip bands in a Nb-Cr-Ti alloy. 579-585A
Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys. 925-939A
An investigation of the fatigue and fracture behavior of a Nb-12Al-44Ti-1.5Mo intermetallic alloy. 1025-1038A
Erratum: "Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys". 1686A
The fatigue and fracture resistance of a Nb-Cr-Ti-Al alloy. 2007-2018A
Correction to erratum: Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid solution alloys. 3025A

Niobium base alloys, Oxidation
Oxidation behavior of niobium aluminide intermetallics protected by aluminide and silicide diffusion coatings. 495-504B

Niobium base alloys, Powder technology
Micropyretic synthesis studies of Ni-, Al-, Ti-, and Nb-containing alloys. 171-188B

Niobium compounds, Composite materials
Fatigue-crack propagation behavior of ductile/brittle laminated composites. 633-642A
Fabrication and evaluation of Nb/Nb_5Si_3 microlaminate foils. 2959-2965A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Niobium compounds, Mechanical properties
The creep behavior of Ti-Al-Nb O+bcc orthorhombic alloys. II. 2349-2367A

Niobium compounds, Oxidation
Oxidation behavior of niobium aluminide intermetallics protected by aluminide and silicide diffusion coatings. 495-504B

Niobium compounds, Phase transformations
The microstructural evolution in Ti-Al-Nb O+bcc orthorhombic alloys. I. 2305-2323A

Niobium compounds, Powder technology
Micropyretic synthesis studies of Ni-, Al-, Ti-, and Nb-containing alloys. 171-188B

Nitrides, Coatings
Synthesis and characterization of Ti-Si-C-N films. 2439-2447A

Nitrides, Heating effects
The nitriding behavior of Ti-Al alloys at 1000°C. 19-29A

Nitriding
The nitriding behavior of Ti-Al alloys at 1000°C. 19-29A
Mechanism of surface modification of the Ti-6Al-4V alloy using a gas tungsten arc heat source. 1597-1603A
Application of the cluster variation method to ordering in an interstitial solid soution: the γ-Fe[N]/γ'-Fe_4N_{1-x} equilibrium. 1945-1953A

Nitrogen, Alloying additive
Effect of small amounts of nitrogen on properties of a Ni-based superalloy. 1755-1761A
Improvement of shape memory effect in Fe-Mn-Si-Cr-Ni alloys. 2599-2604A

Nitrogen, Alloying elements
Mathematical model for nitrogen control in oxygen steelmaking. 945-956B

Nitrogen, Diffusion
Mechanism of surface modification of the Ti-6Al-4V alloy using a gas tungsten arc heat source. 1597-1603A
Influence of annealing on depth distributions and microstructure of ion-implanted Ti6Al4V. 2121-2127A

Nitrogen, Reactions (chemical)
Thermodynamics of surfaces and adsorption in the Fe-S, Fe-N, and Fe-S-N systems at 1823K. 429-433B

Nodular iron, Crystal growth
An analytical model for nodular eutectic grain predictions during solidification. 927-932B

Nodular iron, Mechanical properties
Correlation of microstructure and microfracture mechanism of five work rolls. 234-243A
Effect of residual magnesium content on thermal fatigue cracking behavior of high-silicon spheroidal graphite cast iron. 1549-1558A
Eutectic cell wall morphology and tensile embrittlement in ferritic spheroidal graphite cast iron. 1775-1784A

Nodular iron, Phase transformations
A process model for the microstructure evolution in ductile cast iron. I. The model. 1053-1068A
A process model for the microstructure evolution in ductile cast iron. II. Applications of the model. 1069-1079A
Influence of the Mn content on the kinetics of austempering transformation in compacted graphite cast iron. 2745-2752A

Nonferrous castings, Crystal growth
Mathematical modeling of copper and brass upcasting. 75-98B
Modeling the fluid-flow-induced stress and collapse in a dendritic network. 287-293B
High-energy x-ray computed tomography of the progression of the solidification front in pure aluminum. 1403-1409A

Nonferrous castings, Mechanical properties
The effect of Sr and Fe additions on the microstructure and mechanical properties of a direct squeeze cast Al-7Si-0.3Mg alloy. 1341-1356A
The effect of solidification rate on the growth of small fatigue cracks in a cast 319-type aluminum alloy. 3055-3068A
The debonding and fracture of Si particles during the fatigue of a cast Al-Si alloy. 3079-3088A

Nonferrous castings, Microstructure
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. I. Initial experimental observations. 1643-1650A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. II. A phase-diagram approach. 1651-1655A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. III. A microstructural model. 1657-1662A

Nonferrous castings, Quality control
The heat-transfer coefficient during the unidirectional solidification of an Al-Si alloy casting. 473-482B

Nonferrous metals, Extraction
High-temperature phase relations and thermodynamics in the silver-tin-sulfur system. 707-714B

Nonmetallic inclusions
Modeling of inclusion removal in a tundish. 639-654B
Dispersion of fine primary inclusions of MgO and ZrO_2 in Fe-10 mass% Ni alloy and the solidification structure. 1053-1063B
Study of electromagnetic separation of nonmetallic inclusions from aluminum melt. 2979-2988A

Nonmetallic inclusions, Composition effects
Effect of residual magnesium content on thermal fatigue cracking behavior of high-silicon spheroidal graphite cast iron. 1549-1558A

Nonmetallic inclusions, Processing effects
Quantitative evaluation of inclusion in deoxidation of Fe-10 mass% Ni alloy with Si, T, Al, Zr, and Ce. 249-257B

Notch strength
Modeling and measurement of the notched strength of gamma titanium aluminides under monotonic loading. 949-959A

Notch toughness, Deformation effects
The influence of rolling practice on notch toughness and texture development in high-strength linepipe. 3045-3054A

Nuclear fuels
Preparation and physical characteristics of a lithium-beryllium-substituted fluorapatite. 147-153A

Nuclear reactor components, Welding
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A

Nucleation
Evidence of void nucleation and growth on planar slip bands in a Nb-Cr-Ti alloy. 579-585A
Kinetics of homogeneous martensitic nucleation in iron-based alloys. 884-887A
An analytical model for nodular eutectic grain predictions during solidification. 927-932B
Thermodynamics of nucleation and supersaturation for the aluminum-deoxidation reaction in liquid iron. 1065-1074B
Grain refinement of aluminum alloys. I. The nucleant and solute paradigms—a review of the literature. 1613-1623A
Grain refinement of aluminum alloys. II. Confirmation of, and a mechanism for, the solute paradigm. 1625-1633A
Formation of α phase in the massive and feathery γ-TiAl alloys during aging in the single α field. 2591-2598A
The Pitsch-Petch orientation relationship in ferrous pearlite at small undercooling. 2767-2781A

Nucleation, Pressure effects
Pore nucleation in solidifying high-purity copper. 2449-2453A

Nucleation, Temperature effects
Theoretical calculation of nucleation temperature and the undercooling behaviors of Fe-Cr alloys studied with the electromagnetic levitation method. 1827-1833A

Open die forging
Open-die forging of structurally porous sandwich panels. 2689-2699A

Order disorder, Coating effects
Synthesis and characterizatiion of Ti-Si-C-N films. 2439-2447A

Orientation relationships
Lattice correspondence and fivefold twins of the orthorhombic (2/1, 1/1) and (1/0, 2/1) approximants in a Ga-Fe-Cu-Si alloy. 697-705A
Use of microstructural statistics in predicting polycrystalline material properties. 969-979A
Orientation relationship between β-Mn and $L2_1$ matrix in a Cu_2MnAl alloy. 1705-1716A
The Pitsch-Petch orientation relationship in ferrous pearlite at small undercooling. 2767-2781A

Orientation relationships, Heating effects
Influence of secondary precipitates and crystallographic orientation on the strength of single crystals of a Ni-based superalloy. 1249-1259A

Osmium, Binary systems
$\beta \rightarrow \alpha''$ and $\beta \rightarrow \omega$ transformations in Ti-Os alloys. 231-233A

Ostwald ripening
Aging behavior of an Al-Li-Cu-Mg-Zr alloy. 741-749A

Ostwald ripening, Temperature effects
The influence of temperature gradients on Ostwald ripening. 2341-2348A

Oxidation rate
Simultaneous oxidation and sigma-phase formation in a stainless steel. 355-362A

Oxidation resistance, Alloying effects
Surface oxide and the role of magnesium during the sintering of aluminum. 457-463A

Oxidation resistance, Coating effects
Oxidation behavior of niobium aluminide intermetallics protected by aluminide and silicide diffusion coatings. 495-504B
Development of a diffusion barrier layer for silicon and carbon in molybdenum—a physical vapor deposition approach. 799-806A

Oxidation resistance, Processing effects
Micropyretic synthesis studies of Ni-, Al-, Ti-, and Nb-containing alloys. 171-188B
Improvement of hardness and resistance of oxidation by electric arc alloying on ferritic steels. 3263-3265A

Oxygen, Environment
Dry sliding wear behavior of A356-15% SiC_p composites under controlled atmospheric conditions. 2523-2538A

Oxygen steel making, Quality control
Mathematical model for nitrogen control in oxygen steelmaking. 945-956B

Painting
The effects of preaging treatments on aging kinetics and mechanical properties in AA6111 aluminum autobody sheet. 1999-2006A

Paints, Heat treatment
The effects of preaging treatments on aging kinetics and mechanical properties in AA6111 aluminum autobody sheet. 1999-2006A

Palladium, Ternary systems
Thermodynamic modeling of the palladium-lead-tin system. 5-18A

Panels, Coating
Distribution of aluminum in hot-dip galvanized coatings. 3031-3044A

Panels, Forging
Open-die forging of structurally porous sandwich panels. 2689-2699A

Partial pressure
Pore nucleation in solidifying high-purity copper. 2449-2453A

Particle shape
Considering particle morphology in a constitutive model for metal powders compaction. 1159-1162A
Effect of size and shape of tungsten particles on dynamic torsional properties in tungsten heavy alloys. 1261-1273A

Particle size
Effect of size and shape of tungsten particles on dynamic torsional properties in tungsten heavy alloys. 1261-1273A
Determination of the critical nucleus size of precipitates using the macroscopic composition gradient method. 2783-2789A

Particle size, Composition effects
The effect of Mg on the microstructure and mechanical behavior of Al-Si-Mg casting alloys. 2611-2618A

Particle size distribution
Dispersion of fine primary inclusions of MgO and ZrO_2 in Fe-10 mass% Ni alloy and the solidification structure. 1053-1063B

Particle size distribution, Processing effects
Quantitative evaluation of inclusion in deoxidation of Fe-10 mass% Ni alloy with Si, T, Al, Zr, and Ce. 249-257B
Analysis of size distributions of primary oxide inclusions in Fe-10 mass% Ni-M (M=Si, Ti, Al, Zr, and Ce) alloy. 259-270B

Particulate composites, Casting
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. I. Theoretical analysis. 361-367B
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. II. Experiments. 369-373B
Fabrication and characteristics of AA6061/Si_3N_{4p} composite by the pressureless infiltration technique. 2999-3007A

Particulate composites, Crystal growth
Discussion of "Particle engulfment and pushing by solidying interfaces. II. Microgravity experiments and theoretical analysis" and authors' reply. 1887-1894A

Particulate composites, Extrusion
Mechanical behavior of aluminum matrix composite during extrusion in the semisolid state. 1137-1146A

Particulate composites, Mechanical properties
Wear behavior of in situ Al-based composites containing TiB_2, Al_2O_3, and Al_3Ti particles. 243-248A
Fundamental aspects of creep in metal matrix composites. 315-324A
Synergistic effects of wear and corrosion for Al_2O_3 particulate-reinforced 6061 aluminum matrix composites. 643-651A
Monkman-Grant analysis of creep fracture in dispersion-strengthened and particulate-reinforced aluminum. 829-838A
Mechanical behavior of Al-Li-SiC composites. I. Microstructure and tensile deformation. 845-855A
Mechanical behavior of Al-Li-SiC composites. II. Cyclic deformation. 857-867A
Mechanical behavior of Al-Li/SiC composites. III. Micromechanical modeling. 869-878A
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A
High-temperature mechanical behavior of Ti-6Al-4V alloy and TiC_p/Ti-6Al-4V composite. 1569-1578A
Dry sliding wear behavior of A356-15% SiC_p composites under controlled atmospheric conditions. 2523-2538A
Wear of Al-based hybrid composites containing BN and SiC particulates. 2551-2555A
Elastic phase-strain distribution in a particulate-reinforced metal-matrix composite deforming by slip or creep. 2989-2997A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A
Wear behavior of Al-Al_3Ti composite manufactured by a centrifugal method. 3253-3261A

Particulate composites, Microstructure
Settling of multisized clusters of alumina particules in liquid aluminum. 241-247B

Particulate composites, Phase transformations
Solutionizing effects on deformation-induced phase transformations in 2014 aluminum composite. 2539-2545A

Particulate composites, Reactions (chemical)
Interaction between nonstoichiometric titanium carbide and Fe-C alloys. 857-863B

Particulate composites, Synthesis
A study on the kinetic process of reaction synthesis of TiC. I. Experimental research and theoretical model. 1147-1151A
A study on the kinetic process of reaction synthesis of TiC. II. Theoretical analyses and numerical calculation. 1153-1157A

Particulate composites, Thermal properties
Influence of the localized initial plastic deformation on the effective thermomechanical response of metal-matrix composites. 2875-2884A

Passivation, Alloying effects
Surface oxide and the role of magnesium during the sintering of aluminum. 457-463A

Passivation, Environmental effects
The effect of water vapor on the oxidation of alloys that develop alumina scales for protection. 2905-2913A

Pearlite
Microstructure-property relations in as-extruded ultrahigh-carbon steels. 1559-1568A

Pearlite, Crystal growth
The Pitsch-Petch orientation relationship in ferrous pearlite at small undercooling. 2767-2781A

Pelleting
Optimizing the operation of straight-grate iron-ore pellet induration systems using process models. 803-813B

Penetration, Coating effects
Copper coatings for minimization of retention and permeation of implanted tritium in aluminum alloy 6061. 2191-2199A

Peritectic reactions
The neodymium-gold phase diagram. 1169-1176A

Peritectoid reactions
A numerical model of peritectoid transformation. 2563-2573A

Permanent mold casting
Relation between cooling rates and microstructures in gravity-die-cast AZ91D disks. 723-729B
The effect of Sr and Fe additions on the microstructure and mechanical properties of a direct squeeze cast Al-7Si-0.3Mg alloy. 1341-1356A

Permanent mold casting, Quality control
The heat-transfer coefficient during the unidirectional solidification of an Al-Si alloy casting. 473-482B

Permanent mold castings, Microstructure
Relation between cooling rates and microstructures in gravity-die-cast AZ91D disks. 723-729B

Permanent mold castings, Quality control
The heat-transfer coefficient during the unidirectional solidification of an Al-Si alloy casting. 473-482B

Permeability
Numerical calculation of the permeability in a dendritic mushy zone. 613-622B
Erratum to "Numerical calculation of the permeability in a dendritic mushy zone". 1107B
Experimental determination of mushy zone permeability in aluminum-copper alloys with equiaxed microstructures. 2455-2462A

Permeability, Microstructural effects
Measurement of liquid permeability in the mushy zones of aluminum-copper alloys. 745-750B

pH
Quantitative analysis of the relative basicity of CaO and BaO by silver solubility in slags. 689-694B

Phase decomposition
The neodymium-gold phase diagram. 1169-1176A

Phase decomposition, Heating effects
Microstructural evolution in a 17-4 PH stainless steel after aging at 400°C. 345-353A

Phase diagram reactions
A process model for the microstructure evolution in ductile cast iron. I. The model. 1053-1068A
A process model for the microstructure evolution in ductile cast iron. II. Applications of the model. 1069-1079A

Phase diagram reactions, Heating effects
Phase transformation of Zn-4Al-3Cu alloy during heat treatment. 917-923A

Phase diagram reactions, Pressure effects
Partial Fe-Ti alloy phase diagrams at high pressure. 3009-3011A

Phase diagram reactions, Processing effects
Directional solidification and phase equilibria in the Ni-Al system. 3167-3175A

Phase diagrams
Phase-diagram study for the Al_2O_3-CaF_2-SiO_2 system. 921-925B
Thermodynamic assessment of the Al-Fe-Si system. 1081-1095A
The neodymium-gold phase diagram. 1169-1176A
Thermodynamic modeling of the nickel-lead-tin system. 1481-1494A
Investigation of the phase equilibria in the Sn-Bi-In alloy system. 1503-1515A
Experimental and thermodynamic investigation of the Ni-Al-Mo system. 1785-1795A
Experimental investigations and thermodynamic descriptions of the Ni-Si and C-Ni-Si systems. 2409-2418A
Partial Fe-Ti alloy phase diagrams at high pressure. 3009-3011A

Phase separation
Ordering transformation and spinodal decomposition in Au-Ni alloys. 707-716A

Phase stability, Heating effects
Stabilization and two-way shape memory effect in Cu-Al-Ni single crystals. 493-499A

Phase stability, Size effects
Determination of the critical nucleus size of precipitates using the macroscopic composition gradient method. 2783-2789A

Phosphorus, Trace elements
Creep deformation and fracture of a Cr/Mo/V bolting steel containing selected trace-element additions. 2049-2058A

Photocatalysis
Photocatalytic reduction of selenate and selenite solutions using TiO_2 powders. 15-20B

Physical chemistry
Thermodynamics of iron oxide in Fe_xO-dilute $CaO+Al_2O_3+MgO+Fe_xO$ slags at 1873K. 419-427B
Thermodynamics of surfaces and adsorption in the Fe-S, Fe-N, and Fe-S-N systems at 1823K. 429-433B
Thermodynamic aspects of steel reoxidation behavior by the ladle slag system of $CaO-MgO-SiO_2-Al_2O_3-Fe_tO-MnO-P_2O_5$. 435-442B
Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes. 443-450B
A thermodynamic study of $BaO-BaF_2-Cr_2O_3$ system fluxes used for dephosphorization of chromium-containing iron melts. 451-457B
Thermodynamics of Ca-Ga alloys. 459-464B
The rate of reaction of solid iron with oxidized "FeO"-$CaO-SiO_2-Al_2O_3$ slags at 1360°C—the chemical diffusivity of iron oxide. 465-472B
A thermodynamic database for copper smelting and converting. 661-669B
Simulation of primary-slag melting behavior in the cohesive zone of a blast furnace, considering the effect of Al_2O_3, Fe_tO, and basicity in the sinter ore. 671-683B
High-temperature phase relations and thermodynamics in the iron-titanium-oxygen system. 695-705B
High-temperature phase relations and thermodynamics in the silver-tin-sulfur system. 707-714B
Investigation of the surface of the liquidus of the Fe-Ni-S system at X_s<0.51. 715-722B
Erratum:"Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes". 831B
Effect of heat and mass transfer on the thermal decomposition of $SrCO_3$ compacts. 901-908B
A study of the sulfide capacities of iron-oxide containing slags. 909-920B
Phase-diagram study for the $Al_2O_3-CaF_2-SiO_2$ system. 921-925B
The surface tension of molten aluminum and Al-Si-Mg alloy under vacuum and hydrogen atmospheres. 1027-1032B
Thermodynamic modeling of lead distribution among matte, slag, and liquid copper. 1033-1044B
Solubility of carbon in $CaO-B_2O_3$ and $BaO-B_2O_3$ slags. 1045-1052B
Dispersion of fine primary inclusions of MgO and ZrO_2 in Fe-10 mass% Ni alloy and the solidification structure. 1053-1063B
Thermodynamics of nucleation and supersaturation for the aluminum-deoxidation reaction in liquid iron. 1065-1074B
Carbothermic reduction of ilmenite ($FeTiO_3$) and rutile (TiO_2). 1075-1081B
A self-consistent model for predicting interaction parameters in multicomponent alloys. 3099-3102A
Evaluation of interaction parameters in metallic solutions by the isoactivity method. 3103-3110A

Physical simulation
Model study on mixing and mass transfer in ferroalloy refining processes. 231-239B
A mathematical model for the dynamic behavior of melts subjected to electromagnetic forces. II. Measurement of surface waves and comparison with predictions of the mathematical model. 331-339B
Spout eyes formed by an emerging gas plume at the surface of a slag-covered metal melt. 411-418B
A new hot-tearing criterion. 449-455A
Numerical calculation of the permeability in a dendritic mushy zone. 613-622B
Effects of surface flow control on fluid flow phenomena and mixing time in a bottom blown bath. 631-637B
Investigation of transient fluid flow and heat transfer in a continuous casting tundish by numerical analysis verified with nonisothermal water model experiments. 979-985B
Erratum to "Numerical calculation of the permeability in a dendritic mushy zone". 1107B
Dendritic growth tip velocities and radii of curvature in microgravity. 3177-3190A

Physical vapor deposition
Mechanism of spallation in platinum aluminide/electron beam physical vapor-deposited thermal barrier coatings. 427-435A
Mathematical modeling of a melt pool driven by an electron beam. 515-525B
Development of a diffusion barrier layer for silicon and carbon in molybdenum—a physical vapor deposition approach. 799-806A
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Pig iron, Reactions (chemical)
Evaluation of a process that uses phosphate additions to upgrade titania slag. 823-826B

Pipelines, Mechanical properties
The influence of rolling practice on notch toughness and texture development in high-strength linepipe. 3045-3054A

Plasma processing
Improvement of hardness and resistance of oxidation by electric arc alloying on ferritic steels. 3263-3265A

Plastic deformation
Observations of grain-boundary sliding and surface topography in an 8090 Al alloy after uniaxial and biaxial superplastic deformation. 53-64A
Microstructure and mechanisms of cyclic deformation in aluminum single crystals at 77K. II. Edge dislocation dipole heights. 777-779A
Deformation behavior of silicon. 1465-1479A
Solutionizing effects on deformation-induced phase transformations in 2014 aluminum composite. 2539-2545A

Plastic deformation, Composition effects
Deformation behavior of dilute SnBi (0.5 to 6 at.%) solid solutions. 123-132A
Mechanical behavior of Al-Li-SiC composites. II. Cyclic deformation. 857-867A
Mechanical behavior of Al-Li/SiC composites. III. Micromechanical modeling. 869-878A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Plastic deformation, High temperature effects
High-temperature deformation behavior of NiAl(Ti) solid-solution single crystals. 587-600A

Plastic deformation, Microstructural effects
The effect of grain size and temperature on the superplastic deformation behavior of a 7075 Al alloy. 2037-2047A
Hot working of Ti-6Al-4V via equal channel angular extrusion. 2473-2481A

Plastic deformation, Temperature effects
Influence of the temperature on the plastic deformation in TiAl. 2865-2873A
Elastic phase-strain distribution in a particulate-reinforced metal-matrix composite deforming by slip or creep. 2989-2997A

Plastic flow
Bauschinger effect and multiaxial yield behavior of stress-reversed mild steel. 3069-3078A

Plastic flow, Composition effects
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Plastic flow, Microstructural effects
Effect of initial microstructure on plastic flow and dynamic globularization during hot working of Ti-6Al-4V. 3219-3229A

Plasticity
Deformation bands, the LEDS theory, and their importance in texture development. II. Theoretical conclusions. 2391-2401A
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A

Plasticity, Composition effects
Plasticity of continuous fiber-reinforced metals. 1843-1866A

Plasticity, Processing effects
Low-cycle dwell-time fatigue in Ti-6242. 2383-2389A

Plasticity, Temperature effects
Dislocations, kink bands, and room-temperature plasticity of Ti_3SiC_2. 1727-1738A

Plating baths
Characteristics of continuous-galvanizing baths. 144-148B
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A
Studies of the morphology of the Al-rich interfacial layer formed during the hot dip galvanizing of steel sheet. 681-695A

Platinum, Diffusion
Influence of annealing on depth distributions and microstructure of ion-implanted Ti6Al4V. 2121-2127A

Platinum, Dopants
The effect of ion implanting on hydrogen entry into metals. 1535-1540A

Platinum, Recovering
Preparation of ammonium chloroplatinate by a precipitation stripping of Pt(IV)-loaded Alamine 336 or TBP. 197-203B

Platinum base alloys, Coatings
Synthesis and cyclic oxidation behavior of a (Ni, Pt)Al coating on a desulfurized Ni-base superalloy. 2679-2687A

Platinum compounds, Coatings
Synthesis and cyclic oxidation behavior of a (Ni, Pt)Al coating on a desulfurized Ni-base superalloy. 2679-2687A

Poissons ratio, Temperature effects
Temperature and composition dependence of the elastic constants of Ni_3Al. 2403-2408A

Pole figures
Prediction of yield surfaces of textured sheet metals. 377-386A

Use of microstructural statistics in predicting polycrystalline material properties. 969-979A

Polishes, Reactions (chemical)
Extraction and mutual separation of rare earths from used polishes by chemical vapor transport. 45-51B

Polishing (finishing)
Extraction and mutual separation of rare earths from used polishes by chemical vapor transport. 45-51B

Pollution abatement
Greenhouse gases and the metallurgical process industry. 841-856B
Sustainability: The materials role. 895-908A

Porosity
Fatigue and fracture of porous steels and Cu-infiltrated porous steels. 325-334A
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. I. Theoretical analysis. 361-367B
Effect of interactions between bubbles and graphite particles in copper alloy melts on microstructure formed during centrifugal casting. II. Experiments. 369-373B
Microstructural effects on high-cycle fatigue-crack initiation in A356.2 casting alloy. 2659-2666A

Porosity, Alloying effects
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. I. Initial experimental observations. 1643-1650A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. II. A phase-diagram approach. 1651-1655A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. III. A microstructural model. 1657-1662A

Porosity, Pressure effects
Pore nucleation in solidifying high-purity copper. 2449-2453A

Porosity, Processing effects
The mechanism of porous column formation during spray forming. 1679-1682A
Anomalous pore morphologies in liquid-phase-sintered Al-Zn alloys. 1682-1685A

Porosity, Welding effects
Fusion zone microstructure and porosity in electron beam welds of an $\alpha+\beta$ titanium alloy. 789-798A

Postheating
Precipitation sequence in friction stir weld of 6063 aluminum during aging. 3125-3130A

Powder coatings, Phases (state of matter)
Characterization of the W_2C phase formed during the high velocity oxygen fuel spraying of a WC+12% Co powder. 1913-1921A

Powder coatings, Synthesis
Nickel monoaluminide coating on ultralow-carbon steel by reactive sintering. 1605-1612A

Powder compacts, Mechanical properties
Hot explosive compaction of Mo-Ti alloys. 2483-2489A

Powder compacts, Phase transformations
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the $\alpha+\gamma$-phase field. 751-761A

Powder metallurgy
Considering particle morphology in a constitutive model for metal powders compaction. 1159-1162A
Influence of cold rolling and strain rate on plastic response of powder metallurgy and chemical vapor deposition rhenium. 2641-2648A

Powder metallurgy parts, Mechanical properties
Fatigue and fracture of porous steels and Cu-infiltrated porous steels. 325-334A

Powder spraying
Characterization of the W_2C phase formed during the high velocity oxygen fuel spraying of a WC+12% Co powder. 1913-1921A

Precipitates
The effects of grain-refining precipitates on the development of toughness in 4340 steel. 93-114A
Precipitate-induced plastic anisotropy: explicit solutions of the plastic anisotropy due to plate-shaped precipitates. 1283-1288A
Prediction and characterization of variant electron diffraction patterns for γ'' and δ precipitates in an Inconel 718 alloy. 2297-2303A
Microstructure and texture effect on the thermal expansion of a variously aged polycrystalline superalloy IN738LC. 2803-2808A

Precipitates, Crystal growth
Precipitation of an intermetallic phase with Pt_2Mo-type structure in alloy 625. 41-52A
Formation of α phase in the massive and feathery γ-TiAl alloys during aging in the single α field. 2591-2598A

Precipitates, Welding effects
Microstructural evolution of 6063 aluminum during friction-stir welding. 2429-2437A

Precipitation
Precipitation of an intermetallic phase with Pt_2Mo-type structure in alloy 625. 41-52A
A solution chemistry approach to the study of rare earth element precipitation by oxalic acid. 189-195B
Preparation of ammonium chloroplatinate by a precipitation stripping of Pt(IV)-loaded Alamine 336 or TBP. 197-203B
An analytical electron microscopy study of paraequilibrium cementite precipitation in ultra-high-strength steel. 501-512A
Secondary carbide precipitation in a directionally solidified cobalt-base superalloy. 513-520A
Characterization and modeling of the precipitation of the sigma phase in Udimet 720 and Udimet 720LI. 521-533A
Study of precipitation kinetics in a super purity Al-0.8% Mg-0.9% Si alloy using differential scanning calorimetry. 879-884A
The precipitation of hematite from ferric chloride media at atmospheric pressure. 993-1001B
Precipitate-induced plastic anisotropy: explicit solutions of the plastic anisotropy due to plate-shaped precipitates. 1283-1288A
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A
Prediction and characterization of variant electron diffraction patterns for γ'' and δ precipitates in an Inconel 718 alloy. 2297-2303A
Formation of α phase in the massive and feathery γ-TiAl alloys during aging in the single α field. 2591-2598A
Determination of the critical nucleus size of precipitates using the macroscopic composition gradient method. 2783-2789A

Precipitation, Coating effects
Characterization of the W_2C phase formed during the high velocity oxygen fuel spraying of a WC+12% Co powder. 1913-1921A

Precipitation, Deformation effects
Effect of cold rolling on the precipitation behavior of δ phase in Inconel 718. 31-40A
Solutionizing effects on deformation-induced phase transformations in 2014 aluminum composite. 2539-2545A

Precipitation, Heating effects
Microstructural evolution in a 17-4 PH stainless steel after aging at 400°C. 345-353A
Aluminum nitride precipitation and texture development in batch-annealed bake-hardening steel. 1663-1673A
The effects of preaging treatments on aging kinetics and mechanical properties in AA6111 aluminum autobody sheet. 1999-2006A
The microstructural evolution in Ti-Al-Nb O+bcc orthorhombic alloys. I. 2305-2323A
Mechanism of the formation of lamellar $M_{23}C_6$ at and near twin boundaries in austenitic stainless steels. 2791-2801A

Precipitation, Welding effects
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A
Microstructural evolution of 6063 aluminum during friction-stir welding. 2429-2437A

Precipitation hardening
Aging behavior of an Al-Li-Cu-Mg-Zr alloy. 741-749A

Precipitation hardening, Alloying effects
Effect of cold rolling and annealing on the structure of γ'' precipitates in a Ni-18Cr-16Fe-5Nb-3Mo alloy. 1923-1931A

Precipitation hardening, Composition effects
Microstructure and mechanical behavior of spray-deposited high-Li Al-Li alloys. 1381-1389A

Precipitation hardening alloys, Mechanical properties
Low-cycle fatigue crack initiation and break in strain-life curve of Al-Li 8090 alloy. 887-890A

Precipitation hardening alloys, Phase transformations
Study of precipitation kinetics in a super purity Al-0.8% Mg-0.9% Si alloy using differential scanning calorimetry. 879-884A

Precipitation hardening alloys, Structural hardening
Aging behavior of an Al-Li-Cu-Mg-Zr alloy. 741-749A

Precipitation hardening steels, Mechanical properties
Growth of small fatigue cracks in PH 13-8 Mo stainless steel. 1289-1300A

Precipitation hardening steels, Phase transformations
Microstructural evolution in a 17-4 PH stainless steel after aging at 400°C. 345-353A
An analytical electron microscopy study of paraequilibrium cementite precipitation in ultra-high-strength steel. 501-512A

Precipitation heat treatment
Influence of secondary precipitates and crystallographic orientation on the strength of single crystals of a Ni-based superalloy. 1249-1259A

Precipitation heat treatment, Welding effects
Precipitation sequence in friction stir weld of 6063 aluminum during aging. 3125-3130A

Preferred orientation
Thermal expansion of morphologically textured short-fiber composites. 203-212A

Prestraining
Yield behavior of a mild steel after prestraining and aging under reversed stress. 411-416A
Improvement of the resistance to stress corrosion cracking in austenitic stainless steels by cyclic prestraining. 1327-1331A

Printed circuits, Surface finishing
Electrochemical interfacial phenomena under microgravity. I. Anodic dissolution of copper in drop shaft. 99-105B

Probes, Coating
Nonstationary hot wire method with silica-coated probe for measuring thermal conductivities of molten metals. 1971-1979A

Probes, Development
Development and calibration of a Karman vortex probe for measurement of molten-steel velocities. 53-59B

Probes, Magnetic properties
Toward a probe for velocity measurement in molten metals at high temperatures. 623-630B

Process control
Characteristics of continuous-galvanizing baths. 144-148B
Erratum: Investigation of inclusion re-entrainment from the steel-slag interface. 149B
Optimizing the operation of straight-grate iron-ore pellet induration systems using process models. 803-813B

Process parameters
Strategies for optimal operation of the tellurium electrowinning process. 5-13B

Protective coatings, Chemical analysis
Distribution of aluminum in hot-dip galvanized coatings. 3031-3044A

Protective coatings, Corrosion
Protection of beryllium metal against microbial influenced corrosion using silane self-assembled monolayers. 2129-2134A

Protective coatings, Crystal growth
Rapid epitaxial growth of conducting and insulating III-V compounds on (001), (110), (111)A, and (311)B surfaces by hydride vapour phase epitaxy. 1047-1051A

Protective coatings, Diffusion
Development of a diffusion barrier layer for silicon and carbon in molybdenum—a physical vapor deposition approach. 799-806A

Protective coatings, Irradiation
Effect of flux addition on the microstructure and hardness of TiC-reinforced ferrous surface composite layers fabricated by high-energy electron beam irradiation. 3131-3141A

Protective coatings, Oxidation
Synthesis and cyclic oxidation behavior of a (Ni, Pt)Al coating on a desulfurized Ni-base superalloy. 2679-2687A

Pseudoelasticity
Strain dependence of pseudoelastic hysteresis of NiTi. 1275-1282A
Pseudoelastic behavior of a CuAlNi single crystal under uniaxial loading. 1933-1943A

Pulleys, Mechanical properties
Analysis and prevention of cracking phenomenon occurring during cold forging of two AISI 1010 steel pulleys. 81-92A

Purification
Simulation of the removal of arsenic during the roasting of copper concentrate. 393-401B
Selective removal of iron contaminations from zinc-chloride melts by cementation with zinc. 607-611B

Purity, Processing effects
Strategies for optimal operation of the tellurium electrowinning process. 5-13B

Pyrolysis
Effect of heat and mass transfer on the thermal decomposition of $SrCO_3$ compacts. 901-908B

Pyrometallurgy
Experimental study of phase equilibria in the system PbO-ZnO-SiO_2. 21-27B
Thermodynamics of TiO_x in blast furnace-type slags. 29-43B
Extraction and mutual separation of rare earths from used polishes by chemical vapor transport. 45-51B
Studies on the chlorination of zircon. I. Static bed investigations. 205-213B
A study of the reduction rate of FeO in slag by solid carbon. 215-221B
Kinetics of chlorination of zirconia in mixture with petroleum coke by chlorine gas. 375-381B
Chlorination and carbochlorination of magnesium oxide. 383-391B
Simulation of the removal of arsenic during the roasting of copper concentrate. 393-401B
Titanium powder prepared by magnesiothermic reduction of Ti^{2+} in molten salt. 403-410B
Chlorination of chalcopyrite concentrates. 567-576B
A study of chromite carbochlorination kinetics. 577-587B
Thermodynamics of the miscibility gap in the Ag-Se system. 589-595B
The effect of Al_2O_3 on liquidus temperatures of fayalite slags. 597-605B
Thermodynamics and phase equilibria involving the spinel solid solution $Fe_xMg_{1-x}Cr_2O_4$. 865-871B
Reduction of iron-silicon-oxysulfide by CO gas injection. 873-875B
Nonisothermal gravimetric investigation on kinetics of reduction of magnesia by aluminum. 1003-1008B
Kinetics of oxychlorination of magnesium oxide. 1009-1015B
The effect of MgO on liquidus temperatures of fayalite slags. 1017-1026B

Quenching (cooling)
Fatigue and fracture of porous steels and Cu-infiltrated porous steels. 325-334A
Analysis of temperature and microstructure in the quenching of steel cylinders. 815-822B

Quenching and tempering
The role of heat treating on the sour gas resistance of an X-80 steel for oil and gas transport. 2419-2428A
Creep-rupture behavior of forged, thick section 9Cr-1Mo ferritic steel. 2825-2834A

Radioactive waste
Preparation and physical characteristics of a lithium-beryllium-substituted fluorapatite. 147-153A

Rapid solidification
Closure-affected fatigue crack propagation behaviors of powder metallurgy-processed Al-Li alloys in various environments. 2097-2102A
Superheating behavior of NiAl: Authors' reply. 3265A

Rare earth metals, Binary systems
The neodymium-gold phase diagram. 1169-1176A

Rare earth metals, Recovering
Extraction and mutual separation of rare earths from used polishes by chemical vapor transport. 45-51B
A solution chemistry approach to the study of rare earth element precipitation by oxalic acid. 189-195B

Reaction kinetics
A method for extracting phase change kinetics from dilation for multistep transformations: austenitization of a low carbon steel. 107-117B
Activity coefficient of nickel oxide in BaO-based slags. 143-144B
Studies on the chlorination of zircon. I. Static bed investigations. 205-213B
A study of the reduction rate of FeO in slag by solid carbon. 215-221B
Kinetics and mechanism of electroless copper deposition at moderate-to-high copper ion and low-to-moderate formaldehyde concentrations. 223-229B
Kinetics of simultaneous reactions between liquid iron-carbon alloys and slags containing MnO. 279-286B
Influence of pellet composition and structure on carbothermic reduction of silica. 295-306B
Simultaneous oxidation and sigma-phase formation in a stainless steel. 355-362A
Kinetics of chlorination of zirconia in mixture with petroleum coke by chlorine gas. 375-381B
Chlorination and carbochlorination of magnesium oxide. 383-391B
Titanium powder prepared by magnesiothermic reduction of Ti^{2+} in molten salt. 403-410B
The rate of reaction of solid iron with oxidized "FeO"-CaO-SiO_2-Al_2O_3 slags at 1360°C—the chemical diffusivity of iron oxide. 465-472B
An analytical electron microscopy study of paraequilibrium cementite precipitation in ultra-high-strength steel. 501-512A
Characterization and modeling of the precipitation of the sigma phase in Udimet 720 and Udimet 720LI. 521-533A
Chlorination of chalcopyrite concentrates. 567-576B
A study of chromite carbochlorination kinetics. 577-587B
Evaluation of a process that uses phosphate additions to upgrade titania slag. 823-826B
Interaction between nonstoichiometric titanium carbide and Fe-C alloys. 857-863B
Experimental evidence for electrochemical nature of the reaction between iron oxide in calcia-silica-alumina slag and carbon in liquid iron. 877-889B
Study of precipitation kinetics in a super purity Al-0.8% Mg-0.9% Si alloy using differential scanning calorimetry. 879-884A
Kinetics of homogeneous martensitic nucleation in iron-based alloys. 884-887A
Nonisothermal gravimetric investigation on kinetics of reduction of magnesia by aluminum. 1003-1008B
Kinetics of oxychlorination of magnesium oxide. 1009-1015B
Thermodynamic modeling of lead distribution among matte, slag, and liquid copper. 1033-1044B
A process model for the microstructure evolution in ductile cast iron. I. The model. 1053-1068A
A process model for the microstructure evolution in ductile cast iron. II. Applications of the model. 1069-1079A
Carbothermic reduction of ilmenite ($FeTiO_3$) and rutile (TiO_2). 1075-1081B
Triggering steam explosions of single drops of a molten ferro-silicon alloy with a simple encapsulated mechanical impactor. 1083-1088B
A study on the kinetic process of reaction synthesis of TiC. I. Experimental research and theoretical model. 1147-1151A

A study on the kinetic process of reaction synthesis of TiC. II. Theoretical analyses and numerical calculation. 1153-1157A
Investigation of microstructural coarsening in Sn-Pb alloys. 1541-1547A
Mechanism of surface modification of the Ti-6Al-4V alloy using a gas tungsten arc heat source. 1597-1603A

Reaction kinetics, Deformation effects
Effect of cold rolling on the precipitation behavior of δ phase in Inconel 718. 31-40A

Reaction kinetics, Field effects
Dendritic growth tip velocities and radii of curvature in microgravity. 3177-3190A

Reaction kinetics, Heating effects
Influence of the Mn content on the kinetics of austempering transformation in compacted graphite cast iron. 2745-2752A

Reaction kinetics, Pressure effects
Partial Fe-Ti alloy phase diagrams at high pressure. 3009-3011A

Reaction mechanisms
A solution chemistry approach to the study of rare earth element precipitation by oxalic acid. 189-195B
Preparation of ammonium chloroplatinate by a precipitation stripping of Pt(IV)-loaded Alamine 336 or TBP. 197-203B
Kinetics and mechanism of electroless copper deposition at moderate-to-high copper ion and low-to-moderate formaldehyde concentrations. 223-229B
A study of chromite carbochlorination kinetics. 577-587B
Evaluation of a process that uses phosphate additions to upgrade titania slag. 823-826B
Rate of reduction of Fe_tO-SiO_2-TiO_2 melts with CO gas. 827-829B
Experimental evidence for electrochemical nature of the reaction between iron oxide in calcia-silica-alumina slag and carbon in liquid iron. 877-889B
A study of the sulfide capacities of iron-oxide containing slags. 909-920B
The precipitation of hematite from ferric chloride media at atmospheric pressure. 993-1001B
Nonisothermal gravimetric investigation on kinetics of reduction of magnesia by aluminum. 1003-1008B
Kinetics of oxychlorination of magnesium oxide. 1009-1015B
Carbothermic reduction of ilmenite ($FeTiO_3$) and rutile (TiO_2). 1075-1081B
A study on the kinetic process of reaction synthesis of TiC. I. Experimental research and theoretical model. 1147-1151A
A study on the kinetic process of reaction synthesis of TiC. II. Theoretical analyses and numerical calculation. 1153-1157A

Recrystallization
Pattern formation during stationary heating and zone melting recrystallization of a silicon thin film. 807-813A
On the origin of the R orientation in the recrystallization textures of aluminum alloys. 1517-1527A
Recrystallization activation energy in mechanically alloyed oxide-dispersion-strengthened metals measured by differential scanning calorimetry. 1885-1887A

Recrystallization, Heating effects
Aluminum nitride precipitation and texture development in batch-annealed bake-hardening steel. 1663-1673A

Recrystallization, Welding effects
Microstructural evolution of 6063 aluminum during friction-stir welding. 2429-2437A

Recycling
Sustainability: the materials role. 157-170B

Refining
Effects of surface flow control on fluid flow phenomena and mixing time in a bottom blown bath. 631-637B

Relaxation
Fifty-year study of grain-boundary relaxation. 2267-2295A

Residual stress
The influence of internal stresses on the fracture toughness of α/β titanium alloys. 2853-2863A

Residual stress, Welding effects
Comparison of three different techniques for measuring the residual stresses in an electron beam-welded plate of Waspaloy. 1797-1808A

Resistivity, Processing effects
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A

Retained austenite
Deformation of metastable austenite and resulting properties during the ausform-finishing of 1% carburized AISI 9310 steel gears. 183-193A

Reviews
Deformation behavior of silicon. 1465-1479A

Rhenium, Rolling
Influence of cold rolling and strain rate on plastic response of powder metallurgy and chemical vapor deposition rhenium. 2641-2648A

Rods, Casting
A three-dimensional cellular automation-finite element model for the prediction of solidification grain structures. 3153-3165A

Rolling
Solutionizing effects on deformation-induced phase transformations in 2014 aluminum composite. 2539-2545A

Rolling mill rolls, Mechanical properties
Composition, microstructure, hardness, and wear properties of high-speed steel rolls. 399-409A

Rolling texture
On the origin of the R orientation in the recrystallization textures of aluminum alloys. 1517-1527A
The influence of rolling practice on notch toughness and texture development in high-strength linepipe. 3045-3054A

Room temperature
Indentation power-law creep of high-purity indium. 601-610A
A fine γ'+α cellular structure in Fe-37.3 wt.% Ni-3.6 wt.% Al-3.3 wt.% Ti-0.2 wt.% C and its influence on high-temperature tensile properties. 1495-1501A

Rupturing, Alloying effects
The effects of Mg microadditon on the mechanical behavior and fracture mechanism of MAR-M247 superalloy at elevated temperatures. 551-561A

Rutile, Reactions (chemical)
Evaluation of a process that uses phosphate additions to upgrade titania slag. 823-826B

Rutile, Reduction (chemical)
Carbothermic reduction of ilmenite ($FeTiO_3$) and rutile (TiO_2). 1075-1081B

Sandblasting
Erosion of SS41 steel by sand blasting. 941-948A

Sandwich construction, Forging
Open-die forging of structurally porous sandwich panels. 2689-2699A

Sapphire, Composite materials
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A

Scale (corrosion), Coating effects
Synthesis and cyclic oxidation behavior of a (Ni, Pt)Al coating on a desulfurized Ni-base superalloy. 2679-2687A

Scandium, Alloying additive
Microalloying of C, Ni, and Ce in an advanced Al-Zn-Mg-Cu alloy. 1017-1024A

Screw dislocations
A general numerical method to solve for dislocation configurations. 2073-2087A

Secondary hardening
An analytical electron microscopy study of paraequilibrium cementite precipitation in ultra-high-strength steel. 501-512A

Sedimentation, Processing effects
Settling of multisized clusters of alumina particules in liquid aluminum. 241-247B

Segregations
A mathematical model for surface segregation in aluminum direct chill casting. 135-142B
Simulation of convection and macrosegregation in a large steel ingot. 1357-1366A
Grain refinement of aluminum alloys. I. The nucleant and solute paradigms—a review of the literature. 1613-1623A
Grain refinement of aluminum alloys. II. Confirmation of, and a mechanism for, the solute paradigm. 1625-1633A
Macrosegregation caused by thermosolutal convection during directional soldification of Pb-Sb alloys. 2167-2171A
A unified model of microsegregation and coarsening. 2183-2189A

Segregations, Diffusion effects
Approximate models of microsegregation with coarsening. 3016-3019A

Segregations, Field effects
Suppression of channel convection in solidifying Pb-Sn alloys via an applied magnetic field. 1809-1815A

Selenium, Binary systems
Thermodynamics of the miscibility gap in the Ag-Se system. 589-595B

Selenium, Extraction
Photocatalytic reduction of selenate and selenite solutions using TiO_2 powders. 15-20B

Selenium compounds, Reduction (chemical)
Photocatalytic reduction of selenate and selenite solutions using TiO_2 powders. 15-20B

Self-propagating synthesis
Micropyretic synthesis studies of Ni-, Al-, Ti-, and Nb-containing alloys. 171-188B
Thermal analysis of self-propagating high-temperature reactions in titanium, boron, and aluminum powder compacts. 781-788A
Field-activated combustion synthesis of titanium aluminides. 1101-1108A

Nickel monoaluminide coating on ultralow-carbon steel by reactive sintering. 1605-1612A
Hot explosive compaction of Mo-Ti alloys. 2483-2489A

Semi-solid processing
Mechanical behavior of aluminum matrix composite during extrusion in the semisolid state. 1137-1146A

Semiconductors, Coating
Rapid epitaxial growth of conducting and insulating III-V compounds on (001), (110), (111)A, and (311)B surfaces by hydride vapour phase epitaxy. 1047-1051A

Separation
Recycling of aluminum matrix composites. 839-844A
Study of electromagnetic separation of nonmetallic inclusions from aluminum melt. 2979-2988A

Serrated yielding
Computer simulation of annealing and recovery effects on serrated flow in some Al-Mg alloys. 387-397A
On the occurrence of dynamic strain aging in near-alpha alloy Ti-5.8Al-4Sn-3.5Zr-0.7Nb-0.5Mo-0.35Si. 2547-2549A

Shape memory
Magnetic transformation of Ni_2AlMn Heusler-type shape memory alloys. 2721-2723A

Shape memory, Alloying effects
Improvement of shape memory effect in Fe-Mn-Si-Cr-Ni alloys. 2599-2604A

Shape memory alloys, Phase transformations
Stabilization and two-way shape memory effect in Cu-Al-Ni single crystals. 493-499A
Microstructure and martensitic transformations in a dual-phase α/β Cu-Zn alloy. 729-739A
Strain dependence of pseudoelastic hysteresis of NiTi. 1275-1282A
Improvement of shape memory effect in Fe-Mn-Si-Cr-Ni alloys. 2599-2604A
Transformation behavior of sintered porous NiTi alloys. 2753-2756A

Shear modulus, Temperature effects
Temperature and composition dependence of the elastic constants of Ni_3Al. 2403-2408A

Shear stress, Heating effects
Interface characterization of duplex metal-coated SiC fiber-reinforced Ti-15-3 matrix composites. 653-666A

Sheet metal, Coating
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A
Studies of the morphology of the Al-rich interfacial layer formed during the hot dip galvanizing of steel sheet. 681-695A

Sheet metal, Metal working
Prediction of yield surfaces of textured sheet metals. 377-386A

Sheet metal, Microstructure
Ultrasonic measurement of the Kearns texture factors in Zircaloy, zirconium, and titanium. 1981-1988A

Shock
Shock-induced reaction synthesis of isomorphous (Cu-Ni) and immiscible (Cu-Nb) compounds. 1367-1379A

Shot peening
Low-cycle dwell-time fatigue in Ti-6242. 2383-2389A

Shrinkage
Modeling the fluid-flow-induced stress and collapse in a dendritic network. 287-293B

Shrinkage, Alloying effects
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. I. Initial experimental observations. 1643-1650A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. II. A phase-diagram approach. 1651-1655A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. III. A microstructural model. 1657-1662A

Shrinkage, Processing effects
A study on laser sintering of Fe-Cu powder compacts. 2229-2235A

Sigma phase, Crystal growth
Simultaneous oxidation and sigma-phase formation in a stainless steel. 355-362A
Characterization and modeling of the precipitation of the sigma phase in Udimet 720 and Udimet 720LI. 521-533A

Silicates, Reactions (chemical)
An interacting pair model for alkaline binary and ternary liquid silicates: application to the systems Na_2O-K_2O-SiO_2. 67-74B

Silicides, Coatings
Oxidation behavior of niobium aluminide intermetallics protected by aluminide and silicide diffusion coatings. 495-504B
Synthesis and characterizatiion of Ti-Si-C-N films. 2439-2447A

Silicides, Composite materials
Fabrication and evaluation of Nb/Nb_5Si_3 microlaminate foils. 2959-2965A

Silicides, Crystal growth
Growth of silicides and interdiffusion in the Mo-Si system. 545-550A

Silicides, Mechanical properties
Dislocations, kink bands, and room-temperature plasticity of Ti_3SiC_2. 1727-1738A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Silicides, Thin films
Development of a diffusion barrier layer for silicon and carbon in molybdenum—a physical vapor deposition approach. 799-806A

Silicon, Composite materials
Reactive infiltration of silicon melt through microporous amorphous carbon preforms. 933-944B

Silicon, Crystal growth
Dendrite growth processes of silicon and germanium from highly undercooled melts. 1333-1339A
Discussion of "Dendrite growth processes of silicon and germanium from highly undercooled melts" and authors' reply. 3011-3016A

Silicon, Diffusion
Growth of silicides and interdiffusion in the Mo-Si system. 545-550A
Multicomponent diffusion simulation based on finite elements. 2575-2582A

Silicon, Mechanical properties
Deformation behavior of silicon. 1465-1479A

Silicon, Ternary systems
Thermodynamic assessment of the Al-Fe-Si system. 1081-1095A
Experimental investigations and thermodynamic descriptions of the Ni-Si and C-Ni-Si systems. 2409-2418A

Silicon, Thin films
Pattern formation during stationary heating and zone melting recrystallization of a silicon thin film. 807-813A

Silicon carbide, Composite materials
Thermal expansion of morphologically textured short-fiber composites. 203-212A
Observation of fatigue damage process in SiC fiber-reinforced Ti-15-3 composite at high temperature. 221-229A
Effect of in situ material properties on fatigue damage modes in titanium matrix composites. 255-266A
Fatigue crack growth in Ti-matrix composites with spatially varied interfaces. 267-275A
Elastic shielding during fatigue-crack growth of titanium matrix composites. 277-286A
Evaluation of the MMCLIFE 3.0 code in predicting crack growth in titanium aluminide composites. 287-299A
Transverse creep of SiC/Ti-6Al-4V fiber-reinforced metal matrix composites. 301-306A
Degradation of residual strength in SCS-6/Ti-15-3 due to fully reversed fatigue. 307-313A
Fundamental aspects of creep in metal matrix composites. 315-324A
Interface characterization of duplex metal-coated SiC fiber-reinforced Ti-15-3 matrix composites. 653-666A
Monkman-Grant analysis of creep fracture in dispersion-strengthened and particulate-reinforced aluminum. 829-838A
Recycling of aluminum matrix composites. 839-844A
Mechanical behavior of Al-Li-SiC composites. I. Microstructure and tensile deformation. 845-855A
Mechanical behavior of Al-Li-SiC composites. II. Cyclic deformation. 857-867A
Mechanical behavior of Al-Li/SiC composites. III. Micromechanical modeling. 869-878A
Reactive infiltration of silicon melt through microporous amorphous carbon preforms. 933-944B
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A
Mechanical behavior of aluminum matrix composite during extrusion in the semisolid state. 1137-1146A
Fatigue in selectively fiber-reinforced titanium matrix composites. 2237-2248A
Effect of fiber spatial arrangement on the transverse strength of titanium matrix composites. 2513-2522A
Dry sliding wear behavior of A356-15% SiC_p composites under controlled atmospheric conditions. 2523-2538A
Wear of Al-based hybrid composites containing BN and SiC particulates. 2551-2555A
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A
Influence of the localized initial plastic deformation on the effective thermomechanical response of metal-matrix composites. 2875-2884A
Modeling of composite growth in the directed aluminum melt nitridation process. 2951-2958A
Tensile properties of duplex metal-coated SiC fiber and titanium alloy matrix composites. 3019-3024A

Silicon carbide, Reactions (chemical)
Influence of pellet composition and structure on carbothermic reduction of silica. 295-306B

Silicon carbide, Thin films
Development of a diffusion barrier layer for silicon and carbon in molybdenum—a physical vapor deposition approach. 799-806A

Silicon dioxide, Coatings
Nonstationary hot wire method with silica-coated probe for measuring thermal conductivities of molten metals. 1971-1979A

Silicon dioxide, Composite materials
The effect of shot particles on the fatigue of Kaowool fiber-reinforced 339 aluminum. 195-201A
Correlation of tensile strength with fracture modes of KAOWOOL- and SAFFIL-reinforced 339 aluminum. 815-824A
The tensile strength of 339 aluminum reinforced with kaowool fibers: a comparison of T5 and T6 heat treatments. 1835-1841A

Silicon dioxide, Reactions (chemical)
Influence of pellet composition and structure on carbothermic reduction of silica. 295-306B
Rate of reduction of Fe_tO-SiO_2-TiO_2 melts with CO gas. 827-829B
A study of the sulfide capacities of iron-oxide containing slags. 909-920B
Phase-diagram study for the Al_2O_3-CaF_2-SiO_2 system. 921-925B

Silicon dioxide, Ternary systems
Experimental study of phase equilibria in the system PbO-ZnO-SiO_2. 21-27B

Silicon manganese steels, Diffusion
Multicomponent diffusion simulation based on finite elements. 2575-2582A

Silicon nitride, Composite materials
Fabrication and characteristics of AA6061/Si_3N_{4p} composite by the pressureless infiltration technique. 2999-3007A

Silicon steels, Phase transformations
Bainite transformation temperatures in high-silicon steels. 909-916A

Silver, Binary systems
Thermodynamics of the miscibility gap in the Ag-Se system. 589-595B
The neodymium-gold phase diagram. 1169-1176A
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A

Silver, Composite materials
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A

Silver, Solubility
Quantitative analysis of the relative basicity of CaO and BaO by silver solubility in slags. 689-694B

Silver, Ternary systems
High-temperature phase relations and thermodynamics in the silver-tin-sulfur system. 707-714B

Simulation
Simulation of the removal of arsenic during the roasting of copper concentrate. 393-401B
Analyses of the dynamic processes of liquid metal filtration. 891-900B
The Alstruc microstructure solidification model for industrial aluminum alloys. 2135-2146A

Single crystals, Mechanical properties
The equilibrium concentration of hydrogen atoms ahead of a mixed mode I-mode III crack tip in single crystal iron. 155-159A
Microstructure and mechanisms of cyclic deformation in aluminum single crystals at 77K. II. Edge dislocation dipole heights. 777-779A
Influence of secondary precipitates and crystallographic orientation on the strength of single crystals of a Ni-based superalloy. 1249-1259A

Sintered compacts, Mechanical properties
Combined effects of time and temperature on strength evolution using integral work-of-sintering concepts. 465-470A

Sintered compacts, Oxidation
Surface oxide and the role of magnesium during the sintering of aluminum. 457-463A

Sintering (powder metallurgy)
Surface oxide and the role of magnesium during the sintering of aluminum. 457-463A
Combined effects of time and temperature on strength evolution using integral work-of-sintering concepts. 465-470A
A study on laser sintering of Fe-Cu powder compacts. 2229-2235A
Transformation behavior of sintered porous NiTi alloys. 2753-2756A

Slab casting, Quality control
The challenge of quality in continuous casting processes. 553-566B

Slags, Reactions (chemical)
Thermodynamics of TiO_x in blast furnace-type slags. 29-43B
Activity coefficient of nickel oxide in BaO-based slags. 143-144B
Erratum: Investigation of inclusion re-entrainment from the steel-slag interface. 149B
Kinetics of simultaneous reactions between liquid iron-carbon alloys and slags containing MnO. 279-286B
Thermodynamics of iron oxide in Fe_xO-dilute $CaO+Al_2O_3+MgO+Fe_xO$ slags at 1873K. 419-427B
Thermodynamic aspects of steel reoxidation behavior by the ladle slag system of CaO-MgO-SiO_2-Al_2O_3-Fe_tO-MnO-P_2O_5. 435-442B
The rate of reaction of solid iron with oxidized "FeO"-CaO-SiO_2-Al_2O_3 slags at 1360°C—the chemical diffusivity of iron oxide. 465-472B
The effect of Al_2O_3 on liquidus temperatures of fayalite slags. 597-605B
A thermodynamic database for copper smelting and converting. 661-669B
Simulation of primary-slag melting behavior in the cohesive zone of a blast furnace, considering the effect of Al_2O_3, Fe_tO, and basicity in the sinter ore. 671-683B
High-temperature phase relations and thermodynamics in the iron-titanium-oxygen system. 695-705B
Evaluation of a process that uses phosphate additions to upgrade titania slag. 823-826B
Rate of reduction of Fe_tO-SiO_2-TiO_2 melts with CO gas. 827-829B
Experimental evidence for electrochemical nature of the reaction between iron oxide in calcia-silica-alumina slag and carbon in liquid iron. 877-889B
A study of the sulfide capacities of iron-oxide containing slags. 909-920B
Phase-diagram study for the Al_2O_3-CaF_2-SiO_2 system. 921-925B
The effect of MgO on liquidus temperatures of fayalite slags. 1017-1026B
Thermodynamic modeling of lead distribution among matte, slag, and liquid copper. 1033-1044B

Slags, Solubility
Quantitative analysis of the relative basicity of CaO and BaO by silver solubility in slags. 689-694B
Solubility of carbon in CaO-B_2O_3 and BaO-B_2O_3 slags. 1045-1052B

Sliding friction
Interplay between oxidation and wear behavior of the Ti-48Al-2Cr-2Nb-1B alloy. 2019-2026A

Sliding friction, Environmental effects
Dry sliding wear behavior of A356-15% SiC_p composites under controlled atmospheric conditions. 2523-2538A

Slip
High-temperature deformation behavior of an Al-8.4Fe-3.6Ce dispersion-strengthened material. 371-376A
Evidence of void nucleation and growth on planar slip bands in a Nb-Cr-Ti alloy. 579-585A
Slip transfer and dislocation nucleation processes in multiphase ordered Ni-Fe-Al alloys. 991-1001A

Slip, Temperature effects
Elastic phase-strain distribution in a particulate-reinforced metal-matrix composite deforming by slip or creep. 2989-2997A

Slip bands, Deformation effects
Deformation bands, the LEDS theory, and their importance in texture development. I. Previous evidence and new observations. 2491-2501A

Smelting
A study of the reduction rate of FeO in slag by solid carbon. 215-221B
Thermodynamics of the miscibility gap in the Ag-Se system. 589-595B
The effect of Al_2O_3 on liquidus temperatures of fayalite slags. 597-605B
A thermodynamic database for copper smelting and converting. 661-669B
Rate of reduction of Fe_tO-SiO_2-TiO_2 melts with CO gas. 827-829B
The effect of MgO on liquidus temperatures of fayalite slags. 1017-1026B

Softening, Welding effects
Quantitative evaluation of softened regions in weld heat-affected zones of 6061-T6 aluminum alloy—characterizing of the laser beam welding process. 2115-2120A

Solders, Mechanical properties
Solid solution creep behavior of Sn-xBi alloys. 115-122A
Deformation behavior of dilute SnBi (0.5 to 6 at.%) solid solutions. 123-132A
Time-dependent deformation behavior of near-eutectic 60Sn-40Pb solder. 1301-1313A

Solders, Microstructure
Investigation of microstructural coarsening in Sn-Pb alloys. 1541-1547A

Solders, Phases (state of matter)
Investigation of the phase equilibria in the Sn-Bi-In alloy system. 1503-1515A

Solders, Reactions (chemical)
Thermodynamic modeling of the palladium-lead-tin system. 5-18A

Solidification
Mathematical modeling of copper and brass upcasting. 75-98B
Modeling the fluid-flow-induced stress and collapse in a dendritic network. 287-293B
Least-squares adjustment of mathematical model of heat and mass transfer processes during solidification of binary alloys. 505-513B
On the mechanism of mushy layer formation during droplet-based processing. 527-539B
Numerical calculation of the permeability in a dendritic mushy zone. 613-622B
Relation between cooling rates and microstructures in gravity-die-cast AZ91D disks. 723-729B
A thermally coupled flow formulation with microstructural evolution for hypoeutectic cast-iron solidification. 731-744B

Measurement of liquid permeability in the mushy zones of aluminum-copper alloys. 745-750B
Casting-chill interface heat transfer during solidification of an aluminum alloy. 773-778B
Pattern formation during stationary heating and zone melting recrystallization of a silicon thin film. 807-813A
An analytical model for nodular eutectic grain predictions during solidification. 927-932B
A process model for the microstructure evolution in ductile cast iron. I. The model. 1053-1068A
Dispersion of fine primary inclusions of MgO and ZrO_2 in Fe-10 mass% Ni alloy and the solidification structure. 1053-1063B
A process model for the microstructure evolution in ductile cast iron. II. Applications of the model. 1069-1079A
Erratum to "Numerical calculation of the permeability in a dendritic mushy zone". 1107B
Dendrite growth processes of silicon and germanium from highly undercooled melts. 1333-1339A
Simulation of convection and macrosegregation in a large steel ingot. 1357-1366A
High-energy x-ray computed tomography of the progression of the solidification front in pure aluminum. 1403-1409A
Theoretical calculation of nucleation temperature and the undercooling behaviors of Fe-Cr alloys studied with the electromagnetic levitation method. 1827-1833A
The Alstruc microstructure solidification model for industrial aluminum alloys. 2135-2146A
Mathematical modeling of microstructural development in hypoeutectic cast iron. 2147-2158A
Experimental determination of mushy zone permeability in aluminum-copper alloys with equiaxed microstructures. 2455-2462A
Effect of the primary phase on grain coarsening in undercooled Fe-Co alloys. 2941-2949A
The effect of solidification rate on the growth of small fatigue cracks in a cast 319-type aluminum alloy. 3055-3068A
A three-dimensional cellular automation-finite element model for the prediction of solidification grain structures. 3153-3165A

Solidification, Alloying effects
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. I. Initial experimental observations. 1643-1650A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. II. A phase-diagram approach. 1651-1655A
The role of iron in the formation of porosity in Al-Si-Cu-based casting alloys. III. A microstructural model. 1657-1662A

Solidification, Composite materials
Liquid-solid partition ratios in nickel-base alloys. 2173-2181A

Solidification, Diffusion effects
Role of back-diffusion studied by computer simulation. 1635-1641A

Solidification, Field effects
Suppression of channel convection in solidifying Pb-Sn alloys via an applied magnetic field. 1809-1815A
Discussion of "Particle engulfment and pushing by solidying interfaces. II. Microgravity experiments and theoretical analysis" and authors' reply. 1887-1894A
Dendritic growth tip velocities and radii of curvature in microgravity. 3177-3190A

Solidification, Processing effects
The solidification characteristics of laser surface-remelted Fe-12Cr-nC alloys. 1817-1826A

Solution annealing
Low-cycle dwell-time fatigue in Ti-6242. 2383-2389A

Solution heat treatment
Effect of alloy preheating on the mechanical properties of as-cast Co-Cr-Mo-C alloys. 611-620A
Phase transformation of Zn-4Al-3Cu alloy during heat treatment. 917-923A
Solutionizing effects on deformation-induced phase transformations in 2014 aluminum composite. 2539-2545A
Tensile strength of thermomechanically processed Cu-9Ni-6Sn alloys. 2649-2657A
Mechanism of the formation of lamellar $M_{23}C_6$ at and near twin boundaries in austenitic stainless steels. 2791-2801A

Sour gas, Environment
The role of heat treating on the sour gas resistance of an X-80 steel for oil and gas transport. 2419-2428A

Spalling, Heating effects
Mechanism of spallation in platinum aluminide/electron beam physical vapor-deposited thermal barrier coatings. 427-435A

Spheroidal structure, Deformation effects
Atom probe and transmission electron microscopy investigations of heavily drawn pearlitic steel wire. 717-727A

Spinel, Reactions (chemical)
Thermodynamics and phase equilibria involving the spinel solid solution $Fe_xMg_{1-x}Cr_2O_4$. 865-871B

Spinodal decomposition
Ordering transformation and spinodal decomposition in Au-Ni alloys. 707-716A

Spray forming
The mechanism of porous column formation during spray forming. 1679-1682A

Sprayed coatings, Crystal growth
On the mechanism of mushy layer formation during droplet-based processing. 527-539B

Sprayed coatings, Phases (state of matter)
Characterization of the W_2C phase formed during the high velocity oxygen fuel spraying of a WC+12% Co powder. 1913-1921A

Spraying
Microstructure and mechanical behavior of spray-deposited high-Li Al-Li alloys. 1381-1389A

Sputtered coatings, Mechanical properties
Liquid impact erosion mechanism and theoretical impact stress analysis in TiN-coated steam turbine blade materials. 961-968A

Sputtered coatings, Microstructure
Synthesis and characterizatiion of Ti-Si-C-N films. 2439-2447A

Sputtering
Copper coatings for minimization of retention and permeation of implanted tritium in aluminum alloy 6061. 2191-2199A
Synthesis and characterizatiion of Ti-Si-C-N films. 2439-2447A
Fabrication and evaluation of Nb/Nb_5Si_3 microlaminate foils. 2959-2965A

Squeeze casting
The effect of Sr and Fe additions on the microstructure and mechanical properties of a direct squeeze cast Al-7Si-0.3Mg alloy. 1341-1356A

Stainless steels, Refining
A thermodynamic study of $BaO-BaF_2-Cr_2O_3$ system fluxes used for dephosphorization of chromium-containing iron melts. 451-457B

Stampings, Coating
The effects of preaging treatments on aging kinetics and mechanical properties in AA6111 aluminum autobody sheet. 1999-2006A

Steam, Reactions (chemical)
Triggering steam explosions of single drops of a molten ferro-silicon alloy with a simple encapsulated mechanical impactor. 1083-1088B

Steels, Casting
Development and calibration of a Karman vortex probe for measurement of molten-steel velocities. 53-59B
Erratum: Investigation of inclusion re-entrainment from the steel-slag interface. 149B
The challenge of quality in continuous casting processes. 553-566B
Modeling of inclusion removal in a tundish. 639-654B
Investigation of transient fluid flow and heat transfer in a continuous casting tundish by numerical analysis verified with nonisothermal water model experiments. 979-985B
Three-dimensional modeling of the flow and the interface surface in a continuous casting mold model. 1095-1105B

Steels, Coating
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A
Studies of the morphology of the Al-rich interfacial layer formed during the hot dip galvanizing of steel sheet. 681-695A
Characterization of the W_2C phase formed during the high velocity oxygen fuel spraying of a WC+12% Co powder. 1913-1921A

Steels, Heat treatment
Analysis of temperature and microstructure in the quenching of steel cylinders. 815-822B
Application of the cluster variation method to ordering in an interstitial solid soution: the γ-Fe[N]/γ-Fe_4N_{1-x} equilibrium. 1945-1953A

Steels, Machining
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Steels, Melting
Spout eyes formed by an emerging gas plume at the surface of a slag-covered metal melt. 411-418B

Steels, Microstructure
Atom probe and transmission electron microscopy investigations of heavily drawn pearlitic steel wire. 717-727A

Stirring
Height of the spout of a gas plume discharging from a metal melt. 655-660B

Strain aging
On the occurrence of dynamic strain aging in near-alpha alloy Ti-5.8Al-4Sn-3.5Zr-0.7Nb-0.5Mo-0.35Si. 2547-2549A

Strain hardening
Deformation of metastable austenite and resulting properties during the ausform-finishing of 1% carburized AISI 9310 steel gears. 183-193A
On the occurrence of dynamic strain aging in near-alpha alloy Ti-5.8Al-4Sn-3.5Zr-0.7Nb-0.5Mo-0.35Si. 2547-2549A

Strain hardening, Composition effects
Deformation behavior of dilute SnBi (0.5 to 6 at.%) solid solutions. 123-132A

Strain hardening, Microstructural effects
Influence of martensite content and morphology on tensile and impact properties of high-martensite dual-phase steels. 1193-1202A
Influence of grain size on the constitutive response and substructure evolution of Monel 400. 1235-1247A

Strain rate, Alloying effects
Influence of calcium addition on the superplastic-like behavior of extruded Al-Al_3Ni eutectic alloy. 2258-2260A

Strain softening, Composition effects
Deformation behavior of dilute SnBi (0.5 to 6 at.%) solid solutions. 123-132A

Stress analysis
Comparison of three different techniques for measuring the residual stresses in an electron beam-welded plate of Waspaloy. 1797-1808A

Stress concentration
Modeling and measurement of the notched strength of gamma titanium aluminides under monotonic loading. 949-959A

Stress concentration, Processing effects
The effect of shot particles on the fatigue of Kaowool fiber-reinforced 339 aluminum. 195-201A

Stress corrosion cracking
Hydrogen embrittlement, grain boundary segregation, and stress corrosion cracking of alloy X-750 in low- and high-temperature water. 1579-1596A
Mixed-mode hydrogen-assisted cracking of high-strength steel: the role of cyclic load history. 1882-1885A

Stress corrosion cracking, Alloying effects
Microalloying of C, Ni, and Ce in an advanced Al-Zn-Mg-Cu alloy. 1017-1024A

Stress corrosion cracking, Deformation effects
Improvement of the resistance to stress corrosion cracking in austenitic stainless steels by cyclic prestraining. 1327-1331A
Stress-corrosion cracking susceptibility of the superplastically formed 5083 aluminum alloy in 3.5% NaCl solution. 3191-3199A

Stress corrosion cracking, Heating effects
The role of heat treating on the sour gas resistance of an X-80 steel for oil and gas transport. 2419-2428A

Stress intensity
Elastic shielding during fatigue-crack growth of titanium matrix composites. 277-286A

Stress strain curves
Analysis and prevention of cracking phenomenon occurring during cold forging of two AISI 1010 steel pulleys. 81-92A
Modeling high-temperature stress-strain behavior of cast aluminum alloys. 133-146A
Yield behavior of a mild steel after prestraining and aging under reversed stress. 411-416A
Mechanical behavior of Al-Li-SiC composites. I. Microstructure and tensile deformation. 845-855A
Mechanical behavior of Al-Li-SiC composites. II. Cyclic deformation. 857-867A
Mechanical behavior of Al-Li/SiC composites. III. Micromechanical modeling. 869-878A
Influence of grain size and stacking-fault energy on deformation twinning in fcc metals. 1223-1233A
Growth of small fatigue cracks in PH 13-8 Mo stainless steel. 1289-1300A
The effect of Sr and Fe additions on the microstructure and mechanical properties of a direct squeeze cast Al-7Si-0.3Mg alloy. 1341-1356A
Pseudoelastic behavior of a CuAlNi single crystal under uniaxial loading. 1933-1943A
Microstructural refinement of an as-cast Al-12.6 wt.% Si alloy by repeated thermomechanical treatment to produce a heavily deformable material. 2221-2228A
Influence of calcium addition on the superplastic-like behavior of extruded Al-Al_3Ni eutectic alloy. 2258-2260A
Deformation bands, the LEDS theory, and their importance in texture development. I. Previous evidence and new observations. 2491-2501A
Properties of the $Ir_{85}Nb_{15}$ two-phase refractory superalloys with nickel additions. 2629-2639A
Stress-corrosion cracking susceptibility of the superplastically formed 5083 aluminum alloy in 3.5% NaCl solution. 3191-3199A
Effect of initial microstructure on plastic flow and dynamic globularization during hot working of Ti-6Al-4V. 3219-3229A

Striations, Deformation effects
Observations of grain-boundary sliding and surface topography in an 8090 Al alloy after uniaxial and biaxial superplastic deformation. 53-64A

Strontium, Alloying additive
The surface tension of molten aluminum and Al-Si-Mg alloy under vacuum and hydrogen atmospheres. 1027-1032B
The effect of Sr and Fe additions on the microstructure and mechanical properties of a direct squeeze cast Al-7Si-0.3Mg alloy. 1341-1356A

Strontium compounds, Reduction (chemical)
Effect of heat and mass transfer on the thermal decomposition of $SrCO_3$ compacts. 901-908B

Structural steels, Welding
Effect of TiN particles and microstructure on fracture toughness in simulated heat-affected zones of a structural steel. 2089-2096A

Sulfur, Reactions (chemical)
Thermodynamics of surfaces and adsorption in the Fe-S, Fe-N, and Fe-S-N systems at 1823K. 429-433B
Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes. 443-450B
Erratum:"Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes". 831B

Sulfur, Ternary systems
High-temperature phase relations and thermodynamics in the silver-tin-sulfur system. 707-714B
Investigation of the surface of the liquidus of the Fe-Ni-S system at X_S<0.51. 715-722B

Superalloys, Coating
Mechanism of spallation in platinum aluminide/electron beam physical vapor-deposited thermal barrier coatings. 427-435A
Synthesis and cyclic oxidation behavior of a (Ni, Pt)Al coating on a desulfurized Ni-base superalloy. 2679-2687A

Superalloys, Crystal growth
Recrystallization activation energy in mechanically alloyed oxide-dispersion-strengthened metals measured by differential scanning calorimetry. 1885-1887A

Superalloys, Heat treatment
Evaluation of halide-activated pack boriding of Inconel 722. 670-675A
Development of a heat treatment for a directionally solidified cobalt-base superalloy. 2251-2254A

Superalloys, Mechanical properties
The effects of Mg microadditon on the mechanical behavior and fracture mechanism of MAR-M247 superalloy at elevated temperatures. 551-561A
Liquid impact erosion mechanism and theoretical impact stress analysis in TiN-coated steam turbine blade materials. 961-968A
An intergranular creep crack growth model based on grain boundary sliding. 1039-1045A
Influence of secondary precipitates and crystallographic orientation on the strength of single crystals of a Ni-based superalloy. 1249-1259A
Hydrogen embrittlement, grain boundary segregation, and stress corrosion cracking of alloy X-750 in low- and high-temperature water. 1579-1596A
Effect of small amounts of nitrogen on properties of a Ni-based superalloy. 1755-1761A
Modeling solid-particle erosion of ductile alloys. 1763-1774A

Superalloys, Metal working
Mathematical modeling of the hot-deformation behavior of superalloy IN718. 2701-2712A

Superalloys, Metallography
Transmission x-ray diffraction of single-crystal nickel-base superalloys. 1880-1882A

Superalloys, Microstructure
Deformed microstructure of the single-crystal superalloy NASAIR 100 at 1050°C. 2843-2852A

Superalloys, Oxidation
The effect of water vapor on the oxidation of alloys that develop alumina scales for protection. 2905-2913A

Superalloys, Phase transformations
Effect of cold rolling on the precipitation behavior of δ phase in Inconel 718. 31-40A
Precipitation of an intermetallic phase with Pt_2Mo-type structure in alloy 625. 41-52A
Secondary carbide precipitation in a directionally solidified cobalt-base superalloy. 513-520A
Characterization and modeling of the precipitation of the sigma phase in Udimet 720 and Udimet 720LI. 521-533A

Superalloys, Phases (state of matter)
Prediction and characterization of variant electron diffraction patterns for γ' and δ precipitates in an Inconel 718 alloy. 2297-2303A

Superalloys, Structural hardening
Effect of cold rolling and annealing on the structure of γ' precipitates in a Ni-18Cr-16Fe-5Nb-3Mo alloy. 1923-1931A

Superalloys, Thermal properties
Microstructure and texture effect on the thermal expansion of a variously aged polycrystalline superalloy IN738LC. 2803-2808A

Superalloys, Welding
Hot cracking susceptibility of fillers 52 and 82 in alloy 690 welding. 417-426A
The thermal fatigue behavior of the combustor alloys IN 617 and Haynes 230 before and after welding. 981-989A
Comparison of three different techniques for measuring the residual stresses in an electron beam-welded plate of Waspaloy. 1797-1808A

Supercooling
Dendrite growth processes of silicon and germanium from highly undercooled melts. 1333-1339A
Effect of the primary phase on grain coarsening in undercooled Fe-Co alloys. 2941-2949A
Discussion of "Dendrite growth processes of silicon and germanium from highly undercooled melts" and authors' reply. 3011-3016A
Superheating behavior of NiAl: Authors' reply. 3265A

Superheating
Discussion of "Superheating behavior of NiAl". 1675A
Superheating behavior of NiAl: Authors' reply. 3265A

Superplastic forming
Observations of grain-boundary sliding and surface topography in an 8090 Al alloy after uniaxial and biaxial superplastic deformation. 53-64A
Stress-corrosion cracking susceptibility of the superplastically formed 5083 aluminum alloy in 3.5% NaCl solution. 3191-3199A

Superplasticity
Observations of grain-boundary sliding and surface topography in an 8090 Al alloy after uniaxial and biaxial superplastic deformation. 53-64A

Superplasticity, Alloying effects
Influence of carbon content on superplastic behavior in Ti- and B-added Cr-Mo steels. 1185-1191A
Influence of calcium addition on the superplastic-like behavior of extruded Al-Al_3Ni eutectic alloy. 2258-2260A

Superplasticity, Microstructural effects
The effect of grain size and temperature on the superplastic deformation behavior of a 7075 Al alloy. 2037-2047A

Surface alloying
Microstructure of TiB_2/carbon steel surface-alloyed materials fabricated by high-energy electron beam irradiation. 3143-3151A
Improvement of hardness and resistance of oxidation by electric arc alloying on ferritic steels. 3263-3265A

Surface chemistry, Field effects
Electrochemical interfacial phenomena under microgravity. II. Numerical analysis of the rate of ionic mass transfer accompanying anodic copper dissolution. 779-790B

Surface hardening
Surface hardening of a gray cast iron used for a diesel engine cylinder block using high-energy electron beam irradiation. 1211-1221A

Surface structure, Heating effects
Application of the cluster variation method to ordering in an interstitial solid soution: the γ-Fe[N]/γ'-Fe_4N_{1-x} equilibrium. 1945-1953A

Surface structure, Processing effects
The solidification characteristics of laser surface-remelted Fe-12Cr-nC alloys. 1817-1826A

Surface tension, Alloying effects
The surface tension of molten aluminum and Al-Si-Mg alloy under vacuum and hydrogen atmospheres. 1027-1032B

Surgical implants, Phase transformations
Formation of hcp martensite during the isothermal aging of an fcc Co-27Cr-5Mo-0.05C orthopedic implant alloy. 1177-1184A

Swaging
Tensile strength of thermomechanically processed Cu-9Ni-6Sn alloys. 2649-2657A

Tantalum, Alloying elements
Liquid-solid partition ratios in nickel-base alloys. 2173-2181A

Tantalum, Ternary systems
Experimental study and thermodynamic assessment of the Ni-Mo-Ta ternary system. 2735-2744A

Tearing
A new hot-tearing criterion. 449-455A

Tellurium, Extraction
Strategies for optimal operation of the tellurium electrowinning process. 5-13B

Temperature control
Two-dimensional dynamic simulation of the thermal state of ladles. 323-330B

Temperature distribution
Two-dimensional dynamic simulation of the thermal state of ladles. 323-330B

Tempering
The tensile strength of 339 aluminum reinforced with kaowool fibers: a comparison of T5 and T6 heat treatments. 1835-1841A

Tensile properties, Composition effects
Mechanical behavior of Al-Li-SiC composites. I. Microstructure and tensile deformation. 845-855A

Tensile properties, Processing effects
Fabrication and characteristics of AA6061/Si_3N_{4p} composite by the pressureless infiltration technique. 2999-3007A

Tensile strength
Bulk-alloy microstructural analogues for transient liquid-phase bonds in the NiAl/Cu/Ni system. 3111-3124A

Tensile strength, Alloying effects
Microalloying of C, Ni, and Ce in an advanced Al-Zn-Mg-Cu alloy. 1017-1024A
The effect of Sr and Fe additions on the microstructure and mechanical properties of a direct squeeze cast Al-7Si-0.3Mg alloy. 1341-1356A
Effect of small amounts of nitrogen on properties of a Ni-based superalloy. 1755-1761A

Tensile strength, Coating effects
Tensile properties of duplex metal-coated SiC fiber and titanium alloy matrix composites. 3019-3024A

Tensile strength, Composition effects
Degradation of residual strength in SCS-6/Ti-15-3 due to fully reversed fatigue. 307-313A
Correlation of tensile strength with fracture modes of KAOWOOL- and SAFFIL-reinforced 339 aluminum. 815-824A
Microstructure and mechanical behavior of spray-deposited high-Li Al-Li alloys. 1381-1389A
High-temperature mechanical behavior of Ti-6Al-4V alloy and TiC_p/Ti-6Al-4V composite. 1569-1578A
Effect of fiber spatial arrangement on the transverse strength of titanium matrix composites. 2513-2522A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Tensile strength, Corrosion effects
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A

Tensile strength, Cryogenic effects
Tensile behavior of rapidly solidified Al-Li-Zr and Al-Li-Cu-Mg-Zr alloys at 293 and 77K. 2254-2258A

Tensile strength, Deformation effects
Microstructures and tensile properties of an Al-12 wt.% Si alloy produced by reciprocating extrusion. 2503-2512A

Tensile strength, Heating effects
Effect of alloy preheating on the mechanical properties of as-cast Co-Cr-Mo-C alloys. 611-620A
The tensile strength of 339 aluminum reinforced with kaowool fibers: a comparison of T5 and T6 heat treatments. 1835-1841A
Development of a heat treatment for a directionally solidified cobalt-base superalloy. 2251-2254A

Tensile strength, High temperature effects
Modeling high-temperature stress-strain behavior of cast aluminum alloys. 133-146A

Tensile strength, Microstructural effects
Infuence of martensite content and morphology on tensile and impact properties of high-martensite dual-phase steels. 1193-1202A
A fine γ'+α cellular structure in Fe-37.3 wt.% Ni-3.6 wt.% Al-3.3 wt.% Ti-0.2 wt.% C and its influence on high-temperature tensile properties. 1495-1501A
Microstructure-property relations in as-extruded ultrahigh-carbon steels. 1559-1568A

Tensile strength, Processing effects
Combined effects of time and temperature on strength evolution using integral work-of-sintering concepts. 465-470A
Tensile strength of thermomechanically processed Cu-9Ni-6Sn alloys. 2649-2657A
Fabrication and evaluation of Nb/Nb_5Si_3 microlaminate foils. 2959-2965A

Tensile stress
The influence of tensile stress states on the failure of HY-100 steel. 2835-2842A

Ternary systems, Phase transformations
The influence of temperature gradients on Ostwald ripening. 2341-2348A

Ternary systems, Phases (state of matter)
Thermodynamic modeling of the palladium-lead-tin system. 5-18A

Experimental study of phase equilibria in the system PbO-ZnO-SiO_2. 21-27B
Thermodynamic calculation for alloy systems. 271-277B
High-temperature phase relations and thermodynamics in the silver-tin-sulfur system. 707-714B
Investigation of the surface of the liquidus of the Fe-Ni-S system at X_s<0.51. 715-722B
Thermodynamic assessment of the Al-Fe-Si system. 1081-1095A
Thermodynamic activities in the alloys of the Ti-Al-Nb system. 1315-1326A
Thermodynamic modeling of the nickel-lead-tin system. 1481-1494A
Investigation of the phase equilibria in the Sn-Bi-In alloy system. 1503-1515A
Experimental and thermodynamic investigation of the Ni-Al-Mo system. 1785-1795A
Experimental investigations and thermodynamic descriptions of the Ni-Si and C-Ni-Si systems. 2409-2418A
Experimental study and thermodynamic assessment of the Ni-Mo-Ta ternary system. 2735-2744A

Ternary systems, Reactions (chemical)
Evaluation of interaction parameters in metallic solutions by the isoactivity method. 3103-3110A

Texture
Thermal expansion of morphologically textured short-fiber composites. 203-212A
Use of microstructural statistics in predicting polycrystalline material properties. 969-979A
Texture evolution and the role of grain boundaries in skeletal formation during coarsening in solid-liquid mixtures. 1955-1969A
Ultrasonic measurement of the Kearns texture factors in Zircaloy, zirconium, and titanium. 1981-1988A
Microstructure and texture effect on the thermal expansion of a variously aged polycrystalline superalloy IN738LC. 2803-2808A

Texture, Deformation effects
Prediction of yield surfaces of textured sheet metals. 377-386A
Deformation bands, the LEDS theory, and their importance in texture development. II. Theoretical conclusions. 2391-2401A
Deformation bands, the LEDS theory, and their importance in texture development. I. Previous evidence and new observations. 2491-2501A

Texture, Heating effects
Aluminum nitride precipitation and texture development in batch-annealed bake-hardening steel. 1663-1673A

Thermal barriers, Coatings
Mathematical modeling of a melt pool driven by an electron beam. 515-525B

Thermal barriers, Mechanical properties
Mechanism of spallation in platinum aluminide/electron beam physical vapor-deposited thermal barrier coatings. 427-435A

Thermal conductivity
Nonstationary hot wire method with silica-coated probe for measuring thermal conductivities of molten metals. 1971-1979A

Thermal cycling
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A
Mechanism of spallation in platinum aluminide/electron beam physical vapor-deposited thermal barrier coatings. 427-435A

Thermal expansion, Composition effects
Influence of the localized initial plastic deformation on the effective thermomechanical response of metal-matrix composites. 2875-2884A

Thermal expansion, Microstructural effects
Thermal expansion of morphologically textured short-fiber composites. 203-212A
Microstructure and texture effect on the thermal expansion of a variously aged polycrystalline superalloy IN738LC. 2803-2808A

Thermal fatigue, Composite materials
Effect of residual magnesium content on thermal fatigue cracking behavior of high-silicon spheroidal graphite cast iron. 1549-1558A

Thermal fatigue, High temperature effects
Modeling high-temperature stress-strain behavior of cast aluminum alloys. 133-146A

Thermal fatigue, Welding effects
The thermal fatigue behavior of the combustor alloys IN 617 and Haynes 230 before and after welding. 981-989A

Thermodynamics
Thermodynamic modeling of the palladium-lead-tin system. 5-18A
An interacting pair model for alkaline binary and ternary liquid silicates: application to the systems Na_2O-K_2O-SiO_2. 67-74B
Thermodynamic calculation for alloy systems. 271-277B
Kinetics of simultaneous reactions between liquid iron-carbon alloys and slags containing MnO. 279-286B
Thermodynamics of yttrium and oxygen in molten zirconium. 352-354B
Thermodynamics of iron oxide in Fe_xO-dilute $CaO+Al_2O_3+MgO+Fe_xO$ slags at 1873K. 419-427B
Thermodynamics of surfaces and adsorption in the Fe-S, Fe-N, and Fe-S-N systems at 1823K. 429-433B
Thermodynamic aspects of steel reoxidation behavior by the ladle slag system of $CaO-MgO-SiO_2-Al_2O_3-Fe_tO-MnO-P_2O_5$. 435-442B
Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes. 443-450B
A thermodynamic study of $BaO-BaF_2-Cr_2O_3$ system fluxes used for dephosphorization of chromium-containing iron melts. 451-457B
Thermodynamics of Ca-Ga alloys. 459-464B
Thermodynamics of the miscibility gap in the Ag-Se system. 589-595B
A thermodynamic database for copper smelting and converting. 661-669B
High-temperature phase relations and thermodynamics in the iron-titanium-oxygen system. 695-705B
High-temperature phase relations and thermodynamics in the silver-tin-sulfur system. 707-714B
Erratum:"Model prediction of thermodynamic properties of Co-Fe-Ni-S mattes". 831B
Interaction between nonstoichiometric titanium carbide and Fe-C alloys. 857-863B
Thermodynamics and phase equilibria involving the spinel solid solution $Fe_xMg_{1-x}Cr_2O_4$. 865-871B
Thermodynamic modeling of lead distribution among matte, slag, and liquid copper. 1033-1044B
Thermodynamics of nucleation and supersaturation for the aluminum-deoxidation reaction in liquid iron. 1065-1074B
Thermodynamic assessment of the Al-Fe-Si system. 1081-1095A
Thermodynamic activities in the alloys of the Ti-Al-Nb system. 1315-1326A
Thermodynamic modeling of the nickel-lead-tin system. 1481-1494A
Experimental and thermodynamic investigation of the Ni-Al-Mo system. 1785-1795A
Thermodynamic prediction of the eutectoid transformation temperatures of low-alloy steels. 2325-2330A
Experimental investigations and thermodynamic descriptions of the Ni-Si and C-Ni-Si systems. 2409-2418A
Interaction energy between martensitic variants. 2583-2590A
Experimental study and thermodynamic assessment of the Ni-Mo-Ta ternary system. 2735-2744A
Evaluation of interaction parameters in metallic solutions by the isoactivity method. 3103-3110A

Thermomechanical treatment
Microstructural refinement of an as-cast Al-12.6 wt.% Si alloy by repeated thermomechanical treatment to produce a heavily deformable material. 2221-2228A

Thin films, Crystal growth
Pattern formation during stationary heating and zone melting recrystallization of a silicon thin film. 807-813A

Thixoforming
An induction heating process with coil design and solutions avoiding coarsening phenomena of Al-6% Si-3% Cu-0.3% Mg alloy for thixoforming. 2967-2977A

Tin, Alloying elements
Texture evolution and the role of grain boundaries in skeletal formation during coarsening in solid-liquid mixtures. 1955-1969A

Tin, Binary systems
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A
The influence of temperature gradients on Ostwald ripening. 2341-2348A

Tin, Ternary systems
Thermodynamic modeling of the palladium-lead-tin system. 5-18A
High-temperature phase relations and thermodynamics in the silver-tin-sulfur system. 707-714B
Thermodynamic modeling of the nickel-lead-tin system. 1481-1494A
Investigation of the phase equilibria in the Sn-Bi-In alloy system. 1503-1515A

Tin, Trace elements
Creep deformation and fracture of a Cr/Mo/V bolting steel containing selected trace-element additions. 2049-2058A

Tin base alloys, Mechanical properties
Solid solution creep behavior of Sn-xBi alloys. 115-122A
Deformation behavior of dilute SnBi (0.5 to 6 at.%) solid solutions. 123-132A
Time-dependent deformation behavior of near-eutectic 60Sn-40Pb solder. 1301-1313A

Tin base alloys, Microstructure
Investigation of microstructural coarsening in Sn-Pb alloys. 1541-1547A

Titanium, Alloying additive
High-temperature deformation behavior of NiAl(Ti) solid-solution single crystals. 587-600A
Influence of carbon content on superplastic behavior in Ti- and B-added Cr-Mo steels. 1185-1191A
Improvement of shape memory effect in Fe-Mn-Si-Cr-Ni alloys. 2599-2604A

Titanium, Alloying elements
Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys. 925-939A

Erratum: "Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid-solution alloys". 1686A
Correction to erratum: Effects of Ti addition on cleavage fracture in Nb-Cr-Ti solid solution alloys. 3025A

Titanium, Binary systems
$\beta \rightarrow \alpha''$ and $\beta \rightarrow \omega$ transformations in Ti-Os alloys. 231-233A
Determination of the critical nucleus size of precipitates using the macroscopic composition gradient method. 2783-2789A
Partial Fe-Ti alloy phase diagrams at high pressure. 3009-3011A

Titanium, Extraction
Titanium powder prepared by magnesiothermic reduction of Ti^{2+} in molten salt. 403-410B
High-temperature phase relations and thermodynamics in the iron-titanium-oxygen system. 695-705B

Titanium, Extrusion
Workability of commercial-purity titanium and 4340 steel during equal channel angular extrusion at cold-working temperatures. 1425-1435A

Titanium, Forging
Open-die forging of structurally porous sandwich panels. 2689-2699A

Titanium, Microstructure
Ultrasonic measurement of the Kearns texture factors in Zircaloy, zirconium, and titanium. 1981-1988A

Titanium, Powder technology
Thermal analysis of self-propagating high-temperature reactions in titanium, boron, and aluminum powder compacts. 781-788A
Hot explosive compaction of Mo-Ti alloys. 2483-2489A

Titanium, Ternary systems
Thermodynamic activities in the alloys of the Ti-Al-Nb system. 1315-1326A
Evaluation of interaction parameters in metallic solutions by the isoactivity method. 3103-3110A

Titanium base alloys, Bonding
Wide-gap transient liquid-phase bonding of Ti-48 at.% Al-2 at.% Cr-2 at.% Nb. 2723-2726A

Titanium base alloys, Composite materials
Observation of fatigue damage process in SiC fiber-reinforced Ti-15-3 composite at high temperature. 221-229A
Effect of in situ material properties on fatigue damage modes in titanium matrix composites. 255-266A
Fatigue crack growth in Ti-matrix composites with spatially varied interfaces. 267-275A
Elastic shielding during fatigue-crack growth of titanium matrix composites. 277-286A
Evaluation of the MMCLIFE 3.0 code in predicting crack growth in titanium aluminide composites. 287-299A
Transverse creep of SiC/Ti-6Al-4V fiber-reinforced metal matrix composites. 301-306A
Degradation of residual strength in SCS-6/TI-15-3 due to fully reversed fatigue. 307-313A
Interface characterization of duplex metal-coated SiC fiber-reinforced Ti-15-3 matrix composites. 653-666A
Diffusional reactions during processing of Timetal 21S/Al_2O_3 composites. 1437-1447A
High-temperature mechanical behavior of Ti-6Al-4V alloy and TiC_p/Ti-6Al-4V composite. 1569-1578A
Fatigue in selectively fiber-reinforced titanium matrix composites. 2237-2248A
Effect of fiber spatial arrangement on the transverse strength of titanium matrix composites. 2513-2522A
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A
Tensile properties of duplex metal-coated SiC fiber and titanium alloy matrix composites. 3019-3024A

Titanium base alloys, Extrusion
Finite-element modeling of nonisothermal equal-channel angular extrusion. 1391-1402A
Hot working of Ti-6Al-4V via equal channel angular extrusion. 2473-2481A

Titanium base alloys, Forging
Cavitation and failure during hot forging of Ti-6Al-4V. 1411-1424A

Titanium base alloys, Heat treatment
The nitriding behavior of Ti-Al alloys at 1000°C. 19-29A
Mechanism of surface modification of the Ti-6Al-4V alloy using a gas tungsten arc heat source. 1597-1603A
Influence of annealing on depth distributions and microstructure of ion-implanted Ti6Al4V. 2121-2127A

Titanium base alloys, Mechanical properties
The effects of pre-dissolved hydrogen on cleavage and grain boundary fracture initiation in metastable beta Ti-3Al-8V-6Cr-4Mo-4Zr. I. 65-79A
The effect of microstructure on fracture toughness and fatigue crack growth behavior in γ-titanium aluminide based intermetallics. 563-577A
Modeling and measurement of the notched strength of gamma titanium aluminides under monotonic loading. 949-959A
Statistical simulation of small fatigue crack nucleation and coalescence in a lamellar TiAl alloy. 1203-1209A
Interplay between oxidation and wear behavior of the Ti-48Al-2Cr-2Nb-1B alloy. 2019-2026A
The creep behavior of Ti-Al-Nb O+bcc orthorhombic alloys. II. 2349-2367A
Low-cycle dwell-time fatigue in Ti-6242. 2383-2389A
On the occurrence of dynamic strain aging in near-alpha alloy Ti-5.8Al-4Sn-3.5Zr-0.7Nb-0.5Mo-0.35Si. 2547-2549A
The influence of internal stresses on the fracture toughness of α/β titanium alloys. 2853-2863A
Influence of the temperature on the plastic deformation in TiAl. 2865-2873A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Titanium base alloys, Metal working
Effect of initial microstructure on plastic flow and dynamic globularization during hot working of Ti-6Al-4V. 3219-3229A

Titanium base alloys, Microstructure
Time-dependent twinning during ambient temperature compression creep of alpha Ti-0.4Mn alloy. 1675-1679A

Titanium base alloys, Phase transformations
Stress-induced products in a Ti-14.8V alloy deformed in tension. 2249-2251A
The microstructural evolution in Ti-Al-Nb O+bcc orthorhombic alloys. I. 2305-2323A
Formation of α phase in the massive and feathery γ-TiAl alloys during aging in the single α field. 2591-2598A

Titanium base alloys, Phases (state of matter)
$\beta \rightarrow \alpha''$ and $\beta \rightarrow \omega$ transformations in Ti-Os alloys. 231-233A
Thermodynamic activities in the alloys of the Ti-Al-Nb system. 1315-1326A

Titanium base alloys, Powder technology
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the $\alpha+\gamma$-phase field. 751-761A
Thermal analysis of self-propagating high-temperature reactions in titanium, boron, and aluminum powder compacts. 781-788A
Field-activated combustion synthesis of titanium aluminides. 1101-1108A

Titanium base alloys, Welding
Fusion zone microstructure and porosity in electron beam welds of an $\alpha+\beta$ titanium alloy. 789-798A
The role of phase transformation in electron-beam welding of TiAl-based alloys. 1717-1726A

Titanium carbide, Coatings
Effect of flux addition on the microstructure and hardness of TiC-reinforced ferrous surface composite layers fabricated by high-energy electron beam irradiation. 3131-3141A

Titanium carbide, Composite materials
Interaction between nonstoichiometric titanium carbide and Fe-C alloys. 857-863B
A study on the kinetic process of reaction synthesis of TiC. I. Experimental research and theoretical model. 1147-1151A
A study on the kinetic process of reaction synthesis of TiC. II. Theoretical analyses and numerical calculation. 1153-1157A
High-temperature mechanical behavior of Ti-6Al-4V alloy and TiC_p/Ti-6Al-4V composite. 1569-1578A

Titanium compounds, Bonding
Wide-gap transient liquid-phase bonding of Ti-48 at.% Al-2 at.% Cr-2 at.% Nb. 2723-2726A

Titanium compounds, Coatings
Synthesis and characterizatiion of Ti-Si-C-N films. 2439-2447A

Titanium compounds, Composite materials
Wear behavior of in situ Al-based composites containing TiB_2, Al_2O_3, and Al_3Ti particles. 243-248A
Degradation mechanism of SiC/super α_2 composite due to interfacial reaction. 2713-2720A
Wear behavior of Al-Al_3Ti composite manufactured by a centrifugal method. 3253-3261A

Titanium compounds, Heat treatment
The nitriding behavior of Ti-Al alloys at 1000°C. 19-29A

Titanium compounds, Mechanical properties
The effect of microstructure on fracture toughness and fatigue crack growth behavior in γ-titanium aluminide based intermetallics. 563-577A
Modeling and measurement of the notched strength of gamma titanium aluminides under monotonic loading. 949-959A
Statistical simulation of small fatigue crack nucleation and coalescence in a lamellar TiAl alloy. 1203-1209A
Dislocations, kink bands, and room-temperature plasticity of Ti_3SiC_2. 1727-1738A
Interplay between oxidation and wear behavior of the Ti-48Al-2Cr-2Nb-1B alloy. 2019-2026A
The creep behavior of Ti-Al-Nb O+bcc orthorhombic alloys. II. 2349-2367A
Influence of the temperature on the plastic deformation in TiAl. 2865-2873A
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Titanium compounds, Phase transformations
Strain dependence of pseudoelastic hysteresis of NiTi. 1275-1282A

The microstructural evolution in Ti-Al-Nb O+bcc orthorhombic alloys. I. 2305-2323A
Formation of α phase in the massive and feathery γ-TiAl alloys during aging in the single α field. 2591-2598A
Transformation behavior of sintered porous NiTi alloys. 2753-2756A

Titanium compounds, Powder technology
Micropyretic synthesis studies of Ni-, Al-, Ti-, and Nb-containing alloys. 171-188B
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the α+γ-phase field. 751-761A
Thermal analysis of self-propagating high-temperature reactions in titanium, boron, and aluminum powder compacts. 781-788A
Field-activated combustion synthesis of titanium aluminides. 1101-1108A

Titanium compounds, Welding
The role of phase transformation in electron-beam welding of TiAl-based alloys. 1717-1726A

Titanium diboride, Alloying elements
Microstructure of TiB_2/carbon steel surface-alloyed materials fabricated by high-energy electron beam irradiation. 3143-3151A

Titanium diboride, Composite materials
Wear behavior of in situ Al-based composites containing TiB_2, Al_2O_3, and Al_3Ti particles. 243-248A

Titanium dioxide, Composite materials
Wear behavior of in situ Al-based composites containing TiB_2, Al_2O_3, and Al_3Ti particles. 243-248A

Titanium dioxide, Reactions (chemical)
Rate of reduction of Fe_tO-SiO_2-TiO_2 melts with CO gas. 827-829B

Titanium nitride, Coatings
Liquid impact erosion mechanism and theoretical impact stress analysis in TiN-coated steam turbine blade materials. 961-968A
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Titanium nitride, Impurities
Effect of TiN particles and microstructure on fracture toughness in simulated heat-affected zones of a structural steel. 2089-2096A

Tomography
High-energy x-ray computed tomography of the progression of the solidification front in pure aluminum. 1403-1409A

Tool life, Coating effects
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Tool steels, Heat treatment
Multicomponent diffusion simulation based on finite elements. 2575-2582A

Tool steels, Powder technology
The mechanism of porous column formation during spray forming. 1679-1682A

Torsion, Microstructural effects
Effect of size and shape of tungsten particles on dynamic torsional properties in tungsten heavy alloys. 1261-1273A

Transgranular fracture, Alloying effects
Properties of the $Ir_{85}Nb_{15}$ two-phase refractory superalloys with nickel additions. 2629-2639A

Transgranular fracture, Microstructural effects
The effects of grain-refining precipitates on the development of toughness in 4340 steel. 93-114A

Transition joints, Mechanical properties
The influence of solid-state and liquid-phase bonding on fatigue at Al/Al_2O_3 interfaces. 763-769A
Bulk-alloy microstructural analogues for transient liquid-phase bonds in the NiAl/Cu/Ni system. 3111-3124A

Tribology
Mechanical behavior of aluminum matrix composite during extrusion in the semisolid state. 1137-1146A
Interplay between oxidation and wear behavior of the Ti-48Al-2Cr-2Nb-1B alloy. 2019-2026A

TRIP steels, Metal working
A general approach for predicting the drawing fracture load and limit drawing ratio of an axisymmetric drawing process. 2619-2627A

TRIP steels, Phase transformations
Interaction energy between martensitic variants. 2583-2590A

Tritium, Diffusion
Copper coatings for minimization of retention and permeation of implanted tritium in aluminum alloy 6061. 2191-2199A

TTT curves
Analysis of temperature and microstructure in the quenching of steel cylinders. 815-822B

Tubes, Mechanical properties
Yield behavior of a mild steel after prestraining and aging under reversed stress. 411-416A

Tungsten, Alloying additive
The effect of manganese addition on the microstructure of W-Ni-Fe heavy alloy. 627-632A

Tungsten, Ternary systems
The influence of temperature gradients on Ostwald ripening. 2341-2348A

Tungsten base alloys, Mechanical properties
Effect of size and shape of tungsten particles on dynamic torsional properties in tungsten heavy alloys. 1261-1273A
Effect of surface carburization on dynamic deformation and fracture of tungsten heavy alloys. 2027-2035A

Tungsten base alloys, Microstructure
The effect of manganese addition on the microstructure of W-Ni-Fe heavy alloy. 627-632A

Tungsten base alloys, Powder technology
Application of percolation theory in predicting shape distortion during liquid-phase sintering. 2209-2220A
Densification and shape distortion in liquid-phase sintering. 3211-3217A

Tungsten carbide, Composite materials
A dual composite of WC-Co. 3231-3238A

Turbine blades, Casting
A three-dimensional cellular automation-finite element model for the prediction of solidification grain structures. 3153-3165A

Turbine blades, Mechanical properties
Liquid impact erosion mechanism and theoretical impact stress analysis in TiN-coated steam turbine blade materials. 961-968A

Turbulent flow
Turbulence structure of bottom-blowing bubbling jet in a molten Wood's metal bath. 61-66B
Discussion of "Decay of fluid motion in a filling ladle after tapping" and author's reply. 541-543B
LDV measurements and computation of a turbulent circular jet placed non-concentrically in a confining pipe. 957-967B

Turning (machining)
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Twinning
Microstructural evolution of a nanocrystalline Ti-47Al-3Cr alloy during annealing in the α+γ-phase field. 751-761A
Influence of grain size and stacking-fault energy on deformation twinning in fcc metals. 1223-1233A
Time-dependent twinning during ambient temperature compression creep of alpha Ti-0.4Mn alloy. 1675-1679A

Twinning, Stress effects
Stress-induced products in a Ti-14.8V alloy deformed in tension. 2249-2251A

Ultrasonic testing
Ultrasonic measurement of the Kearns texture factors in Zircaloy, zirconium, and titanium. 1981-1988A

Vanadium, Alloying additive
Composition, microstructure, hardness, and wear properties of high-speed steel rolls. 399-409A

Vanadium compounds, Mechanical properties
Environmental embrittlement caused by hydrogen for intermetallic compounds: preliminary model of ductility reduction. 3089-3097A

Vapor deposited coatings, Heat treatment
Rapid thermal processing TiN coatings deposited by chemical and physical vapor deposition using a low-energy, high-current electron beam: micro-structural studies and properties. 2931-2939A

Velocity measurement
Development and calibration of a Karman vortex probe for measurement of molten-steel velocities. 53-59B

Viscosity
Discussion of "Mixing time and fluid flow phenomena in liquids of varying kinematic viscosities agitated by bottom gas injection" and authors' reply. 349-352B

Voids
Evidence of void nucleation and growth on planar slip bands in a Nb-Cr-Ti alloy. 579-585A
Cavity sequences in continuously cast billets. I. Analysis of empirical data. 751-761B
Cavity sequences in continuously cast billets. II. Stochastic models. 763-772B

Volume fraction
Modeling the fluid-flow-induced stress and collapse in a dendritic network. 287-293B
Degradation of residual strength in SCS-6/Ti-15-3 due to fully reversed fatigue. 307-313A
Synergistic effects of wear and corrosion for Al_2O_3 particulate-reinforced 6061 aluminum matrix composites. 643-651A

Infuence of martensite content and morphology on tensile and impact properties of high-martensite dual-phase steels. 1193-1202A
Fatigue in selectively fiber-reinforced titanium matrix composites. 2237-2248A
Effect of fiber spatial arrangement on the transverse strength of titanium matrix composites. 2513-2522A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Volume fraction, Processing effects
Analysis of size distributions of primary oxide inclusions in Fe-10 mass% Ni-M (M=Si, Ti, Al, Zr, and Ce) alloy. 259-270B

Waste disposal
Preparation and physical characteristics of a lithium-beryllium-substituted fluorapatite. 147-153A

Water, Environment
Hydrogen embrittlement, grain boundary segregation, and stress corrosion cracking of alloy X-750 in low- and high-temperature water. 1579-1596A

Water, Reactions (chemical)
Triggering steam explosions of single drops of a molten ferro-silicon alloy with a simple encapsulated mechanical impactor. 1083-1088B

Water quenching
Mechanism of the formation of lamellar $M_{23}C_6$ at and near twin boundaries in austenitic stainless steels. 2791-2801A

Water vapor, Environment
The effect of water vapor on the oxidation of alloys that develop alumina scales for protection. 2905-2913A

Wear mechanisms, Environmental effects
Dry sliding wear behavior of A356-15% SiC_p composites under controlled atmospheric conditions. 2523-2538A

Wear rate, Composition effects
Synergistic effects of wear and corrosion for Al_2O_3 particulate-reinforced 6061 aluminum matrix composites. 643-651A

Wear resistance
Interplay between oxidation and wear behavior of the Ti-48Al-2Cr-2Nb-1B alloy. 2019-2026A

Wear resistance, Composition effects
Wear behavior of in situ Al-based composites containing TiB_2, Al_2O_3, and Al_3Ti particles. 243-248A
Wear of Al-based hybrid composites containing BN and SiC particulates. 2551-2555A
A dual composite of WC-Co. 3231-3238A
Wear behavior of Al-Al_3Ti composite manufactured by a centrifugal method. 3253-3261A

Wear resistance, Heating effects
Surface hardening of a gray cast iron used for a diesel engine cylinder block using high-energy electron beam irradiation. 1211-1221A

Wear resistance, Processing effects
Composition, microstructure, hardness, and wear properties of high-speed steel rolls. 399-409A

Weight reduction
Relation between cooling rates and microstructures in gravity-die-cast AZ91D disks. 723-729B

Weld metal, Microstructure
Direction of grain-boundary migration in the weld metal of an austenitic stainless steel. 621-626A

Welded joints, Heat treatment
Precipitation sequence in friction stir weld of 6063 aluminum during aging. 3125-3130A

Welded joints, Magnetic properties
Effect of different stages of tensile deformation on micromagnetic parameters in high-strength, low-alloy steel. 2067-2072A

Welded joints, Mechanical properties
Hot cracking susceptibility of fillers 52 and 82 in alloy 690 welding. 417-426A
The thermal fatigue behavior of the combustor alloys IN 617 and Haynes 230 before and after welding. 981-989A
Comparison of three different techniques for measuring the residual stresses in an electron beam-welded plate of Waspaloy. 1797-1808A
Effect of TiN particles and microstructure on fracture toughness in simulated heat-affected zones of a structural steel. 2089-2096A
Quantitative evaluation of softened regions in weld heat-affected zones of 6061-T6 aluminum alloy—characterizing of the laser beam welding process. 2115-2120A

Welded joints, Microstructure
Modeling macro- and microstructures of gas-metal-arc welded HSLA-100 steel. 483-493B
Direction of grain-boundary migration in the weld metal of an austenitic stainless steel. 621-626A
Fusion zone microstructure and porosity in electron beam welds of an $\alpha+\beta$ titanium alloy. 789-798A
Microstructural evolution of 6063 aluminum during friction-stir welding. 2429-2437A
A process model for the heat-affected zone microstructure evolution in Al-Zn-Mg weldments. 2667-2677A
A process model for the heat-affected zone microstructure evolution in duplex stainless steel weldments. I. The model. 2915-2929A

Welded joints, Oxidation
Role of gaseous environment and secondary precipitation in microstructural degradation of Cr-Mo steel weldments at high temperatures. 2103-2113A

Welded joints, Phase transformations
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A
The role of phase transformation in electron-beam welding of TiAl-based alloys. 1717-1726A

Welding parameters
Fusion zone microstructure and porosity in electron beam welds of an $\alpha+\beta$ titanium alloy. 789-798A

Welding wire, Melting
Droplet formation, detachment, and impingement on the molten pool in gas metal arc welding. 791-801B

Weldments, Magnetic properties
Effect of different stages of tensile deformation on micromagnetic parameters in high-strength, low-alloy steel. 2067-2072A

Weldments, Oxidation
Role of gaseous environment and secondary precipitation in microstructural degradation of Cr-Mo steel weldments at high temperatures. 2103-2113A

Weldments, Phase transformations
Microstructural zones in the primary solidification structure of weldment of 9Cr-1Mo steel. 161-174A

Whisker composites, Mechanical properties
Processing copper and silver matrix composites by electroless plating and hot pressing. 1119-1136A

Whisker composites, Recycling
Recycling of aluminum matrix composites. 839-844A

Widmanstatten structure, Heating effects
The microstructural evolution in Ti-Al-Nb O+bcc orthorhombic alloys. I. 2305-2323A

Wire, Microstructure
Atom probe and transmission electron microscopy investigations of heavily drawn pearlitic steel wire. 717-727A

Work rolls, Mechanical properties
Correlation of microstructure and microfracture mechanism of five work rolls. 234-243A

Workability
Workability of commercial-purity titanium and 4340 steel during equal channel angular extrusion at cold-working temperatures. 1425-1435A

X ray diffraction
Transmission x-ray diffraction of single-crystal nickel-base superalloys. 1880-1882A

Yield strength
On the occurrence of dynamic strain aging in near-alpha alloy Ti-5.8Al-4Sn-3.5Zr-0.7Nb-0.5Mo-0.35Si. 2547-2549A
Mathematical modeling of the hot-deformation behavior of superalloy IN718. 2701-2712A

Yield strength, Alloying effects
Properties of the $Ir_{85}Nb_{15}$ two-phase refractory superalloys with nickel additions. 2629-2639A

Yield strength, Composition effects
Microstructure and mechanical behavior of spray-deposited high-Li Al-Li alloys. 1381-1389A
High-temperature mechanical behavior of Ti-6Al-4V alloy and TiC_p/Ti-6Al-4V composite. 1569-1578A
Plasticity of continuous fiber-reinforced metals. 1843-1866A
The effect of Mg on the microstructure and mechanical behavior of Al-Si-Mg casting alloys. 2611-2618A
Influence of the localized initial plastic deformation on the effective thermomechanical response of metal-matrix composites. 2875-2884A
Finite-element method simulation of effects of microstructure, stress state, and interface strength on flow localization and constraint development in Nb/Cr_2Nb in situ composites. 3239-3251A

Yield strength, Deformation effects
Yield behavior of a mild steel after prestraining and aging under reversed stress. 411-416A
Microstructures and tensile properties of an Al-12 wt.% Si alloy produced by reciprocating extrusion. 2503-2512A
The influence of rolling practice on notch toughness and texture development in high-strength linepipe. 3045-3054A

Yield strength, Microstructural effects
Influence of martensite content and morphology on tensile and impact properties of high-martensite dual-phase steels. 1193-1202A
Influence of grain size and stacking-fault energy on deformation twinning in fcc metals. 1223-1233A
Influence of grain size on the constitutive response and substructure evolution of Monel 400. 1235-1247A
Microstructure-property relations in as-extruded ultrahigh-carbon steels. 1559-1568A

Yield strength, Processing effects
Influence of cold rolling and strain rate on plastic response of powder metallurgy and chemical vapor deposition rhenium. 2641-2648A

Yield strength, Stress effects
Bauschinger effect and multiaxial yield behavior of stress-reversed mild steel. 3069-3078A

Yttrium, Reactions (chemical)
Thermodynamics of yttrium and oxygen in molten zirconium. 352-354B

Zinc, Binary systems
Dendritic morphology observed in the solid-state precipitation in binary alloys. 1529-1534A

Zinc, Diffusion
A new analysis for the determination of ternary interdiffusion coefficient from a single diffusion couple. 535-543A

Zinc, Reactions (chemical)
Selective removal of iron contaminations from zinc-chloride melts by cementation with zinc. 607-611B

Zinc base alloys, Coatings
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A

Zinc base alloys, Phase transformations
Phase transformation of Zn-4Al-3Cu alloy during heat treatment. 917-923A

Zinc compounds, Ternary systems
Experimental study of phase equilibria in the system PbO-ZnO-SiO_2. 21-27B

Zinc plating
Microcracking of flash coatings and its effect on the Zn-Ni coating adhesion of electrodeposited sheet steel. 437-448A

Zirconium, Binary systems
Cyclic solid-state transformations during ball milling of aluminum zirconium powder and the effect of milling speed. 1877-1880A
A numerical model of peritectoid transformation. 2563-2573A

Zirconium, Extraction
Studies on the chlorination of zircon. I. Static bed investigations. 205-213B
Kinetics of chlorination of zirconia in mixture with petroleum coke by chlorine gas. 375-381B

Zirconium, Microstructure
Ultrasonic measurement of the Kearns texture factors in Zircaloy, zirconium, and titanium. 1981-1988A

Zirconium, Reduction (chemical)
Thermodynamics of yttrium and oxygen in molten zirconium. 352-354B

Zirconium base alloys, Mechanical properties
Mechanisms for fracture and fatigue-crack propagation in a bulk metallic glass. 1739-1753A

Zirconium base alloys, Microstructure
Ultrasonic measurement of the Kearns texture factors in Zircaloy, zirconium, and titanium. 1981-1988A

Zirconium base alloys, Phase transformations
Cyclic solid-state transformations during ball milling of aluminum zirconium powder and the effect of milling speed. 1877-1880A

Zirconium dioxide, Coatings
Mechanism of spallation in platinum aluminide/electron beam physical vapor-deposited thermal barrier coatings. 427-435A
Mathematical modeling of a melt pool driven by an electron beam. 515-525B

Zirconium dioxide, Composite materials
Discussion of "Particle engulfment and pushing by solidying interfaces. II. Microgravity experiments and theoretical analysis" and authors' reply. 1887-1894A

Zirconium dioxide, End uses
A pilot-scale trial of an improved galvanic deoxidation process for refining molten copper. 307-321B

Zirconium dioxide, Impurities
Dispersion of fine primary inclusions of MgO and ZrO_2 in Fe-10 mass% Ni alloy and the solidification structure. 1053-1063B

Zirconium dioxide, Reduction (chemical)
Kinetics of chlorination of zirconia in mixture with petroleum coke by chlorine gas. 375-381B

Zone melting
Pattern formation during stationary heating and zone melting recrystallization of a silicon thin film. 807-813A
